## Mouse or Rat?

Now a major motion picture nominated for nine Academy Awards. Narrative of

Solomon Northup, a Citizen of New-York, Kidnapped in Washington City in 1841, and Rescued in 1853. Twelve Years a Slave by Solomon Northup is a memoir of a black man who was born free in New York state but kidnapped, sold into slavery and kept in bondage for 12 years in Louisiana before the American Civil War. He provided details of slave markets in Washington, DC, as well as describing at length cotton cultivation on major plantations in Louisiana.

### **Cold Reading and how to be Good at it**

This volume presents the basic issues and up-to-date research findings in the area of genius, giftedness and creative behaviour. It gives an appreciation of the potential that exists among talented children and adults and how this can be transformed into highly significant and personally satisfying achievements. It also shows that such achievement involves great personal effort but can be facilitated by human relationships, institutional interventions, and historical conditions which present parents, educators and society with opportunities for maximizing the development of genius, giftedness, and creativity.

### **Twelve Years a Slave**

Recently Anna Julia Cooper has emerged as the most important classic writer in the

tradition of African American feminist thought. Mary Helen Washington described Cooper's work as "the most precise, forceful, well-argued statement of black feminist thought to come out of the nineteenth century." This is the first collection of all of Cooper's major writings, including many never before published. It includes all of the essays from her famous book, *A Voice from the South*, in addition to many other essays and letters accessible only in archives until now. The organization of this important new collection lends itself to a clearer understanding of the major themes and contributions of Cooper's thought, her development as a thinker and writer, and the critiques and controversies surrounding her work. Lemert and Bhan introduce Cooper as an activist, settlement founder, school teacher, college president, linguist, and scholar—a life that paralleled the prodigious accomplishments of W.E.B. Du Bois in so many ways.

### **Drug Misuse at Work**

The essays in this volume explore the borderland between ecology and the arts. Nature is here read by a number of contributors as 'cultural', by others as an 'independent domain', or even as a powerful process of exchange 'between the human and the other-than-human'. The four parts of the volume reflect these different understandings of nature and performance. Informed by psychoanalysis and cultural materialism, contributors to the first part, 'Spectacle: Landscape and Subjectivity', look at ways in which particular social and scientific experiments,

theatre and film productions and photography either reinforce or contest our ideas about nature and human-human or human-animal relations and identities. The second part, 'World: Hermeneutic Language and Social Ecology', investigates political protest, social practice art, acoustic ecology, dance theatre, family therapy and ritual in terms of social philosophy. Contributors to the third part, 'Environment: Immersiveness and Interactivity', explore architecture and sculpture, site-specific and mediatised dance and paratheatre through radical theories of urban and virtual space and time, or else phenomenological philosophy. The final part, 'Void: Death, Life and the Sublime', indicates the possibilities in dance, architecture and animal behaviour of a shift to an existential ontology in which nature has 'the capacity to perform itself'.

First Time in Print Updated and expanded To win a role in a movie or on network or cable TV, you must make a strong first impression in your brief, crucial audition—and the first person you have to impress is the casting director. In How

to Audition On Camera, Casting Director Sharon Bialy answers the twenty-five questions actors ask most frequently about how to nail an audition. What is the casting director looking for? If you mess up, can you start over? What is the most common mistake experienced actors make? Should you audition off book or can you look at the page? Should you dress in character? How much can you improvise? Actors—both novice and professional—are often misled by myths and outdated prescriptions. This guide replaces such misinformation with concise and accurate advice from someone who is in the room helping to make the decision on who gets the job. Bialy gets readers started immediately on the road to screen acting success.

"This sobering description of many computer-related failures throughout our world deflates the hype and hubris of the industry. Peter Neumann analyzes the failure modes, recommends sequences for prevention and ends his unique book with some broadening reflections on the future." —Ralph Nader, Consumer Advocate

This book is much more than a collection of computer mishaps; it is a serious, technically oriented book written by one of the world's leading experts on computer risks. The book summarizes many real events involving computer technologies and the people who depend on those technologies, with widely ranging causes and effects. It considers problems attributable to hardware, software, people, and natural causes. Examples include disasters (such as the Black Hawk helicopter and Iranian Airbus shootdowns, the Exxon Valdez, and various transportation accidents); malicious hacker attacks; outages of telephone systems and computer networks; financial losses; and many other strange happenstances (squirrels downing power grids, and April Fool's Day pranks). Computer-Related Risks addresses problems involving reliability, safety, security, privacy, and human well-being. It includes analyses of why these cases happened and discussions of what might be done to avoid recurrences of similar events. It is readable by technologists as well as by people merely interested in the uses and limits of technology. It is must reading for anyone with even a remote involvement with computers and communications—which today means almost everyone. Computer-Related Risks: Presents comprehensive coverage of many different types of risks Provides an essential system-oriented perspective Shows how

technology can affect your life—whether you like it or not!

