Business Studies - Class 11 by Poonam Gandhi (2020-21)

Infrastructure is a priority around the world for all stakeholders. Infrastructure projects can continue for several years, from planning and construction to the provision of services. As development in Asia and the Pacific accelerates, governments must invest more in infrastructure to ensure continued economic growth. This book draws on lessons and case studies from Japan and worldwide, covering broad and long-term infrastructure projects. It describes the principles of developing quality infrastructure and focuses on the various steps of a project--from design, planning, and construction to operation and management. It also discusses overseas development assistance, taking examples from Asian Development Bank and World Bank projects. This book is an important reference tool for policy makers in Asia who are planning and implementing

large-scale public infrastructure.

The Surprising Science of Meetings

Schools and Health is a readable and well-organized book on comprehensive school health programs (CSHPs) for children in grades K-12. The book explores the needs of today's students and how those needs can be met through CSHP design and development. The committee provides broad recommendations for CSHPs, with suggestions and guidelines for national, state, and local actions. The volume examines how communities can become involved, explores models for CSHPs, and identifies elements of successful programs. Topics include: The history of and precedents for health programs in schools. The state of the art in physical education, health education, health services, mental health and pupil services, and nutrition and food services. Policies, finances, and other elements of CSHP infrastructure. Research and evaluation challenges. Schools and Health will be important to policymakers in health and education, school administrators, school physicians and nurses, health educators, social scientists, child advocates, teachers, and parents.

The highly anticipated complement to the New York Times bestselling Momofuku cookbook, Momofuku Milk Bar reveals the recipes for the innovative, addictive cookies, pies, cakes, ice creams, and more from the wildly popular Milk Bar bakery. Momofuku Milk Bar shares the recipes for Christina Tosi's fantastic desserts—the now-legendary riffs on childhood flavors and down-home classics (all essentially derived from ten mother recipes)—along with the compelling narrative of the unlikely beginnings of this quirky bakery's success. It all started one day when Momofuku founder David Chang asked Christina to make a dessert for dinner that night. Just like that, the pastry program at Momofuku began. Christina's playful desserts, including the compost cookie, a chunky chocolate-chip cookie studded with crunchy salty pretzels and coffee grounds; the crack pie, a sugary-buttery confection as craveable as the name implies; the cereal milk ice cream, made from everyone's favorite part of a nutritious breakfast—the milk at the bottom of a bowl of cereal; and the easy layer cakes that forgo fancy frosting in favor of unfinished edges that hint at the yumminess inside helped the restaurants earn praise from the New York Times and the Michelin Guide and led to the opening of Milk Bar, which now draws fans from around the country and the world. With all the recipes for the bakery's most beloved desserts—along with ones for savory baked goods that take a page from Chang's Asian-flavored cuisine, such as Kimchi Croissants with Blue Cheese—and 100 color photographs, Momofuku Milk Bar makes baking irresistible off-beat treats at home both foolproof and fun.

Lakhmir Singh's Science is a series of books which conforms to the NCERT syllabus. The main aim of writing this series is to help students understand difficult scientific concepts in a simple manner in easy language. The ebook version does not contain CD.

Large-scale, Component-based Development

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Export-import Theory, Practices, and Procedures

The societies of the twenty-first century are subject to social, cultural, political, and economic changes. In this context, the school is asked to educate the future citizens in the present. To respond to this kaleidoscopic reality, the school is immersed in a pedagogical revolution. In this book, the reader will find a selection of avant-garde research works from different disciplines and contexts, which have their epicenter in the school and in the faculties of education. New issues in pedagogy and education, and new roles of teachers and students, are discussed in a global and diverse context. And new methodological and formative proposals are also proposed to build the ideal school and the ideal teacher, from the initial and continuous teacher training.

The team behind How Google Works returns with management lessons from legendary coach and business executive, Bill Campbell, whose mentoring of some of our most successful modern entrepreneurs has helped create well over a trillion dollars in market value. Bill Campbell played an instrumental role in the growth of several prominent companies, such as Google, Apple, and Intuit, fostering deep relationships with Silicon Valley visionaries, including Steve Jobs, Larry Page, and Eric Schmidt. In addition, this business genius mentored dozens of other important leaders on both coasts, from entrepreneurs to venture capitalists to educators to football players, leaving behind a legacy of growing companies, successful people, respect, friendship, and love after his death in 2016. Leaders at Google for over a decade, Eric Schmidt, Jonathan Rosenberg, and Alan Eagle experienced firsthand how the man fondly known as Coach Bill built trusting relationships, fostered personal growth—even in those at the pinnacle of their careers—inspired courage, and identified and resolved simmering tensions that inevitably arise in fast-moving environments. To honor their mentor and inspire and teach future generations, they have codified his wisdom in this essential guide. Based on interviews with over eighty people who knew and loved Bill Campbell, Trillion Dollar Coach explains the Coach's principles and illustrates them with stories from the many great people and companies with which he worked. The result is a blueprint for forward-thinking business leaders and managers that will help them create higher performing and faster moving cultures, teams, and companies.

Entrepreneurship has attracted global interest for its potential to catalyze economic and social development. Research suggesting that certain entrepreneurial mindsets and skills can be learned has given rise to the field of entrepreneurship education and training (EET). Despite the growth of EET, global knowledge about these programs and their impact remains thin. In response, this study surveys the available literature and program evaluations to propose a Conceptual Framework for understanding the EET program landscape. The study finds that EET today consists of a heterogeneous mix of programs that can be broken into two groups: entrepreneurship education and entrepreneurship training. These programs target a range of participants: secondary and post-secondary education students, as well as potential and practicing entrepreneurs. The outcomes measured by program evaluations are equally diverse but generally fall under the domains of entrepreneurial mindsets and capabilities, entrepreneurial status, and entrepreneurial performance. The dimensions of EET programs vary according to the particular target group. Programs targeting secondary education students focus on the development of foundational skills linked to entrepreneurship, while post-secondary education programs emphasize skills related to strategic business planning. Programs targeting potential entrepreneurs generally are embedded within broader support programs and tend to target vulnerable populations for whom employment alternatives may be limited. While programs serving practicing entrepreneurs focus on strengthening entrepreneurs knowledge, skills and business practices, which while unlikely to transform an enterprise in the near term, may accrue benefits to entrepreneurs over time. The study also offers implications for policy and program implementation, emphasizing the importance of clarity about target groups and desired outcomes when making program choices, and sound understanding of extent to which publicly-supported programs offer a broader public good, and compare favorably to policy alternatives for supporting the targeted individuals as well as the overall economic and social objectives.
