Speaking for Academic Purposes

This book is based on a study of referees' reports and letters from journal editors on reasons why papers written by non-native researchers are rejected due to problems with English (long sentences, redundancy, poor structure etc). It draws on English-related errors from around 5000 papers written by non-native authors, around 3000 emails, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. The exercises are organized into nine chapters on: adjectives and adverbs (e.g. actual vs current, different vs several, continually vs continuously), link words (e.g. on the contrary vs on the other hand, despite vs nevertheless), nouns (e.g. danger vs hazard, measure vs measurement), prepositions (e.g. among vs between, in vs into, with vs within), verbs (e.g. check vs control, compose vs comprise, arise vs raise, exclude vs rule out), false friends and synonyms, spelling, useful phrases, emails. Nearly all exercises require no actual writing but simply choosing between various options, thus facilitating self-study, e-reading and rapid progress. The exercises can also be integrated into English for Academic Purposes (EAP) and English for Special Purposes (ESP) courses at universities and research institutes. The book can be used in conjunction with the other exercise books in the series: English for Academic Research: Writing Exercises English for Academic Research: Grammar Exercises

Study Skills for Academic Writing

Scientific English is possibly the most rewarding area of EFL teaching. It differs from English for Academic Purposes (EAP) as it is directed to a much smaller audience: PhD and postdoc students. Courses on Scientific English are held in universities throughout the world, yet there is very little support for teachers in understanding what to teach and how to teach it. This guide is part of the English for Academic Research series. Part 1 of the book sheds light on the world of academia, the writing of research papers, and the role of journal editors and reviewers. Part 2 gives practical suggestions on how to help your students improve their presentation skills. In Part 3 you will learn how to teach academic skills using nonacademic examples. Parts 1-3 are thus useful for anyone involved in teaching academic English, whether they have used the other books in the series or not. Part 4 suggests two syllabuses for teaching writing and presenting skills, based on the two core books: English for Writing Research Papers English for Presentations at International Conferences This book will help you i) understand the world of your students (i.e. academic research), ii) plan courses, and iii) exploit the What's the Buzz? sections in the books on Writing, Presentations, Correspondence and Interacting on Campus. Adrian Wallwork has written over 30 books covering General English (Cambridge University Press, Scholastic), Business English (Oxford University Press), and Scientific English (Springer). He has trained several thousand PhD students from all over the world to write and present their research. Adrian also runs a scientific editing service: English forAcademics (E4AC).

Grammar Choices for Graduate and Professional Writers

This guide is based on a study of referees' reports and letters from journal editors on the reasons why papers written by non-native researchers are rejected due to problems with English usage, style and grammar. It draws on English-related errors from around 5000 papers written by non-native authors, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. English for Academic Research: Usage, Style, and Grammar covers those areas of English usage that typically cause researchers difficulty: articles (a/an, the), uncountable nouns, tenses (e.g., simple present, simple past, present perfect), modal verbs, active vs. passive form, relative clauses, infinitive vs. -ing form, the genitive, noun strings, link words (e.g., moreover, in addition), quantifiers (e.g., each vs. every), word order, prepositions, acronyms, abbreviations, numbers and measurements, punctuation, and spelling. Due to its focus on the specific errors that repeatedly appear in papers written by non-native authors, this manual is an ideal study guide for use in universities and research institutes. The book is cross-referenced with the following titles: • English for Academic Research: Grammar Exercises • English for Academic Research: Vocabulary Exercises • English for Academic Research: Writing

Since 1984 he has been revising research manuscripts through his own proofreading and editing service.

English for Academic Study: Vocabulary US Edition

A three-level (B1+ to C1) integrated skills course for higher education students at university or on foundation courses. The C1 Advanced Student's Book consolidates academic study skills. Students' analytical skills are challenged with an increased range of authentic written and spoken academic texts. From essay organisation, taking notes, group discussion to writing references and paraphrasing texts, the students are presented with a wealth of practice opportunities to enhance all academic skills at this level. The course further develops independent learning skills and critical thinking through 'Study tips' sections and allows for personalisation of learning in the 'Focus on your subject' sections. Lecture and seminar skills units provide authentic practice in listening to lectures and participating in seminars.

Grammar and Beyond: SG3. Student's book

English for Academic Study: Reading and Writing US Edition

An important contribution to the emerging body of research-based knowledge about English grammar, this volume presents empirical studies along with syntheses and overviews of previous and ongoing work on the teaching and learning of grammar for learners of English as a second/foreign language. It explores a variety of approaches, including form-focused instruction, content and language integration, corpus-based lexicogrammatical approaches, and social perspectives on grammar instruction. Nine chapter authors are Priority Research Grant or Doctoral Dissertation Grant awardees from The International Research Foundation for English Language Education (TIRF), and four overview chapters are written by well-known experts in English language education. Each research chapter addresses issues that motivated the research, the context of the research, data collection and analysis, findings and discussion, and implications for practice, policy, and future research. The TIRF-sponsored research was made possible by a generous gift from Betty Azar. This book honors her contributions to the field and recognizes her generosity in collaborating with TIRF to support research on English grammar. Teaching and Learning English Grammar is the second volume in the Global Research on Teaching and Learning English Series, co-published by Routledge and TIRF.

