Many of the challenges that decision-makers grapple with in relation to climate change are governance related. Planning and decision-making is evolving in ambiguous institutional environments, in which many key issues remain unresolved, including relationships between different actors; funding arrangements; and the sources and procedures for vetting data. These issues are particularly acute at this juncture, as climate adaptation moves from broad planning processes to the management of infrastructure systems. Concrete decisions must be made. Adapting Infrastructure to Climate Change draws on case studies of three coastal cities situated within very different governance regimes: neo-corporatist Rotterdam, neo-pluralist Boston and semi-

authoritarian Singapore. The book examines how infrastructure managers and other stakeholders grappling with complex and uncertain climate risks are likely to make project-level decisions in practice, and how more effective decision-making can be supported. The differences across governance regimes are currently unaccounted for in adaptation planning, but are crucial as best practices are devised. These lessons are also applicable to infrastructure planning and decision-making in other contexts. This book will be of great interest to scholars of climate change and environmental policy and governance, particularly in the context of infrastructure management.

"Herewith the Clues is a jaunt through the history of the Crime Dossiers, a form of literature as mystery game--developed in the interwar period--where players solved puzzles much in the way that a detective in the 1920s might have solved a crime using forensics. With origins in the whodunit mystery genre (whose roots go as far back as a tale in *One Thousand and One Nights*), this style of parlor game proliferated. The mass-produced games came in the form of binders, books, suitcases, or boxes containing crime-scene evidence (and literary red herrings), each piece of evidence itself a kind of riddle. One could see these as not only an entirely new manifestation of gamified literature, but game playing itself evolving: storytelling as a riddle-solving game acted in the flesh, rather than existing solely in the minds of author and reader. Herewith the Clues continues Boy Vereecken's research into mass-market literary culture, which began with *Signature Strengths* (2016). The volume includes two text contributions: a contemporary take on the whodunit novel by Shumon Basar, followed by a tour of the history of the Crime Dossiers by Laura Herman. The book is illustrated with a photo series from Antoine Begon who has unpacked and photographed the pieces of evidence that comprise Crime Dossiers such as *File on Rufus Ray and Murder Off Miami*"--Publisher's website.

Hyperides' Funeral Oration is arguably the most important surviving example of the genre from classical Greece. Judson Herrman's unparalleled edition will make the speech much more accessible to

a wide range of scholars. The text is based on a full examination of the papyrus and includes an apparatus criticus, with a complete listing of all conjectures in a separate appendix. The translation is clear and accurate and the commentary provides a mixture of historical, cultural, and literary material.