### **The Widow Waltz**

“This heartfelt, witty addition to women’s fiction will appeal to fans of Elizabeth Berg and Anna Quindlen.” (Booklist) Georgia Waltz has things many people only dream of: a plush Manhattan apartment overlooking Central Park, a Hamptons beach house, valuable jewels and art, two bright daughters, and a husband she adores, even after decades of marriage. It’s only when Ben suddenly drops dead from a massive coronary while training for the New York City Marathon that Georgia discovers her husband—a successful lawyer—has left them nearly penniless. Their wonderland was built on lies. As the family attorney scours emptied bank accounts, Georgia must not only look for a way to support her family, she needs to face the revelation that Ben was not the perfect husband he appeared to be, just as her daughters—now ensconced back at home with secrets of their own—have to accept that they may not be returning to their lives in Paris and at Stanford subsidized by the Bank of Mom and Dad. As she uncovers hidden resilience, Georgia’s sudden midlife shift forces her to consider who she is and what she truly values. That Georgia may also find new love in the land of Spanx and stretch marks surprises everyone—most of all, her. Sally Koslow’s fourth novel is deftly told through the alternating viewpoints of her remarkable female protagonists as they plumb for the grit required to reinvent their lives. Inspiring,

funny, and deeply satisfying, *The Widow Waltz* explores in a profound way the bonds between mothers and daughters, belligerent siblings, skittish lovers, and bitter rivals as they discover the power of forgiveness, and healing, all while asking, "What is family, really?"

A masterpiece ahead of its time, a prescient rendering of a dark future, and the inspiration for the blockbuster film Blade Runner By 2021, the World War has killed millions, driving entire species into extinction and sending mankind off-planet. Those who remain covet any living creature, and for people who can't afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep. They've even built humans. Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial humans can wreak, the government bans them from Earth. Driven into hiding, unauthorized androids live among human beings, undetected. Rick Deckard, an officially sanctioned bounty hunter, is commissioned to find rogue androids and "retire" them. But when cornered, androids fight back—with lethal force. Praise for Philip K. Dick "The most consistently brilliant science fiction writer in the

world.”—John Brunner “A kind of pulp-fiction Kafka, a prophet.”—The New York Times “[Philip K. Dick] sees all the sparkling—and terrifying—possibilities . . . that other authors shy away from.”—Rolling Stone

Almost unknown to the rest of the globe, Xiaomi has become the world's third-largest mobile phone manufacturer. Its high-end phones are tailored to Chinese and emerging markets, where it outsells even Samsung. Since the 1990s China has been climbing up the ladder of quality, from doing knockoffs to designing its own high-end goods. Xiaomi its name literally means "little rice" is landing squarely in this shift in China's economy. But the remarkable rise of Xiaomi from startup to colossus is more than a business story, because mobile phones are special. The common desiderata of the global population, mobile phones offer the kind of freedom and connectedness that autocratic countries are terrified of. China's fortune and future clearly lie with "opening up" to the global market, requiring it to allow local entrepreneurs to experiment. Clay Shirky, one of the most influential and original thinkers on how technological innovation affects social change around the world, now turns his attention to the most populous country of them all. The case of Xiaomi exemplifies the balancing act that China has to perfect to navigate between cheap copies and innovation, between the demands of local and global markets, and between freedom and control.

## **The Eleventh Day**

This cookbook was written for all the dogs who rely on their master for all their needs and ask nothing in return. Good nutrition is as important to your dog as it is to you. Cancer is the leading cause of death in dogs and cats today, so the food they ingest is paramount to their health, as well as exercise and annual visits to the veterinarian. This cookbook was written to have fun in the kitchen cooking delicious recipes that your dog will love. He will probably join you in the kitchen when he starts to know that the aroma of good food is for him. P.J.'s Bichon Frise lived to be 22 years old and spunky to the end of her life. P.J. attributes her Bichon Frise's excellent health to the meals she cooked for her, long before the pet food recall scare. You have control of all the ingredients your dog eats. If your dog had to cook for you, don't you think it would give you the best possible food to keep you healthy and living longer? You bet they would. Do you feed your dog the same thing, day after day, week after week? Yuk. This cookbook will get you out of this rut and you will see a happier and healthier dog if you start cooking these easy and fun recipes. The book is also filled with fun facts, dog jokes, dog sayings, astrology, dog breeds, and trivia to make this cookbook a must for you to have. A portion of the proceeds of this book will be donated to the Cancer Society for Animals.

