Cabell's Directory of Publishing Opportunities in Economics and Finance

After muddling through two wars and an economic downturn, the president prepares for the stretch run of his re-election campaign by relapsing into a cocaine habit that triggers a fatal heart attack. Meanwhile, a group of Democratic senators decide the surest way to connect with voters is by finding their own version of Ronald Reagan --- presidential looking, smooth talking, friendly, affable, and a gets-his-hands dirty outdoorsman. A photo op of the candidate chopping wood leads to a heat stroke. Thus, it is politics as usual as the behinds-the-scenes operatives wheel and deal and navigate through a landscape that includes assassins for hire, voting machine hackers, and a Spanish prosecutor intent on taking the liars who concocted the war in Iraq to a court of law. Against this backdrop, Jay Dean Fine, a high school football coach fired for cheating, tries to make amends and get his dream back on track by working as a cowboy on a cattle ranch in the Flint Hills of Kansas while he figures out how to reunite with the wife and daughter he had left behind in Texas two years earlier. Returning home, he follows Interstate 35 back to the Dallas-Fort Worth Metroplex, encountering as twisted a version of America as Huck Finn and Jim encountered in their trip down the Mississippi River.

Gatherings

Documents the sad story of the Icelandic government's policy mistakes - the artificial creation of a boom, and the savage bust that was the inevitable outcome of this boom -- Foreword.

Advances in Applied Economics, Business and Development

The best-selling pocket guide to using Internet sources--now in a 2001 update, with FAQs about using the Internet, new chapters on distance learning and on troubleshooting common search problems, and greatly expanded advice on evaluating electronic sources.

Doing Economics: A Guide to Understanding and Carrying Out Economic Research

Dental Economics

Post-Popperian Methodology of Economics

ÔThe International Handbook on Teaching and Learning Economics is a power packed resource for anyone interested in investing time into the effective improvement of their personal teaching methods, and for those who desire to teach students how to think like an economist. It sets guidelines for the successful integration of economics into a wide variety of traditional and non-traditional settings in college and graduate courses with some attention paid to primary and secondary classrooms. . . The International Handbook on Teaching and Learning Economics is highly recommended for all economics instructors and individuals supporting economic education in courses in and outside of the major. This Handbook provides a multitude of rich resources that make it easy for new and veteran instructors to improve their instruction in ways promising to excite an increasing number of students about learning economics. This Handbook should be on every instructorÕs desk and referenced regularly.Õ Đ Tawni Hunt Ferrarini, The American Economist ÔIn delightfully readable short chapters by leaders in the sub-fields who are also committed teachers, this encyclopedia of how and what in teaching economics covers everything. There is nothing else like it, and it should be required reading for anyone starting a teaching career Đ and for anyone who has been teaching for fewer than 50 years!Õ Đ Daniel S. Hamermesh, University of Texas, Austin, US The International Handbook on Teaching and Learning Economics provides a comprehensive resource for instructors and researchers in economics, both new and experienced. This wide-ranging collection is designed to enhance student learning by helping economic educators learn more about course content, pedagogic techniques, and the scholarship of the teaching enterprise. The internationally renowned contributors present an exhaustive compilation of accessible insights into major research in economic education across a wide range of topic areas including: ¥ Pedagogic practice Đ teaching techniques, technology use, assessment, contextual techniques, and K-12 practices. ¥ Research findings Đ

principles courses, measurement, factors influencing student performance, evaluation, and the scholarship of teaching and learning. ¥

Institutional/administrative issues Đ faculty development, the undergraduate and graduate student, and international perspectives. ¥ Teaching enhancement initiatives Đ foundations, organizations, and workshops. Grounded in research, and covering past and present knowledge as well as future challenges, this detailed compendium of economics education will prove an invaluable reference tool for all involved in the teaching of economics: graduate students, new teachers, lecturers, faculty, researchers, chairs, deans and directors.

