Fraser Darling in Africa

Sorcha dún Scoti has known her whole life she is different. Now, the future of her clan is in doubt, and Una, their beloved seer is gone. The youngest dún Scoti inherits Una's beloved keek stane--and with it, the gift of sight. Here, the truth of her birth and death are revealed. To save herself and her clan, Sorcha must flee the vale and travel to a remote Island in the Outer Hebrides, where she hopes to reunite with Una, but despite her gift of sight, the journey holds perils Sorcha cannot

foresee Stricken blind by his grief, Caden MacSwein has sequestered himself like a beast in his castle by the sea. It is whispered he slew his own brother, and now is cursed by the Gods. When a maiden from Inverness arrives on his shores on the eve of the summer star, Caden convinces himself she alone holds the key to the return of his sight. But he must ken that his blindness comes from within or he will never save the maiden from the mist from the danger that pursues her. Rich with history and lore, MAID OF THE MIST continues the story that began with HIGHLAND FIRE and left off with HIGHLAND STORM. This is book 4 of the Guardians of the Stone series.

Extraordinary Healing documents the extraordinary story of French researcher Mirko Beljanski, known as the father of environmental medicine. Beljanski's discovery of destabilized DNA and the specific plant molecules that can help restore DNA to a healthy state and stop pathological cells from replicating have led to many miraculous cures and prolonged survival for thousands of cancer patients, including French President Francois Mitterand. Previously well-known only in France (where citizens picketed in the streets to be able to use the same protocols which extended the life of President Mitterand), Beljanski's protocols are now gaining popularity in the U.S. and are being used by scientists at Columbia University. L. Stephen Coles, M.D., Ph.D., an expert on supercentenarians-people who live beyond the age of 110-gives an insightful account of the revolutionary approach to prevention and support pioneered by Beljanski, who spent thirty years at the prestigious Pasteur Institute in Paris. A compelling tale of a courageous and brilliant researcher, Extraordinary Healing illuminates the promise of specific, natural plant molecules in the restoration and protection of cellular health. It is a must-read for anyone in the field of cancer research.

"Pioneer ecologist and conservationist, Sir Frank Fraser Darling spent many years surveying the wildlife resources of Africa. Now published for the first time, his journals vividly describe the safaris he made by foot, air and motor in Zambia, Kenya and the Sudan in the late 1950s and early 1960s." "It provides a valuable and spectacular record, not only of the now depleted wildlife stocks of the region but also of the tribal people of the period to present a unique and sensitive insight into the environmental issues of the time, and the thoughts and motivations of Fraser Darling, the father of the modern conservation movement. A must for anyone interested in ecology, natural history and travel."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Summary of Chaos Monkeys by Antonio Garcia Martinez | Includes Analysis Preview: Chaos Monkeys is a memoir of Antonio Garcia Martinez's time working as a coder at Goldman Sachs, as a startup employee and founder, and as a product manager at Facebook. Martinez began working at Goldman Sachs after college as a pricing quant, which is industry slang for a programmer who builds models for pricing credit derivatives. Quants had low status at the firm and Martinez became disillusioned with employees' reliance on the annual bonus and the gambling-heavy culture of the workplace. In late 2007, he applied for and was offered a job at Adchemy, a startup in California that was developing tools to buy advertising on Google's real-time bidding engine, the system Google uses to determine which bidder gets advertising space for every Google search. By 2010, Martinez considered Adchemy, which was led by Chief Executive Officer Murthy Nukala, to be approaching failure. Leadership turnover was high and the company's PLEASE NOTE: This is summary and analysis of the book and NOT the original book. When violence from the drug wars with the Mexican cartels crosses the border into Arizona, and an old friend is murdered, Ali Reynolds steps in to investigate in New York Times bestselling author J.A. Jance's fast-paced mystery. When Santa Cruz county deputy sheriff Jose Reyes, one of Ali Reynolds's classmates from the Arizona Police Academy, is gunned down and left to die, he is at first assumed to be an innocent victim of the drug wars escalating across the border. But the crime scene investigation shows there's much more to it than that, and soon he and his pregnant wife, Teresa, are both under suspicion. Ali owes Reyes a debt of gratitude for the help he gave her years earlier. When she's summoned to his bedside at Mercy Medical Center in Tucson, it's impossible for Ali to turn away. Upon arriving at the hospital, Ali finds her good friend, Sister Anselm, is there as well, working as a patient advocate on behalf of another seriously injured victim, an unidentified border crosser who was raped and savagely beaten. As more bodies begin to pile up, Ali becomes determined to seek justice, even when it becomes impossible to know where the danger is coming from. Fast-paced, tension-filled, and intriguingly complex, *Left for Dead* is J.A. Jance at her riveting best.

