With trust in top-down government faltering, community-based groups around the world are displaying an ever-greater appetite to take control of their own lives and neighbourhoods. Government, for its part, is keen to embrace the projects and the planning undertaken at this level, attempting to regularise it and use it as a means of reconnecting to citizens and localising democracy. This unique book analyses the contexts, drivers and outcomes of community action and planning in a selection of case studies in the global north: from emergent neighbourhood planning in England to the community-based housing movement in New York, and from active citizenship in the Dutch new towns to associative action in Marseille. It will be a valuable resource for academic researchers and for postgraduate students on social policy, planning and community development courses.

Resources in Education

Human Factors Engineering Bibliographic Series

The essential guide to blending safety and health with economical engineering
Over time, the role of the engineer has evolved into a complex combination of

Download Free Abma Computer Engineering Past Papers

duties and responsibilities. Modern engineers are required not only to create products and environments, but to make them safe and economical as well. *Safety and Health for Engineers, Second Edition* is a comprehensive guide that helps engineers reconcile safety and economic concerns using the latest cost-effective methods of ensuring safety in all facets of their work. It addresses the fundamentals of safety, legal aspects, hazard recognition, the human element of safety, and techniques for managing safety in engineering decisions. Like its successful predecessor, this Second Edition contains a broad range of topics and examples, detailed references to information and standards, real-world application exercises, and a significant bibliography of books for each chapter. Inside this indispensable resource, you'll find:

- * The duties and legal responsibilities for which engineers are accountable
- * Updated safety laws and regulations and their enforcement agencies
- * An in-depth study of hazards and their control
- * A thorough discussion of human behavior, capabilities, and limitations
- * Key instruction on managing safety and health through risk management, safety analyses, and safety plans and programs

Additionally, *Safety and Health for Engineers* includes the latest legal considerations, new risk analysis methods, system safety and decision-making tools, and today's concepts and methods in ergonomic design. It also contains revised reference figures and tables, OSHA permissible exposure limits, and updated examples and exercises taken from real cases that challenged engineering designs. Written for engineers, plant managers, safety professionals, and students, *Safety and Health for Engineers, Second Edition*

provides the information and tools you need to unite health and safety with economical engineering for safer technological solutions.

Proceedings

The increasing impact of neoliberalism across the globe means that a complex interplay of democratic, economic and managerial rationalities now frame the parameters and practices of community development. This book explores how contemporary politics, and the power relations it reflects and projects, is shaping the field today. This first title in the timely Rethinking Community Development series presents unique and critical reflections on policy and practice in Taiwan, Australia, India, South Africa, Burundi, Germany, the USA, Ireland, Malawi, Ecuadorian and Peruvian Amazonia and the UK. It addresses the global dominance of neoliberalism, and the extent to which practitioners, activists and programmes can challenge, critique, engage with or resist its influence. Addressing key dilemmas and challenges being navigated by students, academics, professionals and activists, this is a vital intellectual and practical resource.

Wireless and Satellite Systems

This two-volume set LNICST 280-281 constitutes the post-conference proceedings

of the 10th EAI International Conference on Wireless and Satellite Services, WiSATS 2019, held in Harbin, China, in January 2019. The conference was formerly known as the International Conference on Personal Satellite Services (PSATS) mainly covering topics in the satellite domain. The 137 full papers were carefully reviewed and selected from 289 submissions. The papers are organized in topical sections on machine learning for satellite-terrestrial networks, human-machine interactive sensing, monitoring, and communications, integrated space and onboard networks, intelligent signal processing, wireless communications and networks, vehicular communications and networks, intelligent 5G communication and digital image processing technology, security, reliability and resilience in internet of things, advances in communications and computing for internet of things.