In those exercises where extended writing is required, model answers are given. Exercise types are repeated for different contexts, for example the importance of being concise is tested for use in papers, referees' reports, and emails of various types. Such repetition of similar types of exercises is design ed to facilitate revision. Practical English Grammar for Academic Writers

Based on extensive research, Grammar and Beyond ensures that students study accurate information about grammar and apply it in their own speech and writing. Student's Book, Level 3 is the main component of Grammar and Beyond. In each unit, students study the grammar in a realistic text and through charts and notes informed by a billion-word corpus of authentic language. The exercises provide practice in reading, writing, listening, and speaking, making this a complete course. Students learn to avoid common mistakes, based on an extensive corpus of learner language. Each unit concludes with a Grammar for Writing section, in which students apply the grammar in an extended writing task.

English for Academic Research: A Guide for Teachers

The 4 Point series is designed for English language learners whose primary goal is to succeed in an academic setting. Academic English learners need skills-based books that focus on reading, listening, and speaking, as well as the two primary language bases of vocabulary and grammar. The ultimate goal is to help your students improve these skills and earn a 4.0 (GPA). The Introduction to English for Academic Purposes (EAP) level is designed for students in academic programs who need a more general introduction to authentic academic content. The discrete skills volumes are designed for programs and courses that want to more intensively focus on key strategies and authentic academic content in one skill area. Each 4 Point volume covers academic skills while providing reinforcement and systematic recycling of key vocabulary issues and further exposure to grammar issues. These volumes focus very heavily on vocabulary because language learners know that they are way behind their native-speaker counterparts when it comes to vocabulary. Each book highlights key vocabulary items, including individual words, compound words, phrasal verbs, short phrases, idioms, metaphors, collocations and longer set lexical phrases. Speaking for Academic Purposes is an introductory textbook containing English for Academic Purposes content. Each unit includes activities to strengthen a range of speaking skills, notably: understanding classroom discourse, using academic language functions, recognizing signal words and phrases, and synthesizing information. These activities are presented within the context of one field of academic study (Architecture, Marketing, Earth Science, U.S. History, Chemistry, and Fine Arts) per unit. Unique to this speaking text are six videos showing common student interactions. Access to the videos is free. Each unit includes three academic speaking strategies (including one specific to making presentations) and tasks that involve participating in group discussions, interacting with native speakers, and making a presentation. The goal is to provide students with a variety of strategies/tools to master academic situations in which they need to participate.

Grammar and Beyond Level 1 Student's Book

Study Writing is for students at intermediate level and above who need to develop their writing skills and write better academic essays, projects, research articles or theses. Study Writing encourages students to develop their writing

strategies, seek feedback on their own writing and analyse expert writers' texts in order to become more reflective and effective writers. Study Writing helps learners to write more effectively by: - introducing key concepts in academic writing such as the role of generalizations and definitions and the application of principles like the Clarity Principle and the Honesty Principle - exploring the use of information structures, including those used to develop and present an argument - familiarizing learners with the characteristics of academic genre - analysing the grammar and vocabulary associated with these aspects of academic writing - offering practice in processes and strategies known to help learners improve their academic writing. The book contains a full answer key and helpful teaching notes. This second edition has been updated to reflect modern thinking in the teaching of writing, to include more recent texts in the disciplines presented and to take account of new media and the growth of online resources.

Listening

This book introduces and explains a series of tools for curriculum renewal and revitalization in English for Academic Purposes (EAP) programs, based on the experiences of the authors in successfully implementing a new curriculum in a large EAP program in North America. The book focuses on the why and how of introducing curriculum change, while also engaging critically with the realities of day-to-day classroom practice and the important issue of teacher engagement. While maintaining a principles-driven approach, each chapter is also filled with tools, samples and case study examples, grounding the book in practice and making it an essential resource for language teachers, teacher trainers, and students on TESOL and related courses.