For four decades, Knoxville, Tennessee, native David Madden has been writing compelling bestsellers, such as *Bijou* and *The Suicide's Wife*, as well as highly respected literary novels, such as *Sharpshooter*. *David Madden: A Writer for All Genres* is the first full-length critical work devoted to the whole of Madden's oeuvre, and collectively the essays make the case that the attention paid to Madden's novels has overshadowed his innovative work as a critic, poet, short-story writer, and dramatist. Madden is indeed a writer for all genres--poetry, fiction, drama, and criticism. *David Madden: A Writer for all Genres* will introduce a new generation of readers to an important and multitalented writer and begin a well-deserved, serious discussion of his place in the American literary tradition.

Turn on the body's self-healing abilities, prevent illness before it starts, and reverse the aging process • Explains how to activate the body's regenerative abilities and combat inflammation through diet, supplements, detox, herbs, exercise, energy medicine, and mindfulness • Examines the science of epigenetics and the potential of stem cell therapies for regeneration of joints and organs as well as for healing the telomeres of our DNA • Reveals the importance of hormone balance and sleep as a core regenerative therapy Harnessing the advances of the new paradigm of medicine--which focuses on the regenerative abilities of the body rather than symptom management--Elisa Lottor, Ph.D., HMD, explains how each of us can turn on the body's self-healing abilities, prevent illness before it starts, and reverse the aging process to live

longer, healthier, and happier lives. Beginning with a focus on the foods we eat, the author reveals how many diseases and symptoms of aging are the result of inflammation in the body, caused by poor diet and a lack of crucial nutrients. She explains the top foods to avoid, such as refined sugar, and the best nutrient-rich foods to include, along with easy and delicious recipes. Showing how regenerative medicine treats the roots of aging and disease, preventing them before they start, she details the regenerative properties of the liver complex, explaining the best ways to detox, and reveals how to restore optimal microbe balance in your gut. Dr. Lottor explores the regenerative properties of adaptogens, herbs, and nutraceuticals, the unobtrusive healing practices of energy medicine, the importance of hormone balance, and the concept of living water. She also underscores sleep as a core regenerative therapy. Looking at the most cutting-edge research in the rapidly emerging field of regenerative medicine, Dr. Lottor examines the potential of stem cell therapies for regeneration of joints and organs as well as for lengthening our DNA's telomeres, the shrinkage of which is now considered a chief cause of aging. She also looks at the science of gene expression--epigenetics--and how DNA can be used as both a health predictor and a tool for preventing inherited diseases. Including a comprehensive resource section for finding products and practitioners, Dr. Lottor offers each of us the necessary tools and information to reverse aging and participate in your own wellness.

Western Queers in China

After losing all of his money in a reckless bet, Logan Breckman, the Earl of Tophyn, needs to marry a lady from a wealthy family--and fast. So he does the only thing he can think of and picks one at random to trick into marriage. Unfortunately for Miss Melissa Jasper, she happens to be in the right place at the wrong time. Before she knows it, he comes up to her carriage and kisses her...and she is doomed. Now she can't marry the gentleman she was hoping to and she's bound to a cad who thinks of little else but himself. Logan is the first to admit he's far from perfect, but being with a gentleman who knows how to ignite a passionate spark is a lot better than being stuck with one who'll put a lady to sleep. Of course, she won't thank him for forcing her hand in marriage yet. But he has no doubt that sooner or later, she'll come to understand he's the best thing that's ever happened to her.

