"This book looks at solutions that provide the best fits of distance learning technologies for the teacher and learner presented by sharing teacher experiences in information technology education"--Provided by publisher.

Randax Education Guide

The Condition of Education

This study proposes a double thesis. The first concerns the *Logische Untersuchungen* itself. We will attempt to show that its statements about the nature of being are inconsistent and that this inconsistency is responsible for the failure of this work. The second concerns the *Logische Untersuchungen*'s relation to the *Ideen*. The latter, we propose, is a response to the failure of the *Logische Untersuchungen*'s ontology. It can thus be understood in terms of a shift in the ontology of the *Logische Untersuchungen*, a shift motivated by the attempt to overcome the contradictory assertions of the *Logische Untersuchungen*. In this sense our thesis is that, in the technical meaning that Husserl gives the term, the *Logische Untersuchungen* and the *Ideen* can be linked via a "motivated path." We can, by way of an introduction, clarify our theses by regarding three elements. The first is the relation of epistemology to ontology. The second is the notion of motivation as Husserl conceives the term. The third is the fundamental distinctions that are to be explained via the notion of motivation. 1. We should begin by remarking that the goal of the *Logische Untersuchungen* is explicitly epistemological; it is that of answering "the cardinal question of epistemology, the question concerning the objectivity of knowledge" (LU, Tub. ed. , I, 8; F. , p. 56V For Husserl, his other questions - i. e.
