## The Truth about Uri Geller

## Violence Risk Scale

The author of the 87th Precinct series presents the story that inspired The Blackboard Jungle and eleven other tales of tough, troubled kids on the city streets. Inside the concrete walls of Bernard High, brutal

young men scrap for survival, fighting with their wits, their knives, and their guns. Brawls are common in the hallways, and more than one student has been carried out on a stretcher this year. Now, Mr. Kemp is the next target. A mild-mannered teacher in far over his head, he's about to be thrust into the middle of a string of muggings happening right inside the school. It's a jungle in there, and Kemp is at the bottom of the food chain. A tale of animal justice in a school ruled by the power of the switchblade, "The Jungle Kids" is an incredible story. Along with "To Break the Wall," it served as the inspiration for The Blackboard Jungle, the novel about a cutthroat inner-city school that was adapted for the screen and made Ed McBain a household name. With twelve stories of crime, violence, drugs, and gangs, most of which were originally published in the legendary pulp magazine Manhunt, this collection showcases city life through the eyes of disaffected teenagers. What could be more terrifying?

### **Yearbook of International Organizations**

Over 13 months in 1976-1977, four children were abducted in the Detroit suburbs, each of them held for days before their still-warm bodies were dumped in the snow near public roadsides. The Oakland County Child Murders spawned panic across southeast Michigan, triggering the most extensive manhunt in U.S. history. Yet after less than two years, the task force created to find the killer was shut down without naming a suspect. The case "went cold" for more than 30 years, until a chance discovery by one victim's family pointed to the son of a wealthy General Motors executive: Christopher Brian Busch, a convicted pedophile, was freed weeks before the fourth child disappeared. Veteran Detroit News reporter Marney Rich Keenan takes the reader inside the investigation of the still-unsolved murders--seen through the eyes of the lead detective in the case and the family who cracked it open--revealing evidence of a decades-long coverup of malfeasance and obstruction that denied justice for the victims.

In modern day England, Professor Felix Guichard is called in to identify occult symbols found on the corpse of a young girl. His investigation brings him in contact with a mysterious woman, Jackdaw Hammond, who guards a monumental secret--She's Dead. Or she would be, were it not for magic which has artificially extended her life. But someone else knows her secret. Someone very old and very powerful, who won't rest until they've taken the magic that keeps her alive. In Krakow in 1585, Dr John Dee, the Elizabethan Alchemist and Occultist, and his assistant Edward Kelley have been summoned by the King of Poland to save the life of his niece, the infamous Countess Elisabeth Bathory. But they soon realize that the only thing worse than the Countess' malady, is the magic that might be able to save her. As Jackdaw and Felix race to uncover the truth about the person hunting her, it becomes clear that the answers they seek can only be found in the ancient diary of John Dee's assistant, Edward Kelley. Together they must solve a mystery centuries in the making, or die trying.

this comedic romp through modern-day dating checks all the romance boxes." -Kirkus Reviews Willa Frank has one simple rule: never go on a date with anyone more than twice. Now that her business is providing the stability she's always needed, she can't afford distractions. Her two-date rule will protect her just fine until she meets smokejumper Grady Billman. After one date—one amazing, unforgettable date—Grady isn't ready to call it quits, despite his own no-attachments policy, and he's found a sneaky way around both their rules. Throwing gutter balls with pitchers of beer? Not a real date. Everyone knows bowling doesn't count. Watching a band play at a local show? They just happen to have the same great taste in music. Definitely not a date. Hiking? Nope. How can exercise be considered a date? With every "non-date" Grady suggests, his reasoning gets more ridiculous, and Willa must admit she's having fun playing along. But when their time together costs Willa two critical clients, it's clear she needs to focus on the only thing that matters—her future. And really, he should do the same. But what is she supposed to do with a future that looks gray without Grady in it? Empathy has long been a topic of interest to psychologists, but it has been studied in a sometimes bewildering number of ways. In this volume, Mark Davis offers a thorough, evenhanded review of contemporary empathy research, especially work that has been carried out by social and personality psychologists. Davis' approach is explicitly multidimensional. He draws careful distinctions between situational and dispositional "antecedents" of empathy, cognitive and noncognitive "internal processes," affective and nonaffective "intrapersonal outcomes," and the "interpersonal behavioral outcomes" that follow. Davis presents a novel organizational model to help classify and interpret previous findings. This book will be of value in advanced undergraduate and graduate courses on altruism, helping, and moral development.

needed resource for women struggling with any degree of relational or sexual addiction. Ferree details the roots of addiction in family trauma and offers clear-eyed advice as both a counselor and a "grateful recovering sex addict" on how to achieve sobriety and healing. Written by a counselor who understands the condition from the inside out, *No Stones* offers practical help for those battling sexual addiction. It also includes a specific chapter for anyone in close relationship with an addict, whether a spouse, family member, or friend, who wants to come alongside women as they seek help. Important for pastors and church leaders, this book will also be a much sought-after resource for Christian counselors and therapists counseling women who grapple with this type of addiction.

Typically a maligned figure in American political history, former vice president Spiro T. Agnew is often overlooked. Although he is largely remembered for his alliterative speeches, attacks on the media and East Coast intellectuals, and his resignation from office in 1973 in the wake of tax evasion charges, Agnew had a significant impact on the modern Republican Party that is underappreciated. It is impossible, in fact, to understand the current internal struggles of the Republican Party without understanding this populist "everyman" and prototypical middle-class striver who was one of the first proponents of what would become the ideology of Donald Trump's GOP. Republican Populist examines Agnew's efforts to make the Republican Party representative of the "silent majority." Under the tutelage of a group of talented speechwriters assigned to Agnew by President Richard Nixon including Pat Buchanan and William Safire, Agnew crafted the populist-tinged, anti-establishment rhetoric that helped turn the Republican Party into a powerful national electoral

This book presents the research-based case that Learner Centered Teaching (LCT) offers the best means to optimize student learning in college, and offers examples and ideas for putting it into practice, as well the underlying rationale. It also starts from the premise that many faculty are much closer to being learner centered teachers than they think, but don't

have the full conceptual understanding of the process to achieve its full impact. There is sometimes a gap between what we would like to achieve in our teaching and the knowledge and strategies needed to make it happen. LCT keeps all of the good features of a teacher-centered approach and applies them in ways that are in better harmony with how our brains learn. It, for instance, embraces the teacher as expert as well as the appropriate use of lecture, while also offering new, effective ways to replace practices that don't optimizing student learning. Neuroscience, biology and cognitive science research have made it clear that it is the one who does the work who does the learning. Many faculty do too much of the work for their students, which results in diminished student learning. To enable faculty to navigate this shift, Terry Doyle presents an LCT-based approach to course design that draws on current brain research on cognition and learning; on addressing the affective concerns of students; on proven approaches to improve student's comprehension and recall; on transitioning from "teller of knowledge" to a "facilitator of learning"; on the design of authentic assessment strategies – such as engaging students in learning experiences that model the real world work they will be asked to do when they graduate; and on successful communication techniques. The presentation is informed by the questions and concerns raised by faculty from over sixty colleges with whom Terry Doyle has worked; and on the response from an equal number of regional, national and international conferences at which he has presented on topics related to LCT.
