Story-Based Inquiry: A Manual for Investigative Journalists

This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression.

While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by

showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.

A Quarter Century of Pension Reform in Latin America and the Caribbean

For the first time in the republican history of Peru, the presidential transition takes place in democracy, social peace, fast economic growth and favorable world markets. In other words, there has never been a better chance to build a different Peru - a richer country, more equal and governable. There are multiple ways to achieve that goal. New reforms must stem from a widespread and participatory debate, one of a common vision conceived for and by Peruvians. This book aims at making a technical and independent contribution to such debate; it summarizes the knowledge available about the challenges to be faced by the new administration. The study does not recommend silver bullets, but suggests policy options. It is based on the analysis of the current reality and in six decades of relationships with Peru, in which the Bank has implemented more than 100 projects and prepared more than 500 technical reports covering the wide range of development topics. When necessary, the study provides lessons that the Bank has learned elsewhere. The study provides a conceptual framework to the analysis of the country's 34 economic sectors and the two historical perspectives behind them. In doing so, it offers a comprehensive reform agenda that sheds light on possible priorities and courses of action.

Governing Extractive Industries

Brazil is in the middle of a profound socioeconomic transformation driven by demographic change. Because of profound changes in mortality and, especially, fertility over the past four decades the population at older ages then begun to increase, a trend that will become more and more rapid as time progresses. While it took more than a century for France's population, aged 65 and above, to increase from 7 to 14 percent of the total population, the same demographic change will occur in the next two decades in Brazil (between 2011 and 2031). The elderly population will more than triple within the next four decades, from less than 20 million in 2010 to approximately 65 million in 2050. On the one side, these shifts in population age structure will lead to substantial additional fiscal pressures on publicly financed health care and pensions, along with substantial reductions in fiscal pressures for publicly financed education. Public transfers in Brazil have been very effective in reducing poverty among the elderly in both urban and rural areas. However, without substantial changes, the aging of the population will put a strain on the current system that will result in some critical trade-offs with consequence for poverty among other vulnerable groups and for the growth prospects of the country. On the other side, given the strong association between people's economic behavior and the life cycle, changes in the population age structure have a major impact on economic development. This book investigates the impact of demographic changes on several dimensions of the Brazilian economy and society. It does so in a comprehensive and systematic way that captures the broad complexity of issues, from economic growth to poverty, from public financing of social services and transfers to savings, from employment to health and long-term care, and their interrelations.

Proactivity at Work

Multidimensional poverty measurement and analysis is evolving rapidly. Notably, it has informed the publication of the Multidimensional Poverty Index (MPI) estimates in the Human Development Reports of the United Nations Development Programme since 2010, and the release of national poverty measures in Mexico, Colombia, Bhutan, the Philippines and Chile. The academic response has been similarly swift, with related articles published in both theoretical and applied journals. The high and insistent demand for in-depth and precise accounts of multidimensional poverty measurement motivates this book, which is aimed at graduate students in quantitative social sciences, researchers of poverty measurement, and technical staff in governments and international agencies who create multidimensional poverty measures. The book is organized into four elements. The first introduces the framework for multidimensional measurement and provides a lucid overview of a range of multidimensional techniques and the problems each can address. The second part gives a synthetic introduction of 'counting' approaches to multidimensional poverty measurement and provides an in-depth account of the counting multidimensional poverty measurement methodology developed by Alkire and Foster, which is a straightforward extension of the well-known Foster-Greer-Thorbecke poverty measures that had a significant and lasting impact on income poverty measurement. The final two parts deal with the pre-estimation issues such as normative choices and distinctive empirical techniques used in measure design, and the post-estimation issues such as robustness tests, statistical inferences, comparisons over time, and assessments of inequality among the poor.

Spanish at Work

Far from creating a borderless world, contemporary globalization has generated a proliferation of borders. In *Border as Method*, Sandro Mezzadra and Brett Neilson chart this proliferation, investigating its implications for migratory movements, capitalist transformations, and political life. They explore the atmospheric violence that surrounds borderlands and border struggles across various geographical scales, illustrating their theoretical arguments with illuminating case studies drawn from Europe, Asia, the Pacific, the Americas, and elsewhere. Mezzadra and Neilson approach the border not only as a research object but also as an epistemic framework. Their use of the border as method enables new perspectives on the crisis and transformations of the nation-state, as well as powerful reassessments of political concepts such as citizenship and sovereignty.

