what it means to be loved by those around. Present new vocabulary words in a variety of ways to ensure students are excited to expand their literacy skills. Find the antonym for each word. Match words to their definitions, then identify their part of speech. Explore character motivations by stating why Gilly didn't tell Trotter who the visitor was. Explain the expression "demon possession" by writing a story based on this idea. Write a personal reflection on the poem found in the story. Conduct a class survey on things considered to be important in daily life. Aligned to your State Standards, additional crossword, word search, comprehension quiz and answer key are also included. About the Novel: A story about a bold and brazen eleven-year-old girl—and foster child—who has great expectations about life. Gilly runs away from her foster home looking for her real mother. Not finding her, she begins to adjust to life with the foster family. On Thanksgiving weekend, while Gilly is busy taking care of everyone with the flu, Gilly's grandmother shows up. She has come to take Gilly to live with her in Virginia. Gilly must move to a new home against her will. She realizes how she is loved at the foster house, and learns many valuable life lessons, relationships and prejudice.

pre-kindergarten through eighth grade. Closing the Literacy Gap addresses the demands of the No Child Left Behind legislation and provides a wide range of recommendations and a great number of practical suggestions for closing the literacy gap. This much-awaited text builds from an early emphasis on creating a vision statement to implementing effective techniques and assessing for instruction. Unlike other texts, Gunning provides a coherent plan for program implementation that has proven to successfully close the literacy gap. The recommendations provided within the text are specific and detailed and are built on basic principles.

procedures, and principles. The book also discusses technical and environmental factors that will influence how instructional professionals can apply the guidelines to their training projects. Praise for the First Edition "For years I've been looking for a book that links cognitive research on learning to graphics and instructional design. Here it is! Ruth Clark and Chopeta Lyons not only explain how to make graphics work—they've created a very interesting read, full of useful guidelines and examples." —Lynn Kearny, CPT, instructional designer and graphic communicator, *Graphic Tools for Thinking and Learning* "Finally! A book that integrates visual design into the larger context of instructional design and development." —Linda Lohr, Ed.D., author, *Creating Graphics for Learning* and assistant professor, University of Northern Colorado

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for

this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Fish is the uniquely illustrated narrative nonfiction account—for kids—of what is happening to the world’s oceans and what they can do about it. Written by Mark Kurlansky, author of *Cod*, *Salt*, *The Big Oyster*, and many other books, *World Without Fish* has been praised as “urgent” (*Publishers Weekly*) and “a wonderfully fast-paced and engaging primer on the key questions surrounding fish and the sea” (Paul Greenberg, author of *Four Fish*). It has also been included in the New York State Expeditionary Learning English Language Arts Curriculum. Written by a master storyteller, *World Without Fish* connects all the dots—biology, economics, evolution, politics, climate, history, culture, food, and nutrition—in a way that kids can really understand. It describes how the fish we most commonly eat, including tuna, salmon, cod, swordfish—even anchovies— could disappear within fifty years, and the domino effect it would have: the oceans teeming with jellyfish and turning pinkish orange from algal blooms, the seabirds disappearing, then reptiles, then mammals. It describes the back-and-forth dynamic of fishermen, who are the original environmentalists, and scientists, who not that long ago considered fish an endless resource. It explains why fish farming is not the answer—and why sustainable fishing is, and how to help return the oceans to their natural ecological balance. Interwoven with the book is a twelve-page graphic novel. Each beautifully illustrated chapter opener links to the next to form a larger fictional story that perfectly complements the text.

Travel to an imaginary land to discover the true power of friendship and the heartache of loss. Provide open-ended application and journal prompts to excite students about the reading. Make a prediction on what the story will be about based solely on the front cover of the novel. Put events in order that led to the creation of Terabithia. Find the meaning of vocabulary words, then use each word in a sentence. Students describe how they would respond to someone bullying them. Then, students create their own imaginary place like Terabithia. Keep track of events as they happen month by month in the novel with an Events Calendar graphic organizer. Aligned to your State Standards, additional crossword, word search, comprehension quiz and answer key are also included. About the Novel: A dramatic and fascinating story of friendship! Jesse Aarons is a fourth grader who loves to run. Once the fastest and best runner at Lark Creek Elementary School in Virginia, until he was challenged by a girl—Leslie Burke. Leslie and her parents were new to this community, and they soon became best friends; their relationship was a strong one. Then, Leslie gets a great idea to create Terabithia, a secret place in the woods only for themselves. One day, while Jesse is not there, Leslie

-With Confusing Science Terms, help students differentiate between confused word pairs or triples and perplexing science terminology in the areas of physical, life, earth, and space science. Students will be encouraged to use a science vocabulary journal to construct their own meaning, write a sentence, and create visual representation for each confusing term. They will increase their knowledge and understanding of science concepts through vocabulary building while at the same time improving science literacy. Differentiated instruction is also promoted through decoding activities, as well as alternative methods of instruction such as hands-on and small group activities, games, and journaling. It also supports NSE standards. ---Mark Twain Media Publishing Company specializes in providing captivating, supplemental books and decorative resources to complement middle- and upper-grade classrooms.