A Guide for the Young Economist

After years of being called a tease and then being labeled the Virgin Queen, Andi Kane decides that when she goes off to college, she's ready to ditch the labels. She's grabbing the bull by its horns and riding as wild as she can. Fate must be smiling on her the night she meets Cohen Wellington, the cute boy-next-door and fellow music lover. Their connection is instant, and as the night progresses, she knows she's found The One. Only it doesn't go exactly the way she had planned it. And even though she can't get him off her mind, some humiliations are just too much to overcome. She walks away, never planning to see him again. Three years and a whole lot of experience later, Andi and Cohen are suddenly drawn together again, and it doesn't take long before it's clear their connection is stronger than ever. Fate. Destiny. Kismet. Whatever you want to call it, these two fall hard and fall fast. Their love burns hot, but when their plans for the future seem to move in two different directions, will it be enough to sustain the flames, or will the fire consume them, their relationship combusting before their very eyes? Sometimes love comes quickly without question, without hesitation, and without fear. But this kind of love is once in a lifetime, and sometimes you just have to ask yourself, can it really last?

Combust

The Elements of Style ("Strunk & White") is an American English writing style guide. It is one of the most influential and best-known prescriptive treatments of English grammar and usage in the United States. This book aims to give in brief space the principal requirements of plain English style. It aims to lighten the task of instructor and student by concentrating attention on a few essentials, the rules of usage and principles of composition most commonly violated. In accordance with this plan it lays down three rules for the use of the comma, instead of a score or more, and one for the use of the semicolon, in the belief that these four rules provide for all the internal punctuation that is required by nineteen sentences out of twenty. Similarly, it gives in Chapter III only those principles of the paragraph and the sentence which are of the widest application. The book thus covers only a small portion of the field of English style. The experience of its writer has been that once past the essentials, students profit most by individual instruction based on the problems of their own work, and that each instructor has his own body of theory, which he may prefer to that offered by any textbook.

Capital Budgeting and Leasing

The Economics of Information in the Networked Environment

In this book, first published in 1998, world-renowned experts on the subject of contemporary librarianship analyse the problems associated with coping with an ever-expanding knowledge base, given their current economic constraints and budgets. It examines challenging marketplace solutions to problems in the economics of information; economic modelling of investments in information resources at academic institutions; the economics of resource sharing, consortia, and document delivery; and measuring the costs and benefits of distance learning.

International Handbook on Teaching and Learning Economics

This is a reproduction of the original artefact. Generally these books are created from careful scans of the original. This allows us to preserve the book accurately and present it in the way the author intended. Since the original versions are generally quite old, there may occasionally be certain imperfections within these reproductions. We're happy to make these classics available again for future generations to enjoy!

Deep Freeze

Ecological economics is a new transdisciplinary approach to understanding and managing the ecology and economics of our world for sustainability on local, regional, and global scales. The previous isolation of these two fields has led to economic and environmental policies that have been mutually destructive rather than reinforcing in the long term. This book brings together these two disciplines in chapters covering the basic worldview of ecological economics; accounting, modeling, and analysis of ecological economic systems; and necessary institutional changes and case studies.

Ecological Economics

The form of 'reflexivity' – defined by the dictionary as that which is 'directed back upon itself' – that is most relevant to economic methodology is that where observation of the economy leads to ideas that change behavior, which in turn changes (is directed back upon) the economy itself. As George Soros explains: "if investors believe that markets are efficient then that belief will change the way they invest, and that in turn will change the nature of the markets they are observing That is the principle of reflexivity". Although various versions of reflexivity have long been discussed, in recent years George Soros has been particularly effective in bringing ideas about reflexivity to the attention of the economic and financial communities. In a series of writings he has systematically argued that reflexivity is not only an important aspect of economic life, it is an aspect that is neglected in most mainstream theorizing; and in addition, that the neglect of reflexivity has been responsible for the failure of economists to predict,

explain, or offer a solution for events such as the recent financial crisis. Soros' ideas about reflexivity have important methodological significance, and his chapter in this book summarizes and clarifies his arguments. His contribution is joined by those of thirteen scholars from a wide range of relevant fields, who provide a commentary on the idea of reflexivity in economics. This book was originally published as a special issue of The Journal of Economic Methodology.

The Art of Speculation During Civil War

Reflexivity and Economics

This book contains ideas to develop interdisciplinary and transdisciplinary views on economy and society. It aims to disseminate non mainstream ideas on various subjects related to economics and global society. The book is organised in six parts. Part 1 contains the key thoughts of Prof. J. Backhaus on the concept of state sciences and of Prof. A. Klammer on the importance of culture for economics. Parts 2- 6 contain successively contributions in the areas of population and society, history and economic theory, corporate issues, environment, and international relations. Examples of the content are: the changes of family life cycles due to the rise of non-traditional households; subjective and objective inflation rates after the introduction of the Euro; the economics of genetic engineering; the contribution of foreign direct investment to the economic development of host countries; the inaccuracy of economic models applied in places characterized by extreme income disparities; the improvement of political and corporate governance; evolutionary thinking and emission trading; freedom versus order in the European Union; the reform of social policy in Europe. The book provides interesting creative multi-disciplinary ideas with respect to various topical issues concerning the contemporary global society. It is highly recommended for social scientists in search of broad views on social science and society.

