What Every Student Should Know about Avoiding Plagiarism

The field of color categorization has always been intrinsically multi- and interdisciplinary, since its beginnings in the nineteenth century. The main contribution of this book is to foster a new level of integration among different approaches to the anthropological study of color. The editors have put great effort into bringing together research from anthropology, linguistics, psychology, semiotics, and a variety of other fields, by promoting the exploration of the different but interacting and complementary ways in which these various perspectives model the domain of color experience. By so doing, they significantly promote the emergence of a coherent field of the anthropology of color. As of February 2018, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

Decolonizing Anthropology

Evidence amassed in *Troubled Times* indicates that, much like in the modern world, violence was not an uncommon aspect of prehistoric dispute resolution. From the civilizations of the American Southwest to the Mesolithic of Central Europe, the contributors examine violence in hunter-gatherer as well as state societies from both the New and Old Worlds. Drawing upon cross-cultural analyses, archaeological data, and skeletal remains, this collection of papers offers evidence of domestic violence, homicide, warfare, cannibalism, and ritualized combat among ancient peoples. Beyond the physical evidence, various models and explanations for violence in the past are explored.

Human Culture

In the Beginning

Explains a process of navigation that relies on natural phenomenon and describes techniques followed by ancient people involving the Sun, Moon, tides, currents, wind, and the horizon that can be used to determine direction and ensure arrival at a safe destination.

Human Culture

Decolonizing Anthropology is part of a broader effort that aims to advance the critical reconstruction of the discipline devoted to understanding humankind in all its diversity and commonality. The utility and power of a decolonized anthropology must continue to be tested and developed. May the results of ethnographic probes--the data, the social and cultural analysis, the theorizing, and the strategies for knowledge application--help scholars envision clearer paths to increased understanding, a heightened sense of intercultural and international solidarity, and last, but certainly not least, world transformation.

A History of Anthropology

Could "UFOs" and "Aliens" simply be us, but from the future? This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants, using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past. Dr. Michael P. Masters, a professor of biological anthropology specializing in human evolutionary anatomy, archaeology, and biomedicine, explores how the persistence of long-term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc-shaped craft, which are likely the very devices that allow our future progeny to venture backward across the landscape of

time. Moreover, these extraterrestrials are ubiquitously described as bipedal, large-brained, hairless, human-like beings, who communicate with us in our own languages, and who possess technology advanced beyond, but clearly built upon, our own. These accounts, coupled with a thorough understanding of the past and modern human condition, point to the continuation of established biological and cultural trends here on Earth, long into the distant human future.

Cultural Anthropology

A history of warfare from Paleolithic times to today draws on new discoveries to evaluate the key impact of war on civilian societies, recounting specific past events while citing historical developments in the areas of military strategy and technology.

Updated to pair with the new Third Edition of Ottenheimer's book, this notebook-sized workbook/reader offers classic and contemporary readings that illuminate and expand on the basic concepts introduced in the text, providing background information and insight. Exercises and guided student projects, ranging beginning to intermediate in skill level, are presented in workbook format, and pages are perforated so that can be torn out and handed in as assignment sheets. A series of exercises drawn from a single language is designed to show students the interconnectedness of different levels of analysis. Web exercise sections conclude with pointers to the Anthropology CourseMate website, where students will find glossary flashcards, interactive exercises, links to relevant additional websites, study questions, and key words to guide them. Instructors receive access to the online Instructor's Manual with detailed notes for incorporating the readings and exercises, as well as tips for assigning the guided student projects. Human Culture, Books a la Carte Edition

Discusses the biological reasons for various skin colors in man and the social and cultural impact of this phenomenon.

Simpson's Forensic Medicine, 14th Edition

This book engages with the issue of how culture is incorporated into individuals' lives, a question that has long plagued the social sciences. Starting with a critical overview of the treatment of culture and the individual in anthropology, the author makes the case for adopting a cognitive theory of culture in researching the relationship. The concept of cultural consonance is introduced as a solution and placed in theoretical context. Cultural consonance is defined as the degree to which individuals incorporate into their own beliefs and behaviors the prototypes for belief and behavior encoded in shared cultural models. Dressler examines how this can be measured and what it can reveal, focusing in particular on the field of health. Written in an accessible style by an experienced anthropologist, *Culture and the Individual* pulls together more than twenty-five years of research and offers valuable insights for students as well as academics in related fields.

Gender, Race, Class and Health

The posthumous publication in French of *Archeology of Violence* in 1980 gathered together Clastres's final groundbreaking essays and the opening chapters of the book he had begun before his death in 1977. Elaborating upon the conclusions of such earlier works as *Society Against the State*, Clastres turns around the analysis of power among South American Indians and rehabilitates violence as an affirmative act meant to protect the integrity of their societies and presents us with a generalology of power in a native state. For him, tribal societies are not Rousseauist in essence; to the contrary, they practice systematic violence in order to prevent the rise in their midst of this "cold monster": the state. Only by waging war with other tribes can they maintain the dispersion and autonomy of each group. In the same way, tribal chiefs are not all-powerful; to the contrary, they are rendered weak in order to remain dependent on the community. In a series of groundbreaking essays, Clastres turns around the analysis of power among South American Indians and rehabilitates violence as an affirmative act meant to protect the integrity of their societies. These "savages" are shrewd political minds who resist in advance any attempt at "globalization".

