Contract Law: Cases and Materials presents a selection of well-chosen cases and illuminating commentary ideal for introducing students to the study of contract law in Australia. Developed to accompany Stewart, Swain and Fairweather's Contract Law: Principles and Context, this casebook maintains the accessibility of the principles text while providing the depth and analysis of topics required to learn contract law. Following the structure of the principles text, this text explores areas not traditionally covered in other casebooks, such as resolving disputes, preparing to make a contract, preliminary agreements, and interpreting contracts. Each chapter also briefly explores contracts in international contexts. Containing well-chosen, carefully curated cases and extracts, Contract Law: Cases and Materials takes a practical approach to student learning and integrates rich pedagogy to build critical thinking and analysis skills, making it an invaluable resource for contract law students.

This casebook, written by a lawyer who has taught the contracts course in a California law school for twenty years, provides a convenient way for a contracts instructor to integrate California law into a general contracts course curriculum. Comprehensive in its scope, this book can be used either as a stand-alone casebook or as a supplement to a principal casebook in a law school contracts course. It compares and contrasts the principles and rules of general contract law with the specific California statutes and case law in the field of contracts. The California appellate courts have long been a major influence on the field of substantive contract law, shaping the field of contracts beyond the state's borders. Primary sources of cases and statutes are tied together with concise, easy to understand explanations of the rules of contract law. Smith combines, in a single source, the leading California cases, specific California statutes, and sample legal forms, producing a valuable resource for practicing lawyers and paralegals as well as law students and paralegal students.

learning solution for law school students.

CasebookConnect offers you what you need most to be successful in your law school classes—portability, meaningful feedback, and greater efficiency. Cases, Problems, and Materials on Contracts is known for pioneering the problem method of law school teaching. A staple in classrooms for decades, it stands out from other texts in the scope of its coverage and its use of short, carefully-constructed Problems to expose students to new concepts, reinforce what they have just learned, and stimulate thought. The Eighth Edition, the first since the passing of Thomas Crandall and the addition of David Horton as co-author, is more accessible than ever. It introduces complicated issues with a clear narrative summary or explicit statement of black-letter law. The cases have been tightly edited for best effect. The book can also be easily adapted to fit various pedagogical needs.

Although it starts with “Agreement” and moves to “Consideration,” it is also designed for teachers who prefer to begin with “Consideration” or “Remedies.” It can be used in courses that both include and exclude sales. Finally, because it is shorter than most other texts in this field, it works in 4-unit, 5-unit, and 6-unit courses. New to the Eighth Edition: Substantial input from a new co-author means that the book contains scores of new cases, Problems, and narrative introductions to issues. Each opinion has been streamlined to enhance readability. Where possible, applicable Restatement of Contracts and Uniform Commercial Code sections have been printed in the text, saving students the cost of buying separate supplements. Professors and students will benefit from: Coverage of the basics of Contracts Law in a

format that allows greater exposure to the legal concepts through the many Problems that fill each chapter alongside the most illustrative cases on point. Assessment multiple-choice questions at the end of each chapter that are meatier than such questions in most books, focusing not on the “right answer” so much as on what real attorneys must consider when confronted with the issues presented. The entire book’s approach not just to teach rules of law but to train students to be lawyers faced with commercial issues. For example, Problems sometimes ask students whether they would be committing malpractice if they took a certain course of conduct, an issue very much on the mind of actual attorneys but seldom mentioned in law school classrooms. ### **Cases and Materials on Contracts**

Contracts: Cases and Doctrine, Sixth Edition, features a mix of lightly-edited classic and contemporary cases that stresses current contract doctrine along with the essential lawyering skill of case analysis—how to sift through the facts of the case to discern the prevailing rules and theory. Randy Barnett and Nate Oman’s innovative text introduces each case and provides the historical background of the iconic cases that make the study of contract law engaging. Study Guide questions help students identify salient issues as they read each case. Judicial biographies of each judge provides additional context. Key Features of the New Edition: The 6th Edition has been edited to make it even more modular and therefore easier for professors to select which doctrines to cover. The introductory materials have been shortened to permit a speedier entry to whichever basic doctrine the professor chooses to begin with. A new section on public policy defenses has been added. Recent developments involving arbitration agreements in the wake of the Supreme Court’s AT&T Mobility case are also covered. In addition, roughly a dozen new cases have been substituted, chosen for their interesting facts or their proven pedagogical usefulness. As always, every effort is made to provide students with

This casebook is designed to meet the challenges of providing students with the most current and comprehensive analysis of modern contract law within the time constraints of the modern law school curricula.