Spatial Economics Volume I

I suspect that if you are reading this book, then you either just finished your book or you are contemplating self-publishing books as a full-time or part-time income or just to publish your book and brag to your friends about it later. In any case, this book is written for you and it comes from my heart, and from my many trial and errors over the last two years and still am doing today. I hope I will not let you down with the content of this book and that you will find it useful.

Innovating for Rural Markets in India

As the world of television moves from analog to digital, political and economic forces are being brought to bear on companies as they attempt to deal with changes occurring in their industries. The impetus for the conversion from analog to digital TV comes from many quarters, including the broadcasting industry, the computer industry, governments, consumer electronics manufacturers, content developers, and the Internet. The widespread acceptance of digital technology in both the home and the workplace account for the ready acceptance of the belief

that the move to digital television is an appropriate advancement. Not all authors in this volume however are believers. This book is divided into four sections each dealing with one aspect of the transition from analog to digital TV broadcasting. The first section presents the various technologies. It establishes a structure for understanding the technologies currently in use as well as those being developed by the industries involved in the delivery of digital television. Section two presents information about consumer TV viewing and includes examples of innovative, experimental interactive programs. Economics and financial issues are addressed from a variety of perspectives in section three. Section four concludes the book with a look at the international environment and the history of digital TV globally.

Review of the Rev. Thomas Andros's Essay on the Doctrine of Divine Efficiency

The book presents the various techniques identified in the finance literature for assisting managers with the capital budgeting and/or leasing decisions.

Keio Economic Studies

In recent years there has been a flowering of work on economic methodology. However there is no longer any consensus about which direction this should take or, indeed, even what the role and content of economic methodology should be. This book reflects this diversity. Its contributors are responsible for the major developments in this field and together they give an account of all the major positions which currently prevail in economic methodology. These include attempts to rehabilitate the 'falsification' of Kuhn, Lakatos and Popper, sociology of knowledge approaches, different forms of realism, contributions from the 'rhetoric' project and other perspectives which view the economy as a text.

New Directions in Economic Methodology

The Indian rural market till long had been thought of as an inaccessible, unsubstantial market with limited purchasing power. This belief has prompted the marketers to blatantly evade the call of the rural markets. The truth of the matter is that all rural consumers are not poor. As revealed by a study conducted by NCAER, 'there are as many middle income and above households in the rural areas as there are in the urban areas'. The catch is that a sizeable portion of the rural consumer does not prefer to buy in bulk but have a propensity to buy in small amounts as and when required. This presses on the need for some change in the products, services and packaging and opens up a strong case in favour of innovation for the rural markets. Moreover the scattered and fragmented nature of the Indian rural markets makes distribution a cumbersome process. Unlike that in the urban areas, a member of the distribution channel in the rural area would end up catering to significantly lesser number of consumers in an area of comparable size. Establishing an intensively wide and deep distribution channel may not always be economically viable and profitable. This presents another scope for innovation for the marketer intending to penetrate into the rural markets. Other pertinent questions which may be answered through innovation are: how to sell profitably to the rural poor, how to reduce the cost of marketing communication

and yet communicate more effectively with the rural masses, how to deliver an enhanced value to the consumers, what type of business models to develop for the rural markets, how to lower the price of the products and services for the rural consumers, how to make the products more cost effective and many more. The book attempts to give a brief account of the Indian rural market, explore the possibility of using innovation for penetrating into this market and point to and justify the suitability of some specific types of innovations for the rural market of India.

How I Found Livingstone

Lawrence Boland takes issue with both economic methodologists and practicing economists. He argues that there has been too much 'methodology for methodology's sake' and that mainstream economics might benefit by using methodology to take a critical look at economic theory.

Austyn's Awesome Zombie Dirt Bike Ride

Contains information on more than 400 scholarly journals in Economics and Finance that assists professors and graduate students in publishing their manuscripts.

