Now that people are aware that data can make the difference in an election or a business model, data science as an occupation is gaining ground. But how can you get started working in a wide-ranging, interdisciplinary field that's so clouded in hype? This insightful book, based on Columbia University's Introduction to Data Science class, tells you what you need to know. In many of these chapter-long lectures, data scientists from companies such as Google, Microsoft, and eBay share new algorithms, methods, and models by presenting case studies and the code they use. If you're familiar with linear algebra, probability, and statistics, and have programming experience, this book is an ideal introduction to data science. Topics include: Statistical inference, exploratory data analysis, and the data science process Algorithms Spam filters, Naive Bayes, and data wrangling Logistic regression Financial modeling Recommendation engines and causality Data visualization Social networks and data journalism Data engineering, MapReduce, Pregel, and Hadoop Doing Data Science is collaboration between course instructor Rachel Schutt, Senior VP of Data Science at News Corp, and data science consultant Cathy O'Neil, a senior data scientist at Johnson Research Labs, who attended and blogged about the course.

The *Wherewithal of Life* engages with current developments in the anthropology of ethics and migration studies to explore in empirical depth and detail the life experiences of three young men – a Ugandan migrant in Copenhagen, a Burkina Faso migrant in Amsterdam, and a Mexican migrant in Boston – in ways that significantly broaden our understanding of the existential situations and ethical dilemmas of those migrating from the global south. Michael Jackson offers the first biographically based phenomenological account of migration and mobility, providing new insights into the various motives, tactics, dilemmas, dreams, and disappointments that characterize contemporary migration. It is argued that the quandaries of African or Mexican migrants are not unique to people moving between ‘traditional’ and ‘modern’ worlds. While more intensely felt by the young, seeking to find a way out of a world of limited opportunity and circumscribed values, the experiences of transition are familiar to us all, whatever our age, gender, ethnicity or social status – namely, the impossibility of calculating what one may lose in leaving a settled life or home place; what one may gain by risking oneself in an alien environment; the difficulty of striking a balance between personal fulfillment and the moral claims of kinship; and the struggle to know the difference between ‘concrete’ and ‘abstract’ utopias (the first reasonable and worth pursuing; the second hopelessly unattainable).

It's November and Maggy Thorsen, co-owner of the Wisconsin gourmet coffeehouse, Uncommon Grounds, is in South Florida at an annual crime-writers' conference with her beau, local sheriff Jake Pavlik, who is due to speak as a 'forensics expert'. Maggy's pledge to behave solely as a tourist becomes trickier than she anticipated when the conference's opening night event turns out to be a re-enactment of Agatha Christie's classic, Murder on the Orient Express. As Maggy and Jake reluctantly set off on the night train to the Everglades to solve the 'crime', it's clear that, as in the original novel, nothing is quite what it seems. And amidst rumours of careers taken, manuscripts stolen and vows broken, it seems that in the Everglades - as in life - the predator all too often becomes the prey.

A stunningly original and timely collection that makes the case for “socialism, American style” It’s a strange day when a New York Times conservative columnist is forced to admit that the left is winning, but as David Brooks wrote recently, “the American left is on the cusp of a great victory.” Among Americans under thirty, 43 percent had a favorable view of socialism, while only 32 percent had a favorable view of capitalism. Not since the Great Depression have so many Americans questioned the fundamental tenets of capitalism and expressed openness to a socialist alternative. *We Own the Future: Democratic Socialism—American Style* offers a road map to making this alternative a reality, giving readers a practical vision of a future that is more democratic, egalitarian, inclusive, and environmentally sustainable. The book includes a crash course in the history and practice of democratic socialism, a vivid picture of what democratic socialism in America might look like in practice, and compelling proposals for how to get there from the age of Trump and beyond. With contributions from some of the nation’s leading political activists and analysts, *We Own the Future* articulates a clear and uncompromising view from the left—a perfectly timed book that will appeal to a wide audience hungry for change.

When I started a coffee company in April of 1988, my approach to espresso was formed from these two disciplines which can be summed up in a tidy little sound bite: scientific precision guided by artistry. First and always foremost: all information is geared to making an espresso that is characterized by a heavy red-brown syrup called crema. This crema features an intense coffee flavor that is free of bitterness. Ideally, espresso should always taste like the freshly ground coffee smells. Texture is featured always, and should feel like a pair of velvet pajamas wrapped around your tongue. - Introduction.

Timothy and Linda O'Leary Microsoft Office 2013: A Case Approach Making Office Relevant Timothy and Linda O'Leary and the Computer Information Technology Team at McGraw-Hill Higher Education offer your students a fully integrated learning program with time-tested quality and reliability. Office 2013: A Case Approach offers a running case study throughout the text to help students understand the material in a consistent, relevant environment. Through the theme "Making Office Relevant," this text helps students understand why they need this course and skills. Updated for Office 2013, student success is assured through clear step-by-step instruction, plentiful screen captures, and conceptual explanations. Each lab, designed to be covered in 1 hour of class time, combines conceptual coverage with detailed software-specific instructions. The labs opens with a running case study that highlights real-world applications of each software program and leads students from problem to solution. The O'Leary Series helps students learn specific applications skills along with skills that cross all Office

applications, which is especially important in mastering this version of Office. The O'Leary Series correlates with SIMnet Online, McGraw-Hill's online training and assessment program for Microsoft Office skills and basic computer concepts. Projects, however, are 1:1 within the SIMgrader component and allow students to practice their skills live in the Office application to receive immediate feedback via autograding. This integration with SIMnet helps meet the diverse needs of students and accommodate individual learning styles.