Introduction to Physical Anthropology 2011-2012 Edition

Exposing the religious roots of our ostensibly godless age, Michael Allen Gillespie reveals in this landmark study that modernity is much less secular than conventional wisdom suggests. Taking as his starting point the collapse of the medieval world, Gillespie argues that from the very beginning moderns sought not to eliminate religion but to support a new view of religion and its place in human life. He goes on to explore the ideas of such figures as William of Ockham,

Petrarch, Erasmus, Luther, Descartes, and Hobbes, showing that modernity is best understood as a series of attempts to formulate a new and coherent metaphysics or theology. "Bringing the history of political thought up to date and situating it against the backdrop of contemporary events, Gillespie's analyses provide us a way to begin to have conversations with the Islamic world about what is perhaps the central question within each of the three monotheistic religions: if God is omnipotent, then what is the place of human freedom?"

The Desert and the Blade

In his Novels of the Change, New York Times bestselling author S.M. Stirling presents "a devastated, mystical world that will appeal to fans of traditional fantasy as well as post-apocalyptic SF."* Continuing their quest that began in *The Golden Princess*, two future rulers of a world without technology risk their lives seeking a fabled blade... Reiko, Empress of Japan, has allied herself with Princess Órlaith, heir to the High Kingdom of Montival, to find the Kusanagi-no-Tsurugi, the Grass-Cutting Sword, a legendary treasure of an ancient dynasty that confers valor and victory to its bearer. Órlaith understands all too well the power it signifies. Her own inherited blade, the Sword of the Lady, was both a burden and a danger to her father, Rudi Mackenzie, as it failed to save the king from being assassinated. But the fabled sword lies deep with the Valley of Death, and the search will be far from easy. And war is building, in Montival and far beyond. As Órlaith and Reiko encounter danger and wonder, Órlaith's mother, Queen Matilda, believes her daughter's alliance and quest has endangered the entire realm. There are factions both within and without Montival whose loyalty died with the king, and whispers of

treachery and war grow ever louder. And the Malevolence that underlies the enemy will bend all its forces to destroy them. *Publishers Weekly (starred review) From the Hardcover edition.

Dancing Skeletons

This is the first book to cover the entire history of social and cultural anthropology in a single volume. Beginning with a summary of the discipline in the nineteenth century, exploring major figures such as Morgan and Tylor, it goes on to provide a comprehensive overview of the discipline in the twentieth century. The bulk of the book is devoted to themes and controversies characteristic of post First World War anthropology, from structural functionalism via structuralism to hermeneutics, cultural ecology, discourse analysis and, most recently, globalization and postmodernism. The authors emphasise throughout the need to see changes in the discipline in a wider social, political and intellectual context. This is a timely, concise history of a major discipline, in an engaging and thought-provoking narrative, that will appeal to students of anthropology worldwide.

The Color of Man

Today regarded as a classic, this description of life in polar cultures reflects traditional ethnography at its best and has been a favored account for thirty years. Balikci's important study of the Netsilingmiut, an isolated tribe of Arctic hunters living close to the Arctic Circle, examines their technology, social organization, and religion. The extended period of time that the author worked with the Netsilik Eskimo is reflected in the depth of his understanding of their past and present environments. His portrayal of their dependence on government services, along with modern technology, provides an accurate and necessary insight into the process of cultural change being experienced by cultures in many developing countries. The volume makes a superb accompaniment to the Netsilik documentary film series.

The Anthropology of Language: An Introduction to Linguistic Anthropology Workbook/Reader

One of the most widely used ethnographies published in the last twenty years, this Margaret Mead Award winner has been used as required reading at more than 600 colleges and universities. This personal account by a biocultural anthropologist illuminates not-soon-forgotten messages involving the sobering aspects of fieldwork among malnourished children in West Africa. With nutritional anthropology at its core, Dancing Skeletons presents informal, engaging, and oftentimes dramatic stories that relate the author's experiences conducting research on infant feeding and health in Mali. Through fascinating vignettes and honest, vivid descriptions, Dettwyler explores such diverse topics as ethnocentrism, culture shock, population control, breastfeeding, child care, the

meaning of disability and child death in different cultures, female circumcision, women's roles in patrilineal societies, the dangers of fieldwork, and facing emotionally draining realities. Readers will laugh and cry as they meet the author's friends and informants, follow her through a series of encounters with both peri-urban and rural Bambara culture, and struggle with her as she attempts to reconcile her very different roles as objective ethnographer, subjective friend, and mother in the field. The 20th Anniversary Edition includes a 13-page "Q&A with the Author" in which Dettwyler responds to typical questions she has received individually from students who have been assigned *Dancing Skeletons* as well as audience questions at lectures on various campuses. The new 23-page "Update on Mali, 2013" chapter is a factual update about economic and health conditions in Mali as well as a brief summary of the recent political unrest.
