Toxic Bedrooms

From the author of the bestselling *The Modern Girl's Guide to Life* comes a must-have book for the young mom, including best-kept secrets, practical advice, and multiple solutions for problems from birth to age four. Just when you thought you could cook (hey, one meal counts), clean (if the queen was coming), and seduce a man (well, long enough to get married), life throws you a curveball that makes all of your previous ineptitudes in life pale in comparison. With the appearance of one little extra line on a pregnancy test, you're thrown into a world of covering up leaks on shirts and taking a pacifier away from a two-year-old who has the grip of a pit bull. In this funny, smart, and honest book, Jane Buckingham cuts through the clutter to give you simple information and practical advice for navigating the different stages of motherhood. From how to get your child to sleep and how to wean, to how to get him off the pacifier and how to stop his tantrums, this book will help moms feel in the know and in control! Some of Buckingham's favorite tips: If your baby has a hard time feeding because of a stuffy nose, turn on the shower to steam up the bathroom and feed her there. Put your children's paints in an empty egg carton -- it's the perfect size, and there's no mess to clean up when you're done. Use an old raincoat with the arms cut off as a smock. You should buy a new car seat, rather than borrowing a friend's old car seat, as there are constant safety upgrades. Also, be sure you are the person registered to that car seat (send in that registration card!) so that you'll be notified in case of a recall. Keep the three-day rule in mind: Almost any bad habit can be broken in three days. Granted,

they may be tough, torturous days, but you can do it! The Modern Girl's Guide to Motherhood helps modern moms do it all with love, style, and flair!

Toys that Teach Your Child from Birth to Two

From a caretaker of newborns who's had years of hands-on experience with celebrity clients—a practical and reassuring guide to the first three months with your new baby. Are you a new or soon-to-be new mother? Are you caught between self-doubt and conflicting parenting advice coming at you from every direction? Are you unsure who to trust—your mother, sister, friends, or “the experts”? Luiza DeSouza is here to help. Her best advice? Take your time, trust your maternal instincts, and choose a course that fits your needs—and your baby's personality. For thirty years, Luiza has been helping new mothers navigate the skills, practices, and support it takes to start a family. For her, mothering is not about programs or techniques. Rather, it is about the connection between you and your new child. And for that reason, she believes that attitude is more important than approach. All mothers are different, but the three most important qualities remain the same for everyone: patience, openness, and attentiveness. Can being patient, open, and attentive guarantee that your baby will be a good sleeper or easy to feed? Of course not! But no matter what challenges your newborn brings, these three key qualities will help you rise to meet them. Like having your very own baby nurse right at your side, *Eat, Play, Sleep* is an indispensable guide to a good start and a happy, healthy first three months. —Learn the best methods for feeding your infant —Discover the secrets of “good sleepers” —Understand the importance of a predictable routine —How to use “play” to help establish a routine —Tips for introducing bathing and massage —How to deal with crying, especially if you have a

“difficult-to-calm” baby And much more!

Your bedroom should be a safe haven, but unfortunately more and more research is revealing that the bedroom may be one of the most toxic places in the home. Consider that the average conventional mattress contains more toxic chemicals than a 50 gallon oil drum, and that our skin, the largest organ of the body, is also the most porous entry point. It is no wonder that chemicals found in mattresses, known to cause toxic reproductive effects, are regularly being found at significant levels in human blood samples. Walter Bader outlines the dangers of the toxic threats lurking in the home so that, armed with knowledge, you can defend yourself and your family against them.

The Baby Gizmo Buying Guide

The single greatest lesson parents teach their kids isn't anything they say--it's what they do. And while most parents would say they want to raise compassionate kids, they might be surprised to discover just how little they're actually modeling the behaviors they hope to pass on--qualities such as unconditional love, gentleness, forgiveness, patience, gratitude, humility, and more. In this unique book, Sami Cone shows parents a new way to look at molding their children, one in which focusing on adding good behaviors and attitudes is more powerful than eliminating bad ones. Grounding her advice in Scripture--specifically the twelve characteristics found in Colossians 3:12-17--Cone offers plenty of stories from her own life to show these principles in action. And she offers practical things parents can do right now to create a home and family that exhibits love, harmony, and generosity of spirit in a self-centered world.
