Construction Accounting and Financial Management

Author of cult classics *The Pumpkin Plan* and *The Toilet Paper Entrepreneur* offers a simple, counterintuitive cash management solution that will help small businesses break out of the doom spiral and achieve instant profitability. Conventional accounting uses the logical (albeit, flawed) formula: $\text{Sales} - \text{Expenses} = \text{Profit}$. The problem is, businesses are run by humans, and humans aren't always logical. Serial entrepreneur Mike Michalowicz has developed a behavioral approach to accounting to flip the formula: $\text{Sales} - \text{Profit} = \text{Expenses}$. Just as the most effective weight loss strategy is to limit portions by using smaller plates, Michalowicz shows that by taking profit first and apportioning only what remains for expenses, entrepreneurs will transform their businesses from cash-eating monsters to profitable cash cows. Using Michalowicz's Profit First system, readers will learn that:

- Following 4 simple principles can simplify accounting and make it easier to manage a profitable business by looking at bank account balances.
- A small, profitable business can be worth much more than a large business surviving on its top line.
- Businesses that attain early and sustained profitability have a better shot at achieving long-term growth.

With dozens of case studies, practical, step-by-step advice, and his signature sense of humor, Michalowicz has the game-changing roadmap for any entrepreneur to make money they always dreamed of.

In this book, we are challenged to learn which parts of our lives are "Da Capo moments", truly worth repeating, and most importantly, to recognize the areas of our life we must change and choose not to repeat. Financial statements and information drawn from them confront us daily: in the media, in corporate annual reports, in the treasurer's reports for clubs or religious groups, in documents provided to employees and managers, as one considers alternative investments, in documents provided by homeowners' association and government agencies Various readers of a company's "financial score" make decisions based on financial information: the company's managers devise actions to improve operations; investors buy or sell the corporation's securities; creditors decide how much to lend; customers judge the reliability of this supplier; potential employees decide whether to invest their careers in the company. If you are training to be an accountant, find another book. This book's objective is to increase your ability to draw useful information from financial statements, and thus to make better decisions in both your personal life and your professional life. Studying this book should help you be a better manager. That is both its objective and its perspective. The book starts at square one; it assumes no prior knowledge on your part. To increase your financial literacy, you will learn the common nomenclature (but not esoteric jargon) used by accountants and financial experts. You will be equipped to ask insightful questions of experts, to engage them and your colleagues in thoughtful debates about financial and accounting issues, and to make better decisions.
