## Mechanics of Fluids

This proven lab manual offers a unique blend of laboratory skills and exercises that effectively illustrate concepts from the main text, CHEMISTRY FOR TODAY: GENERAL, ORGANIC, AND BIOCHEMISTRY, 8th and 9th Editions. The book's 15 general chemistry and 20 organic/biochemistry safety-scale laboratory experiments use small quantities of chemicals and emphasize safety and proper disposal of materials. 'Safety-scale' is the authors' own term for describing the amount of chemicals each lab experiment requires -- less than macroscale quantities, which are expensive and hazardous, and more than microscale quantities, which are difficult to work with and require special equipment. "I'm not hanging noodles on your ears." In Moscow, this curious, engagingly colorful assertion is common parlance, but unless you're Russian your reaction is probably "Say what?" The same idea in English is equally odd: "I'm not pulling your leg." Both mean: Believe me. As author Jag Bhalla demonstrates, these amusing, often hilarious phrases provide a unique perspective on how different cultures perceive and describe the world. Organized by theme—food, love, romance, and many more—they embody cultural traditions and attitudes, capture linguistic nuance, and shed fascinating light on "the whole ball of wax." For example, when English-speakers are hard at work, we're "nose to the grindstone," but industrious Chinese toil "with liver and brains spilled on the ground" and busy Indians have "no time to die." If you're already fluent in 10 languages, you probably won't need this book, but you'll "get a kick out of it" anyhow; for the rest of us, it's a must. Either way, this surprising, often thought-provoking little tome is gift-friendly in appearance, a perfect impulse buy for word lovers, travelers, and anyone else who enjoys looking at life in a riotous, unusual way. And we're not hanging noodles from your ear.