In *Applications for Living*, Neale Donald Walsch has distilled the principles of *Conversations with God* through his own life experience into a universal formula for living well. *Holistic Living* shows that all individuals can and should achieve emotional, sexual, intellectual and spiritual fulfillment, as well as abolishing negative, unproductive habits. *Relationships* examines common patterns that hinder our ability to build and maintain successful relationships, and teaches us to move beyond restrictive ways of relating. *Abundance and Right Livelihood* explains the author's simple and practical philosophy

for achieving abundance, and how to learn what your 'right livelihood' is. Inspirational, practical and humorous, Neale Donald Walsch reveals in Applications for Living how we can use our own mistakes and experiences as stepping stones to a higher awareness and greater fulfilment in life.

Summary of Chaos Monkeys

Blake and Avery return in the stunning sequel to M. J. Carter's lauded fiction debut, *The Strangler Vine*. London, 1841. Returned from their adventures in India, Jeremiah Blake and William Avery have both had their difficulties adapting to life in Victorian England. Moreover, time and distance have weakened the close bond between them, forged in the jungles of India. Then a shocking series of murders in the world of London's gutter press forces them back together. The police seem mysteriously unwilling to investigate, then connections emerge between the murdered men and the growing and unpredictable movement demanding the right to vote for all. In the back streets of Drury Lane, among criminals, whores, pornographers, and missionaries, Blake and Avery must race against time to find the culprit before he kills again. But what if the murderer is being protected by some of the highest powers in the land? From the Hardcover edition.

The Tribes of the Person-centred Nation

Isla Lennox is the best interpreter aboard the Alliance ship Argo -- if the captain would ever give her a chance to do her job. When he finally does, Isla's big break turns into chaos and panic as she and all the female crew members are traded to an alien ship in exchange for the Argo's safe passage. The giant Xaravian warriors are intimidating, covered in scales, and way too attractive. Isla and her friends won't surrender quietly, but it seems like the Xaravians are looking forward to that kind of fight. The moment Vaant sees the beautiful, sassy interpreter, he knows he can't leave her in danger. She thinks he's a pirate and a dangerous rebel -- and that he bought her and her friends. Vaant must prove his honorable intentions, even as her flashing eyes and curvy figure drives him mad with desire. He'll even endanger his ship and go to the edge of the universe to keep her safe. When her former captain frames Vaant for destroying an innocent ship and murdering another crew, Isla must face that the Alliance she served so proudly is not what it seems. Starting a new life as a rebel with Vaant sounds more and more appealing, but first they'll have to fight through half the Alliance fleet, escape a crumbling space station, and find love among the stars.

(This book contains mature content, including sex and language. Not intended for readers under the age of 18) KISS THIS continues with Jay's story, a rebel of his own sort with the need for freedom and unfiltered opinions. His days of unruly behavior and risky decisions have dealt him a hand that he's still trying to overcome as he seeks to accomplish his business dreams. But the hits keep adding up. His best friend is knocked up by an ex that won't back off, a family member drops in unexpectedly and questions need answered, and the easier aspects in life are suddenly being tested beyond his control. When ultimate tragedy wreaks havoc on his life, it sends Jay over the edge. He can't seem to manage the simple things anymore and he reverts back to his old ways of shutting people out and living carelessly. He loses everything he's gained so far-everything that he didn't know he wanted-all in one ugly weekend. There is only one thing that can really save him from complete ruins, and this time it might not be so easily at his disposal. And then there is that damn McCallan pride that automatically resists help at every turn. It just may be the very thing that causes him to lose everything for good

Rekindled (Fountain Creek Chronicles Book #1)

A Gripping Story of Love, Loss, and Second Chances When her husband disappears into a mountain snowstorm one morning, Kathryn Jennings is flung into the world of ranching, banking, and business. Penniless and pregnant, Kathryn is determined to keep her land as a legacy for her child. The man who offers her a job seems to have an awful lot of secrets, but she is desperate. Most disconcerting of all is the uncanny familiarity she feels toward the badly scarred ranch hand who works in the dark shadows of the horse stables.

