Exercises to facilitate effective communication across a wide range of cultural differences Communication styles and patterns differ vastly among people from different cultures. Every culture has a "communication style norm" and when that style mixes with another, stereotypes and misperceptions arise. 52 Activities for Improving Cross-Cultural Communication explores cross-cultural communication issues with an eye toward increasing understanding and effectiveness. 52 Activities for Improving Cross-Cultural Communication is a practical trainer's manual that includes applications from many sectors, such as business, diversity, cross-cultural fields, and from many trainers in the U.S., Europe, Asia, the Middle East and Latin America. Exercises are organized according to audience, time required to perform and the risk level for participants, a unique feature created by the authors, and are easily adaptable to the user's particular need and situation.

### **Spectrum Math Workbook, Grade 5**

What is fifth grade math? Not all schools and teachers around the world cover the same topics in the same depth in 5th grade, yet at this stage the student is generally learning a variety of arithmetic and prealgebra skills. This fifth grade math workbook includes: decimal place values, arithmetic with decimals, arithmetic with fractions (including mixed numbers), multiplication with multiple digits, long division practice, data analysis with a variety of graphs, pattern recognition (additive and multiplicative relationships), geometric figures (including perimeter and area), measurement and unit conversions (customary and metric), a first introduction to working with variables, financial mathematics, and other fifth grade math and prealgebra skills. The author, Chris McMullen, Ph.D., has over twenty years of experience teaching math skills to physics students. He prepared this workbook to share his strategies for applying arithmetic and prealgebra skills. The answers to all of the exercises can be checked with a key at the back.
