Cost Accounting- Theory & Problems

This book addresses an issue of international, national and local importance—HIV/AIDS—an issue where the predominant attention is on the humanitarian and developmental catastrophe that it is accused of leading to, particularly in the developing world. The book, based on a first-of-its-kind study conducted in Goa (India), will be of great assistance to researchers as well as policy makers. It will assist policy makers in assessing the (in)adequacy of the measures taken by the government, NGOs and donors in combating the scourge of HIV/AIDS.

Self-Science is a curriculum and a process for teaching social and emotional skills. It is a flexible framework where students do activities, or experiments, that lead to discussion and learning. The students' own experiences, concerns, and questions drive the content, so the process works with people from all kinds of backgrounds,

all ages, an all levels. Self-Science fuses cognitive and affective learning: students build feeling and thinking skills at the same time. Rather than telling children what not to do, Self-Science provides multiple options of what to do. It helps children become more aware of themselves and make more conscious decisions about the ways they think, feel, and act independently and interdependently. Nationally and internationally, parents and teachers are increasingly concerned about school culture and emotional intelligence competencies. Issues of exclusion, violence, depression, and under achievement are all addressed within this preventative, comprehensive program. Self-Science -- so named because emotional intelligence grows from the study of ourselves and our relationships -- is one of the few comprehensive, developmental, and research-based curricula for creating a school-wide culture of emotional intelligence. The Self-Science program creates a fundamental shift in the structure of the school toward collaboration, inclusion, and humanism. Part of the power of Self-Science is its flexibility. Once a facilitator understands how a lesson flows, she or he can easily adapt any current topics, other exercises, and even academic subject matter into the lessons. In addition, Self-Science can be taught as a "stand-alone" class or folded into existing programs such as class meetings, advisory, life-skills, or community service.

Macroeconomics

On account of the growing importance of the subject of cost accounting, it has

been included as a special subject in all commerce and management courses, conducted by different Indian universities and professional institutes. The present volume, Cost Accounting-Theory & Problems, has been written to meet in full measure the requirements of the students preparing for these courses. The entire book has been divided into Five sections. Section ONE explains the fundamental concepts which are necessary for the understanding of the subject. Section TWO deals with the principles of costing as applicable to certain specific industries. Section THREE explains the accounting methods. In this section besides others, intricate topics of the cost control accounts and integrated accounts have been discussed with complete clarity and simplicity of exposition. Section FOUR refers to costing as a special tool for managerial control. Adequate space has been given to this recent function of cost accounting. And here topics of budgetary control, standard costing, marginal costing and break even analysis have been elaborately discussed. Section FIVE contains revisionary problems.

Professor Thomas relates security policy to the country's economy and

technological capacity, discusses the capabilities of each of the armed services, and considers the issue of arms importation vs. indigenous production. He also explores the prospects for the future under Rajiv Gandhi. Originally published in 1987. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Joy Of Reading Literature

This book, first published in 1936, provides a comprehensive description and analysis of every constitutional aspect of British rule in India from 1600 to 1936. Beginning with a description of the East India Company before Plassey, its constitution, administration of settlements, and relation to the Indian states, the book closes with an account of the reforms of the 1930s, the events leading up to the White Paper and an analysis and elucidation of the Government of India Act 1935.

This book presents an analysis of the correlation between the mind and the body, a complex topic of study and discussion by scientists and philosophers. Drawing largely on neuroscience and philosophy, the author utilizes the scientific method and incorporates lessons learned from a vast array of sources. Based on the most recent cutting-edge scientific discoveries on the Mind-Body problem, Tomasi presents a full examination of multiple fields related to neuroscience. The volume offers a scientist-based and student-friendly journey into medicine, psychology, artificial intelligence, embodied cognition, and social, ecological and anthropological models of perception, to discover our truest self.

Business Communication

This book highlights the impacts of COVID-19 on the global economy, at a time when the world economy has experienced large demand and supply shocks. To limit the transmission of the corona virus, all governments shut down production, restricted movement of people, etc, which led to severe curtailment in demand, and disruptions in supply chains all over the world. The COVID-19 pandemic has dragged the world economy into an abrupt and unforeseen recession. According to

IMF estimates, world GDP will fall by over 3 percent due to the outbreak of this pandemic - the steepest slowdown since the Great Depression of the 1930s. The ILO has predicted a loss of about 25 million jobs due to this pandemic. Emerging markets will lose at least 2.4 percent of their GDP in 2020 alone. Loss in global travel revenue due to COVID-19 is estimated at USD 810.7 billion. Financial markets have been badly hit and about USD 83 billion has been pulled out of developing markets since the outbreak of COVID-19. The list of sectors impacted by the COVID-19 outbreak, is endless All governments have announced stimulus packages comprising a mix of fiscal and monetary measures, but it is difficult to predict how quickly businesses will respond to these measures. The papers in this book, which are the proceedings of an online global conference, have attempted to analyze and summarize the thoughts of academicians on these vexed issues.
