A sexy standalone novel from New York Times and international bestselling author Elle Kennedy! NOTE: This book was previously released in 2012 and is being reissued with a new cover and minor content changes. A good bad boy is hard to find... Seth Masterson has been lusting over Miranda Breslin since the moment he saw her on a Vegas stage. Now that he's been asked to watch out for her as she opens a dance studio in San Diego, he's all over it, figuring it's his chance to get her in his bed. Except the stubborn single mom seems determined to deny their sizzling sexual chemistry. In typical SEAL fashion, Seth makes it his personal mission to prove her wrong. Miranda got over her attraction to bad boys about the time one of them knocked her up at the age of eighteen. Seth's mocking gray eyes and military-buff bod, though, are pure and utter temptation. And when a flooded apartment forces her and her twins to move in with him, she can no longer resist the urge to set

off some serious fireworks between the sheets. But any involvement with Seth will be strictly physical—and temporary. So when Seth decides permanent is what he wants, Miranda must steel her defenses before she does something incredibly foolish...like fall in love. Warning: This book contains a bad boy SEAL who knows what he wants and will go to any lengths to get it. Expect graphic language, hot sex, seduction, hot sex, dirty talk, hot sex, a little man-on-man action. Oh, and hot sex.

Landmarks in Nephrology points the reader to some of the seminal observations which have led to the practice of nephrology as we know it today. Twenty areas of nephrology are covered by discrete chapters, with the editors selecting the ten most important papers ever published in that field. These range from observational and experimental studies from the 18th century, which laid the groundwork for our current

understanding of the kidney, through to recent randomized controlled clinical trials. The papers also reflect the emergence of nephrology as a speciality in the last fifty years, stimulated particularly by the introduction of renal biopsy and the development of dialysis and transplantation as effective forms of renal replacement therapy. For each paper, there is a succinct commentary which highlights the importance of the work in its historical context, as well as a recommended reading section to encourage the interested reader to explore further. It is of course a near-impossible task to choose only two hundred papers from the whole oeuvre of nephrology. However, these chosen few are undoubtedly among the great landmarks of nephrology, reflecting the varying coincidences of brilliance, persistence, and good fortune which are necessary for progress in medical science. Encompassing the breadth, range and depth of the intellectual journey which precedes us in the development of nephrology, they provide a telling illustration of Sir Isaac Newton's words to Robert Hooke in 1675: 'If I have seen further, it is by standing on the shoulders of giants'.

A Guide to Prayer for All Who Walk with God

Faredoon (Freddie) Junglewalla is either the jewel of the Parsi community or a murdering scoundrel. Freddie's mother-in-law, Jerbanoo, thinks he is planning to do away with her, but Freddie has always been a pragmatist: if the old woman were to die (be murdered?) the body would have to be placed on the open-roofed Towers of Silence, in keeping with custom, and that would never do. Insurance fraud and arson, however, are well within Freddie's repertoire—in fact he thinks he has invented the idea, so advanced is it for India, in 1901. As his skills grow he becomes a man of consequence among the Parsis, with people travelling thousands of miles to see him in Lahore, especially if they wish to escape tight spots they have got themselves into. In this wickedly comic novel, the celebrated author of Ice-Candy Man takes us into the heart of the Parsi community, portraying its varied customs and traits with contagious humour.

Landmarks in Humanities is a single-volume survey of global culture designed to help students of humanities, cultural history, and history of the arts to understand and appreciate the relevance of historical works and ideas to their own daily lives. In chronological sequence, Landmarks guides students on a journey of the most notable monuments of the human imagination and the most prominent ideas and issues that have shaped the course and character of the world's cultures from prehistory to the present. The landmarks that mark this journey are the great works of their place and time and, in some cases, of all time. The text reflects the author's extensive

background in the study of Humanities, which has enabled her to craft a narrative that is at once brief and comprehensive, giving students a thorough understanding of the interrelatedness of various modes of expression—art and architecture, literature, philosophy, and music--without overwhelming them with detail. Each of the text's fifteen chapters is centered on a key idea related to the period being discussed, and contains a series of valuable pedagogical features including timelines, high-quality maps, and boxed material. Each chapter also takes a unique cultural or historical point of view, often through primary sources, the stylistic relationship between two or more images and ideas or between text and image, and contemporaneous non-Western cultural landmarks and cross-cultural influences. In this edition, each chapter opens with “A First Look” at a landmark work that illustrates the key idea of the chapter and acts as a cultural guidepost to that chapter’s overarching theme. This new feature explains the artwork’s significance as a landmark in its own time as well as in ours.