OECD Reviews of Evaluation and Assessment in Education: Mexico 2012

This book argues that the digital revolution has fundamentally altered the way musicals are produced, followed, admired, marketed, reviewed, researched, taught, and even cast. In the first hundred years of its existence, commercial

musical theatre functioned on one basic model. However, with the advent of digital and network technologies, every musical theatre artist and professional has had to adjust to swift and unanticipated change. Due to the historically commercial nature of the musical theatre form, it offers a more potent test case to reveal the implications of this digital shift than other theatrical art forms. Rather than merely reflecting technological change, musical theatre scholarship and practice is at the forefront of the conversation about art in the digital age. This book is essential reading for musical theatre fans and scholars alike.

Mining and the Environment: Case studies from the Americas

As Time Goes By in Argentina

The process of demographic transition through which Argentina is passing is a window of both opportunities and challenges in economic and social terms. Argentina is still a young country in which the working-age population represents the largest proportion of its total population. Currently, the country just began a 30-year period with the most advantageous age structure of its population, which could favor greater economic growth. This situation, known as the 'demographic window of opportunity,' will last until the beginning of the 2040s. The dynamics of the fertility and mortality rates signify a gradual ageing of the population, with implications for various dimensions of the economy, the social protection system, public policies, and society in general. This book studies the opportunities and challenges that the demographic transition poses for the Argentine economy, its most important social sectors like the healthcare, education, and social protection systems, and the potential fiscal trade-offs that must be dealt with. The study shows that even though Argentina is moving through its demographic transition, it just recently began to enjoy the window of opportunity and this constitutes a great opportunity to achieve an accumulation of capital and future economic growth. Once the window of opportunity has passed, population ageing will have a significant impact on the level of expenditure, especially spending in the social protection system. This signifies a challenge from a fiscal policy point of view, because if long-term reforms are not undertaken to mediate these effects, the demographic transition will put pressure on the reallocation of fiscal resources among social sectors. Finally, population ageing poses concerns related to sustaining the rate of economic growth with a smaller working-age population. Taking advantage of the current window of opportunities, increasing savings that will finance the accumulation of capital, and increasing future labor force productivity in this way is a challenge for the Argentine economy.

Climate change is expected to modify the hydrological cycle and affect freshwater resources. Groundwater is a critical source of fresh drinking water for almost half of the world's population and it also supplies irrigated agriculture. Groundwater is also important in sustaining streams, lakes, wetlands, and associated ecosystems. But despite this,

As organizations grow increasingly complex and unpredictable, the topic of proactivity at work has become of great importance for contemporary workplaces. Proactivity drives performance and innovation of teams and organizations and boosts individuals' well-being and careers. When individuals are proactive, they use their initiative at work to bring about a better future. They scan for opportunities, persist until change is achieved, and take charge to prevent problems' future reoccurrence. In this book, leading scholars on proactivity from across North America, Europe, Asia, and Australia explore how, why, and when individuals are motivated to initiate change within their organizations or themselves and examine the consequences of various forms of proactivity at work. Individual chapters explore specific concepts of proactivity, such as proactive voice, job crafting, and career proactivity, as well as highlight individual processes and organizational dynamics that underlie successful proactivity at work. By providing insights on key advances and future directions for proactivity theory, research, and practice, *Proactivity at Work* synthesizes what we already know and identifies what we still need to learn about making things happen at work. This book is relevant to all those involved or interested in Work Psychology and Business, including Human Resource Management scholars.

This book presents a comprehensive treatment of the subject of evaluation as applied to literacy programs, covering evaluation theory, planning, and practice. Part I discusses questions of definition, context, objectives, and functions of evaluation and presents descriptions and analyses of evaluation paradigms and models. In Part II, the interrelated processes of evaluation planning and management are discussed, and evaluation planning and management approaches are explained and demonstrated. Parts III, IV, and V focus on the three components of the evaluation management approach discussed in Part II: management information systems (MIS), naturalistic evaluation (NE), and rationalistic evaluation (RE). Chapters in these parts cover: (1) theory, questions, and design of an MIS, NE, or RE; (2) writing a proposal for an MIS or for an evaluation study in the naturalistic or rationalistic mode; (3) tools and techniques of the three approaches; and (4) writing periodical and special reports. Part VI discusses the politics of evaluation, the need to establish evaluation standards for meta-evaluations, and the related question of evaluators' training. A glossary is appended. (YLB)