Staff Paper in Economics and Statistics

The Art of Speculation during Civil War - Sun Tzu Meets Jesse Livermore offers a compelling choice: remain asleep or wake up to the truth; accept whatever major media say or understand how the economy, government, and society are manipulated for the profit of a few and at the expense of the majority. Slavery is dependent upon the consent of the slave. Oppression, to succeed, requires the sanction of the oppressed. No regime, be it democratic, monarchic, socialist, communist, or fascist, can exist for long without the public's consent, irrespective of how that consent is manufactured. If consent is withdrawn, the regime falls. The Art of Speculation during Civil War aims to hasten the day when individuals, communities, countries, and the world withdraw consent from those who would manipulate them for the aggrandizement of their power. This book invites its readers to awaken to the truth and profit from the knowledge and freedom gained. The truth is a solid foundation for any economic activity. Anyone can profit from the truth and extraordinary profits are possible for those who understand why Sun Tzu meets Jesse Livermore.

Oil Under the Window

It's Halloween Eve, and Austyn is enjoying a midnight ride on his prized dirt bike. When three scary zombies interrupt his thrills and chills, he challenges them to learn to ride as well. Soon, a race is underway, and the zombies forget about everything but the ride. Austyn's quick thinking gives everyone a chance to win.

Business

This four-volume-set (CCIS 208, 209, 210, 211) constitutes the refereed proceedings of the International Symposium on Applied Economics, Business and Development, ISAEBD 2011, held in Dalian, China, in August 2011. The papers address issues related to Applied Economics, Business and Development and cover various research areas including Economics, Management, Education and its Applications.

The Elements of Style

The Economics, Technology and Content of Digital TV

For much of the last three decades or more economic methodology has been dominated by the work of Karl Popper who advocated the position that science is what it is by virtue of its adherence to certain ideals. The methodology of science is therefore not empirical or descriptive, but rather a set of rules for producing 'rational' or 'objective' knowledge. This volume presents alternatives to an exclusively Popperian methodology: its purpose is not to reject Popper, but to show there are other ways of construing methodology. The book is divided into three parts. Part I contains two critical surveys -- one dealing with the rule-based tradition which has had a great influence on economic methodology in the last three decades and the other arguing for the social conditioning of knowledge. Part II is concerned with auxiliary hypotheses needed to link rational choice at the social and individual levels. Part III follows up on aspects raised in linking rational choice at the social and individual levels by looking at specific issues, including rhetoric and economics and gender and economic research.

Online!

In Hope Slaughter Bryant's new poetry book, *Gatherings*, she returns in Section I to her childhood mid-western mountains, the Black Hills, her close family, and "those moments that call us back and we are there as if we never left." Section II "gathers up" poems about a variety of life experiences and images from many different places, and Section III sorts through memories shared with her beloved husband and grief at his loss.

Agricultural Economics Working Paper

Dog on a Rope

This trading ledger was created by an active stock trader and allows the user to make detailed journal entries of all of their trading activities. Numerous psychological studies have determined that the best way for humans to learn is by writing things down with pen and paper, and then reviewing this information periodically. The author of this ledger holds a degree in psychology and used his

knowledge of human learning to develop an intuitive ledger that allows traders to clarify their thoughts on paper and analyze all of their transactions. Even the cover has been designed with vivid colors and a retro pattern to evoke the limbic system of the brain and encourage organization of thought processes. This workbook has been laid out in a manner to make effective use of goals, trading plans, and strategies by allowing the trader to keep a visual record of their progress. Created by best-selling author Ashbee A. Bakht, the trading ledger is printed on high quality paper and is published in a compact format making it easy to carry with you no matter where you choose to trade. The formatting of the workbook has been designed with special attention paid to allow for it to be flexible enough for all trading strategies (i.e. intraday/day/swing/long term, etc.).

Critical Economic Methodology

Heterodox views on economics and the economy of the global society

A union list of serials commencing publication after Dec. 31, 1949.

Post-Soviet Geography and Economics

This handy reference text provides undergraduate students with a practical introduction to research methodology. Doing Economics makes students aware of what experienced researchers know implicitly: research is fundamentally a process of constructing persuasive arguments supported by theory and empirical evidence. As a result, students learn how to implement critical-reading, writing, and online research skills to produce valid and reliable research. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Land Economics

Journal of Public Economics

In clear, concise language—a model for what he advocates—William Thomson shows how to make written and oral presentations both inviting and efficient.