It is a multidisciplinary area that encompasses a number of fields, including law, computer science, finance, networking, data mining, and criminal justice. The 24 papers in this volume cover a variety of topics ranging from tactics of cyber crime investigations to digital forensic education, network forensics, and the use of formal methods in digital investigations. There is a large section addressing forensics of mobile digital devices.

## **Deus Lo Volt!**

This edited book examines European external interventions in human security, in order to illustrate the evolution and nature of the European Union as a global political actor. In 2003, the EU deployed its first external mission under the European Security and Defence Policy (ESDP) with a military force to the former Yugoslav Republic of Macedonia. Since then it has instigated over 18 civilian and military missions to deal with humanitarian crises all over the world. This book presents a series of eight case studies of external interventions by the EU covering the Balkans, Africa, the Middle East, Afghanistan and Indonesia, to illustrate the nature of the EU as a global actor. Using the concept of human security to assess the effectiveness of these missions in meeting the EU's aim of being a 'force for good in the world', this study addresses two key issues: the need for an empirical assessment of EU foreign and security policies based on EU intervention in conflict and post-conflict situations and the idea of 'human security' and how this is applied in European foreign policy. This book will be of great interest to students of European Security, EU politics, human security, post-conflict reconstruction, and IR in general. "Anthony Summers and Robbyn Swan have written the definitive account of 9/11. The shockwaves of the September 11, 2001 attacks in America reverberate to this day. Though Osama Bin Laden has been killed, questions remain. What exactly happened? Could 9/11 have been prevented? How and why did so much acrimony and misinformation arise from the ashes of the World Trade Center, the Pentagon and a quiet field in Pennsylvania? And what has yet to be revealed? The Eleventh Day, written with access to thousands of recently released official documents, is updated for this edition and reports on a development which the former chairman of Congress' 9/11 probe describes as the most important in years ."

This book is necessary because cold reading is the process by which most professional acting jobs are filled, and it is in every actor's best interest to know as much as they can about it. To succeed in the business of acting, most actors will need to master a cold reading technique so that it becomes reliable and natural. Some actors will develop an effective technique of their own. Many will not. For the actor who is not comfortable with the cold reading process, there are only two options: get lucky, or get help.

"The year is 1095. The most prominent leaders of the Christian world have assembled in a meadow in France near Clermont. Pope Urban appeals for the liberation of Jerusalem and cries out Deus Lo Volt! God Wills It! The cry is taken up, echoes forth and is carried on. Wave upon wave of Christian pilgrims rush to assault the growing power of Muslims in the Holy Land and will do so for the next two hundred years. Most able men become soldiers of the Cross, and when a man is prevented by old age or ill health, he sends his son. Women, too, go to fight alongside the men. It is a time of great adventure, of great exploration and cultural change. Uniting Christian Europe in a common cause, the crusades defined forever the spirit of the West.

From the world-famous author of THE NAME OF THE ROSE, an illuminating and humorous study on the pleasures and pitfalls of translation. 'Translation is always a shift, not between two languages but between two cultures. A translator must take

into account rules that are not strictly linguistic but, broadly speaking, cultural.' Umberto Eco is of the world's most brilliant and entertaining writers on literature and language. In this accessible and dazzling study, he turns his eye on the subject of translations and the problems the differences between cultures can cause. The book is full of little gems about mistranslations and misunderstandings. For example when you put 'Studies in the logic of Charles Sanders Peirce' through an internet translation machine, it becomes 'Studies in the logic of the Charles of sandpaper grinding machines Peirce'. In Italian 'ratto' has no connotation of 'contemptible person' but denotes speed ('you dirty rat' could take on a whole new meaning!) What could be a weighty subject is never dull, fired by Eco's immense wit and erudition, providing an entertaining read that illuminates the process of negotiation that all translators must make.

"Science in the developing world has experienced historic change over the past 30 years. Nations that lacked resources for even basic science have since developed world-class research centres. Men and women who previously had no chance of pursuing scientific careers in their own countries now thrive in home-grown universities and laboratories dedicated to scientific excellence. The World Academy of Sciences (TWAS) has been front and centre during this remarkable transformation. A Voice for Science in the South tells the story of TWAS through the eyes of 11 eminent scientists associated with the Academy. They speak of the organization's challenges and triumphs, and describe what TWAS has meant for their careers and the careers of thousands of scientists in the developing world. They also explore the challenges that lie ahead for TWAS and, more generally, for science in the South. It is a story of unprecedented global change and an account of what must be done to ensure that all nations can share in the benefits that emerge when science is woven into the fabric of society."--