Growing Old in an Older Brazil

Over the past decade, there have been many international calls to strengthen and

support/sustain research capacity in lower- and middle-income countries (LMICs). This capacity is considered an essential foundation for cost-effective healthcare systems. While there have been long-standing investments by many countries and research funding organisations in the training of individuals for this purpose, in many LMICs research capacity remains fragmented, uneven and fragile. There is growing recognition that a more systems-oriented approach to research capacity-building is required. Nonetheless, there are considerable gaps in the evidence for approaches to capacity-building that are effective and sustainable. This book addresses these gaps, capturing what was learned from teams working on The Global Health Research Initiative. This book brings together the experiences of research capacity-building teams co-led by Canadians and LMIC researchers in several regions of the world, including China, Chile, Jamaica, Kenya, Mexico, Nigeria, South Africa and Uganda.

Promoting Social Dialogue in European Organizations

Judicial control of public power ensures a guarantee of the rule of law. This book addresses the scope and limits of judicial control at the national level, i.e. the control of public authorities, and at the supranational level, i.e. the control of States. It explores the risk of judicial review leading to judicial activism that can threaten the principle of the separation of powers or the legitimate exercise of state powers. It analyzes how national and supranational legal systems have embodied certain mechanisms, such as the principles of reasonableness, proportionality, deference and margin of appreciation, as well as the horizontal

effects of human rights that help to determine how far a judge can go. Taking a theoretical and comparative view, the book first examines the conceptual bases of the various control systems and then studies the models, structural elements, and functions of the control instruments in selected countries and regions. It uses country and regional reports as the basis for the comparison of the convergences and divergences of the implementation of control in certain countries of Europe, Latin America, and Africa. The book's theoretical reflections and comparative investigations provide answers to important questions, such as whether or not there are nascent universal principles concerning the control of public power, how strong the impact of particular legal traditions is, and to what extent international law concepts have had harmonizing and strengthening effects on internal public-power control.

Proposals for more effective natural resource governance emphasize the importance of institutions and governance, but say less about the political conditions under which institutional change occurs. *Governing Extractive Industries* synthesizes findings regarding the political drivers of institutional change in extractive industry governance. It analyses resource governance from the late nineteenth century to the present in Bolivia, Ghana, Peru, and Zambia, focusing on the ways in which resource governance and national political settlements interact. The authors focus on the ways in which resource governance and national political settlements interact, exploring the nature of elite politics, the emergence of new political actors, forms of political contention, changing ideas regarding natural resources and development, the geography of natural resource deposits, and the influence of the transnational political economy of global commodity production.

Beyond Small Change

This volume focuses on describing the social dialogue system in organizations from an Human Resources Management perspective. Based on the NEIRE model for industrial relations, key factors are determined contributing to creative social dialogue in European organizations. Actual data from surveys and interviews from more than 700 CEO and HR managers in eleven European countries give insights in the experiences with and expectations of employers of social dialogue. The volume offers a comprehensive introduction to the historical context and current situation in social dialogue in these countries. This context helps to understand the current major challenges in each country when it comes to a vital social dialogue. Using good practices from many organizations, this book offers an agenda for innovative and cooperative social dialogue in organizations.

Maslach Burnout Inventory

Recognized as the leading measure of burnout, the Maslach Burnout Inventory (MBI) is validated by the extensive research that has been conducted in the more than 25 years since its initial publication. The MBI Surveys address three general scales: --Emotional Exhaustion measures feelings of being emotionally overextended and exhausted by one's work. --Depersonalization measures an unfeeling and impersonal response toward recipients of one's service, care treatment, or instruction. --Personal Accomplishment measures feelings of competence and successful achievement in one's work.

