Case study research has a long history within the natural sciences, social sciences, and humanities, dating back to the early 1920's. At first it was a useful way for researchers to make valid inferences from events outside the laboratory in ways consistent with the rigorous practices of investigation inside the lab. Over time, case study approaches garnered interest in multiple disciplines as scholars studied phenomena in context. Despite widespread use, case study research has received little attention among the literature on research strategies. The Encyclopedia of Case Study Research provides a compendium on the important methodological issues in conducting case study research and explores both the strengths and weaknesses of different paradigmatic approaches. These two volumes focus on the distinctive characteristics of case study research and its place within and alongside other research methodologies. Key Features Presents a definition of case study research that can be used in different fields of study Describes case study as a research strategy rather than as a single tool for decision making and inquiry Guides rather than dictates, readers' understanding and applications of case study research Includes a critical summary in each entry, which raises additional matters for reflection Makes case study relevant to researchers at various stages of their careers, across philosophic divides, and throughout diverse disciplines Key Themes Academic Disciplines Case Study Research Design Conceptual Issues Data Analysis Data Collection Methodological Approaches Theoretical Traditions Theory Development and Contributions From Case Study Research Types of Case Study Research

Cultural tourism is nowadays considered the fastest growing market in tourism. The research was obtained to gain further insight about cultural tourists. The study explored cultural tourists in Portugal through investigating the profile, motivation and level of interest of cultural tourists, in the specific case of Silves. Silves is a small town in the Algarve region, and as the former Capital of the Algarve in the period when the Arabs were ruling, the town is left with Arabic Heritage. A combination of primary and secondary research has been applied in order to examine the topic, achieve the objectives and test the hypotheses. For the primary research, a survey was carried out at the site of Silves in Portugal, whereby altogether 196 valid surveys were obtained.

Asking Good Questions moves beyond a traditional discussion of ethical theory, focusing on how educators can use these important frameworks to facilitate critical thinking about real-life ethical dilemmas. In this way, authors Nancy Stanlick and Michael Strawser offer students a theoretical tool kit for creatively addressing issues that influence their own environments. This text begins with a discussion of key ethical theorists and then guides the reader through a series of original case studies and follow-up activities that facilitate critical thinking, emphasize asking

thought provoking questions, and teach the student to address the complexity of ethical dilemmas while incorporating the viewpoints of their peers. Additionally, Stanlick and Strawser include an extensive preface, a mind-mapping technique for analyzing and formulating arguments, and a six step process for approaching complex real-life moral issues. Each chapter incorporates suggested assignments, discussion questions, and references for further reading, and a guide for instructors offering a sample course schedule and suggestions on how to use this book effectively is also available. This text is designed to help educators engage students in a meaningful discussion of how historical theories apply to their own lives, providing rich and unique resources to learn about these critical issues.

Business Ethics: New Challenges in a Globalized World provides a comprehensive account of the challenges facing businesses as they pursue global business activities. The importance of business ethics as an academic subject and business priority has increased significantly, as companies have increasingly been placed in the moral spotlight by shareholders, consumers, employees and governments. The growing complexities of the global economy demand a broader and a deeper view of business ethics than that offered by current management approaches that focus on reforming corporate behaviour. This book places business ethics in a richer contextual setting, focusing on the challenges that business must now confront, such as inequality, financial risk, migrant labour, climate change and human rights, and exploring how these challenges can be met by a rethinking of business models, goals and strategies. Key benefits:

- Up-to-date overview of ethical issues in an international business context
- Includes lively cases and examples from emerging economies which bring the subject to life
- Encourages critical thinking skills in students

Janet Morrison, now retired, was a senior lecturer in strategic and international management at Sunderland University Business School, UK 'Business Ethics: New Challenges in a Globalised World offers a practical look at the issues under consideration, and will contribute to a student gaining real insight and entering into critical dialogue on the topic of ethics in international business. Students using this text will be reminded of the fact that ethical issues are broader and deeper than we would like to think, and are encouraged to work out for themselves what they might do, or what they think others should do, in less than clear-cut situations.' – Andrea McLachlan, University of Waikato, New Zealand 'This book discusses the legal, social, political and international issues that set the context for some of the great ethical challenges we face in the world today. The integration of real life case studies and ethical theory provides practical application that will enable students to gain a much broader understanding of the issues involved.' - Carole Parkes, Aston University, UK 'Introducing a topic as complex and as widely discussed as business ethics is a very difficult task. However, Morrison succeeds in presenting a concise and well-written account of the field and its current issues. The book is a particularly good read for undergraduate students who want to be introduced to the field of business ethics.' – Berend van der Kolk, University of Groningen, The Netherlands 'This is an expertly written textbook. I am impressed by the international outlook of the book, the clear writing style and the excellent contemporary cases and examples' Marianna Fotaki, Warwick Business School, UK

Housed on the campus of the University of Michigan in Ann Arbor, the University Musical Society is one of the oldest performing arts presenters in the country. A past recipient of the National Medal of Arts, the nation's highest public artistic honor, UMS connects audiences with wide-ranging performances in music, dance,

and theater each season. Between 1987 and 2017, UMS was led by Ken Fischer, who over three decades pursued an ambitious campaign to expand and diversify the organization's programming and audiences—initiatives inspired by Fischer's overarching philosophy toward promoting the arts, "Everybody In, Nobody Out." The approach not only deepened UMS's engagement with the university and southeast Michigan communities, it led to exemplary partnerships with distinguished artists across the world. Under Fischer's leadership, UMS hosted numerous breakthrough performances, including the Vienna Philharmonic's final tour with Leonard Bernstein, appearances by then relatively unknown opera singer Cecilia Bartoli, a multiyear partnership with the Royal Shakespeare Company, and artists as diverse as Yo-Yo Ma, Jawole Willa Jo Zollar, Elizabeth Streb, and Nusrat Fateh Ali Khan. Though peppered with colorful anecdotes of how these successes came to be, this book is neither a history of UMS nor a memoir of Fischer's significant accomplishments with the organization. Rather it is a reflection on the power of the performing arts to engage and enrich communities—not by handing down cultural enrichment from on high, but by meeting communities where they live and helping them preserve cultural heritage, incubate talent, and find ways to make community voices heard.