Diary of Minecraft Skeleton Steve the Noob Years - FULL Season Two (2)

This unique work examines the role played by sexuality in the historical encounter between China and the West. Distinguished historian D. E. Mungello focuses especially on Western homosexuals who saw China as a place of escape from the homophobia of Europe and North America. His groundbreaking study traces the lives of two dozen men, many previously unknown to have same-sex desire, who fled to China and in the process influenced perceptions of Chinese culture to this day. This escapism engendered casual sexual encounters, serious friendships, and substantive intellectual

relationships, all of which had a profound impact on shaping the modern Western conception of China.

Over centuries, African pastoralist societies have crafted institutions that enable them to survive in their harsh, semi-arid environment. Effectively managing communally held land has been one key to their success and a cornerstone of their social organization. Over the last two decades, however, a number of pastoralist communities have sought to transform their land tenure systems from communal to private ownership. In *Contesting the Commons*, Carolyn K. Lesorogol draws on eighteen months of fieldwork and ten previous years of work and residence among the Samburu to ask: What accounts for this challenge to an important, well-adapted, and seemingly highly functional institution? What are the effects of privatization of land on household well-being, individual behavior, and social relations? How can understanding the trajectory of institutional change in this case help us comprehend the dynamic processes of social transformation in general? "*Contesting the Commons* is one of the best books that I have read on the politics of land and social order in Africa. Lesorogol offers a creative and nuanced approach to questions of property rights and social norms. This is a very impressive addition to the general literature on institutional change." ---Jack Knight, Sidney W. Soeurs Professor of Government, Department of Political Science, Washington University in St. Louis Carolyn K. Lesorogol is Assistant Professor of Sociocultural Anthropology at George Warren Brown School of Social Work, Washington University in St. Louis. She was a consultant for the National Science Foundation project, "The Roots of Human Sociality: An Ethno-Experimental Exploration of Economic Norms in 16 Small-Scale Societies," from 2001-2004, and she has also received a National Science Foundation grant and a Fulbright-Hays grant.

Complete summary of Bill Gates' book: "*Business @ The Speed of Thought: Using a Digital Nervous System*". This summary of the ideas from Bill Gates' book "*Business @ The Speed of Thought*" shows that competitive business advantage in the

21st century will revolve around an organization's ability to adapt to changing circumstances rapidly. To achieve this, information needs to flow within the business enterprise efficiently. The best way to achieve this is by building a Digital Nervous System. A Digital Nervous System combines personal computer, Internet and communications technologies. It will be the conceptual framework around which a better understanding of the challenges of the marketplace will be constructed - and from which the company's response will be planned and implemented. Any company that can integrate the transfer of information around the organization so completely that business decisions at all levels of the organization can literally be made as quickly as information becomes available will be ideally suited to the demands and requirements of the evolving business environment. Added-value of this summary: • Save time • Understand the key concepts • Increase your business knowledge To learn more, read "Business @ The Speed of Thought" and discover an insight into the Digital Nervous System, the "killer application" of business in the 21st century.

Left for Dead

Fruits are generally very healthy to the body and as such should be consumed on regularly basis. Most fruits are generally low in fat and calories and do not therefore pose health threats to the body when consumed in large quantities. Apples are one of the most delicious fruits which equally have plenty health benefits. They belong to the Rose family of plants just like other fruits such as apricots, plums, cherries, peaches, pears, raspberries, as well as almonds. Fruits in the Rose family are generally very rich in diverse nutrients and are highly recommended for human beings regularly. This explains why it is usually said that eating an apple each day keeps one away from the doctors. Nevertheless, considering the fact that there are many different variety of fruits, it sometimes becomes boring for people to eat apples daily. Such people are therefore advised to consume apples at least 2-3 days every week.