African Geography for Schools

Discover why and how schools must become places where thinking is valued, visible, and actively promoted. As educators, parents, and citizens, we must settle for nothing less than environments that bring out the best in people, take learning to the next level, allow for great discoveries, and propel both the individual and the group forward into a lifetime of learning. This is something all teachers want and all students deserve. In *Creating Cultures of Thinking: The 8 Forces We Must Master to Truly Transform Our Schools*, Ron Ritchhart, author of *Making Thinking Visible*, explains how creating a culture of thinking is more important to learning than any particular curriculum and he outlines how any school or teacher can accomplish this by leveraging 8 cultural forces: expectations, language, time, modeling, opportunities, routines, interactions, and environment. With the techniques and rich classroom vignettes throughout this book, Ritchhart shows that creating a culture of thinking is not about just adhering to a particular set of practices or a general expectation that people should be involved in thinking. A culture of thinking produces the feelings, energy, and even joy that can propel learning forward and motivate us to do what at times can be hard and challenging mental work.

This open access book presents an innovative study of the rise of unmarried cohabitation in the Americas, from Canada to Argentina. Using an extensive sample of individual census data for nearly all countries on the continent, it offers a cross-national, comparative view of this recent demographic trend and its impact

on the family. The book offers a tour of the historical legacies and regional heterogeneity in unmarried cohabitation, covering: Canada, the United States, Mexico, Central America, Colombia, the Andean region, Brazil, and the Southern Cone. It also explores the diverse meanings of cohabitation from a cross-national perspective and examines the theoretical implications of recent developments on family change in the Americas. The book uses data from the Integrated Public Use Microdata Series, International (IPUMS), a project dedicated to collecting and distributing census data from around the world. This large sample size enables an empirical testing of one of the currently most powerful explanatory frameworks for changes in family formation around the world, the theory of the Second Demographic Transition. With its unique geographical scope, this book will provide researchers with a new understanding into the spectacular rise in premarital cohabitation in the Americas, which has become one of the most salient trends in partnership formation in the region.

The Oxford Handbook of the Welfare State is the authoritative and definitive guide to the contemporary welfare state. In a volume consisting of nearly fifty newly-written chapters, a broad range of the world's leading scholars offer a comprehensive account of everything one needs to know about the modern welfare state. The book is divided into eight sections. It opens with three chapters that evaluate the philosophical case for (and against) the welfare state. Surveys of the welfare state's history and of the approaches taken to its study are followed by four extended sections, running to some thirty-five chapters in all, which offer a comprehensive and in-depth survey of our current state of knowledge across the whole range of issues that the welfare state embraces. The first of these sections looks at inputs and actors (including the roles of parties, unions, and employers), the impact of gender and religion, patterns of migration and a changing public opinion, the role of international organisations and the impact of globalisation. The next two sections cover policy inputs (in areas such as pensions, health care, disability, care of the elderly, unemployment, and labour market activation) and their outcomes (in terms of inequality and poverty, macroeconomic performance, and retrenchment). The seventh section consists of seven chapters which survey welfare state experience around the globe (and not just within the OECD). Two final chapters consider questions about the global future of the welfare state. The individual chapters of the Handbook are written in an informed but accessible way by leading researchers in their respective fields giving the reader an excellent and truly up-to-date knowledge of the area under discussion. Taken together, they constitute a comprehensive compendium of all that is best in contemporary welfare state research and a unique guide to what is happening now in this most crucial and contested area of social and political development.

Does gender condition politicians' discourse strategies in parliament? This is the question we try to answer in *A Gender-based Approach to Parliamentary Discourse: The Andalusian Parliament*. This book, written by experts in the field of discourse analysis, covers key aspects of political discourse such as gender, identity and verbal and nonverbal strategies: intensification, enumerative series, non-literal quotations, pseudo-desemantisation, lexical colloquialisation, emotion, eye contact and time management. It provides a large number of examples from a balanced gender parliament, the Andalusian Parliament, and it focuses mainly on argumentation, since parliamentary discourse is above all argumentative. This book will prove invaluable to students and teachers in the field of discourse analysis, and more specifically of political discourse, and will also be very useful to politicians and anyone interested in communication strategies. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

Rule of Law, Human Rights and Judicial Control of Power

Over 40 years, Latin America has made giant strides in some of these social and political areas, yet lags behind in others. Life expectancy has increased by 13 years, illiteracy and fertility have been halved and democracy has taken hold throughout the region. However, Latin America continues to be plagued by violence and remains the most unequal region in the world in terms of income distribution. Unprecedented migration to sprawling and often inhospitable cities has exacerbated poverty for millions.
