Focused on physical literacy and measurable outcomes, empowering physical educators to help students meet the Common Core standards, and coming from a recently renamed but longstanding organization intent on shaping a standard of excellence in physical education, National Standards & Grade-Level Outcomes for K-12 Physical Education is all that and much more. Created by SHAPE America — Society of Health and Physical Educators (formerly AAHPERD) — this text unveils the new National Standards for K-12 Physical Education. The standards and text have been retooled to support students' holistic development. This is the third iteration of the National Standards for K-12 Physical Education, and this latest version features two prominent changes:

- The term physical literacy underpins the standards. It encompasses the three domains of physical education (psychomotor, cognitive, and affective) and considers not only physical competence and knowledge but also attitudes, motivation, and the social and psychological skills needed for participation.
- Grade-level outcomes support the national physical education standards. These measurable outcomes are organized by level (elementary, middle, and high school) and by standard. They provide a bridge between the new standards and K-12 physical education curriculum development and make it easy for teachers to assess and track student progress across grades, resulting in physically literate students. In developing the grade-level outcomes, the authors focus on motor skill competency, student engagement and intrinsic motivation, instructional climate, gender differences, lifetime activity approach, and physical activity. All outcomes are written to align with the standards and with the intent of fostering lifelong physical activity. National Standards & Grade-Level Outcomes for K-12 Physical Education presents the standards and outcomes in ways that will help preservice teachers and current practitioners plan curricula, units, lessons, and tasks. The text also
- empowers physical educators to help students meet the Common Core standards;
- allows teachers to see the new standards and the scope and sequence for outcomes for all grade levels at a glance in a colorful, easy-to-read format; and
- provides administrators, parents, and policy makers with a framework for understanding what students should know and be able to do as a result of their physical education instruction. The result is a text that teachers can confidently use in creating and enhancing high-quality programs that prepare students to be physically literate and active their whole

lives.

CPO Focus on Physical Science

Physical Activity and Cardiovascular Health

Incorporate activities that energize and engage students in grade 1 using Fun, Fitness, and Learning! This 64-page book includes 55 large-group activities in which students use locomotor or nonlocomotor skills while activating their thinking skills. To reinforce what has been learned during the group activities, students complete half-page exercises for individualized skill practice. Lessons in this dynamic resource cover topics such as phonemic awareness, weather, writing mechanics, grammar, numbers, geometry and measurement, plants and animals, maps, citizenship, and fitness. The book supports NCTM and NCTE standards.

In 1995 leading exercise scientists and medical specialists convened in Bethesda, Maryland, under the sponsorship of the National Institutes of Health (NIH) to review the evidence of physical activity's influencing cardiovascular health. This reference presents the Consensus Statement from the 1995 Conference on Physical Activity and Cardiovascular Health and the supporting papers presented there. The 28

papers document -public health problems of sedentary lifestyles, -current data and opinions on the contributions of different types and amounts of physical activity to reducing cardiovascular disease, and -the role that exercise has in rehabilitating people with cardiovascular disease. This NIH conference report complements and augments the Surgeon General's Report on Physical Activity. Readers also will find successful approaches for implementing and maintaining physical activity programs for various populations, including older adults and people with disabilities.