Teaching Academic ESL Writing: Practical Techniques in Vocabulary and Grammar fills an important gap in teacher professional preparation by focusing on the grammatical and lexical features that are essential for all ESL writing teachers and student-writers to know. The fundamental assumption is that before students of English for academic purposes can begin to successfully produce academic writing, they must have the foundations of language in place--the language tools (grammar and vocabulary) they need to build a text. This text offers a compendium of techniques for teaching writing,

grammar, and lexis to second-language learners that will help teachers effectively target specific problem areas of students' writing. Based on the findings of current research, including a large-scale study of close to 1,500 non-native speakers' essays, this book works with several sets of simple rules that collectively can make a noticeable and important difference in the quality of ESL students' writing. The teaching strategies and techniques are based on a highly practical principle for efficiently and successfully maximizing learners' language gains. Part I provides the background for the text and a sample of course curriculum guidelines to meet the learning needs of second-language teachers of writing and second-language writers. Parts II and III include the key elements of classroom teaching: what to teach and why, possible ways to teach the material in the classroom, common errors found in student prose and ways to teach students to avoid them, teaching activities and suggestions, and questions for discussion in a teacher-training course. Appendices to chapters provide supplementary word and phrase lists, collocations, sentence chunks, and diagrams that teachers can use as needed. The book is designed as a text for courses that prepare teachers to work with post-secondary EAP students and as a professional resource for teachers of students in EAP courses.

English for Academic Research: Vocabulary Exercises

English in academic and professional settings has received great attention over the last 50 years, as its use has become a key asset for anyone interested in improving his/her chances of communicating internationally. However, it still offers rich opportunities for teachers and researchers working on English in specific settings. The aim of English for Professional and Academic Purposes is to offer an overview of several topics within the field of discourse analysis applied to English in academic and professional domains. The book compiles contributions from different origins, ranging from Japan to the USA and several European countries, and covers English as a native, second, foreign and international language. It also deals with various specialities, including academic writing, business discourse or English for medicine, nursing, maritime industry and science and engineering. This volume is divided into three sections: Discourse Analysis of English for Academic Purposes, Professional English and EPAP Pedagogy, since it was conceived as a contribution to the research on how English is analysed as both the discourse of and for effective communication in academic and professional settings, and how it can be applied to teaching. This manuscript offers some fresh insights for those involved or interested in this field of expertise, in an attempt to shed some light on its latest innovations.

Introducing English for Academic Purposes is an accessible and engaging textbook which presents a wide-ranging introduction to the field, covering the global and institutional position of EAP as well as its manifestations in classrooms and research contexts around the world. Each chapter provides: a critical overview introducing readers to theory- and research-

informed perspectives; profiles of practice to guide readers in putting theory to use in real world contexts; tasks, reflection exercises and a glossary to help readers consolidate their understanding; an annotated further reading section with links to online resources to enable readers to extend their knowledge. Covering both theoretical and practical issues, *Introducing English for Academic Purposes* is essential reading for students of applied linguistics, and pre-service and in-service teachers of EAP.

English for Academic Study: Extended Writing and Research Skills US Edition

English for Academic Purposes provides a comprehensive overview of the field of English for Academic Purposes (EAP) for teachers. It not only looks at study skills, but also at other central concerns of EAP, such as needs analysis, syllabus and course design, methodology and materials, learning styles, tests and exams, and academic style and genre analysis. In addition to general EAP, the author also considers subject-specific language and the production of teaching materials. Throughout, the author adopts a user-friendly approach in which theoretical considerations are balanced with practical experience. Issues are discussed and illustrated, but readers are also encouraged to form their own opinions by means of stimulating introspect and discuss sections at the end of each chapter.

Each unit includes video and audio recordings of authentic lectures from a range of academic fields, including banking, development economics, marketing, psychology and linguistics. These have been recorded in a genuine academic environment and are a perfect way to prepare for English-Medium study. The Course Book includes unit summaries to give students a quick overview of what they have covered, and a comprehensive glossary of terms. Each unit also has weblinks offering additional

information and activities, relating to both listening skills and the topics covered in the units.

Study Writing

Gives an up-to-date overview of the research into English for Academic Purposes and discusses key concepts.

English for Academic Study

This book is based on a study of referees' reports and letters from journal editors on reasons why papers written by non-native researchers are rejected due to problems with English grammar. It draws on English-related errors from around 5000 papers written by non-native authors, several hundred emails, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. The exercises include the following areas: active vs passive, use of we articles (a/an, the, zero) and quantifiers (some, any, few etc) conditionals and modals countable and uncountable nouns genitive infinitive vs -ing form numbers, acronyms, abbreviations relative clauses and which vs that tenses (e.g. simple present, simple past, present perfect) word order Exercise types are repeated for different contexts. For example, the difference between the simple present, present perfect and simple past is tested for use in papers, referees' reports, and emails of various types. Such repetition of similar types of exercises is perfect for revision purposes. English for Academic Research: Grammar Exercises is designed for self-study and there is a key to all exercises. Most exercises require no actual writing but simply choosing between various options, thus facilitating e-reading and rapid progress. The exercises can also be integrated into English for Academic Purposes (EAP) and English for Special Purposes (ESP) courses at universities and research institutes. The book can be used in conjunction with the other exercise books in the series and is cross-referenced to: English for Research: Usage, Style, and Grammar English for Writing Research Papers English for Academic Correspondence and Socializing Adrian Wallwork is the author of around 30 ELT and EAP textbooks. He has trained several thousand PhD students from 35 countries to write and present academic work.
