The Algebraic Theory of Spinors and Clifford  
Algebras  
The Algebraic Theory of Spinors  
Counseling  
Clients with HIV Disease

## The Algebraic Theory of Spinors and Clifford Algebras

### The Algebraic Theory of Spinors

In 1982, Claude Chevalley expressed three specific wishes with respect to the publication of his Works. First, he stated very clearly that such a publication should include his non technical papers. His reasons for that were two-fold. One reason was his life long commitment to epistemology and to politics, which made him strongly opposed to the view otherwise currently held that mathematics involves only half of a man. As he wrote to G. C. Rota on November 29th, 1982: "An important number of papers published by me are not of a mathematical nature. Some have epistemological features which might explain their presence in an edition of collected papers of a mathematician, but quite a number of them are concerned with theoretical politics ( . . . ) they reflect an aspect of myself the omission of which would, I think, give a wrong idea of my lines of thinking". On the other hand, Chevalley thought that the Collected Works of a mathematician ought to be read not only

by other mathematicians, but also by historians of science.

### **Counseling Clients with HIV Disease**

Counseling interventions are a proven and powerful way to help individuals with HIV cope with the enormous changes in their lives wrought by the disease. Proposing an innovative conceptual model for HIV clinical work, this book integrates empirical research on the psychosocial aspects of HIV with extensive case material. It provides a framework for assessing clients' psychosocial concerns and implementing interventions to facilitate adjustment; reviews medical and neurocognitive aspects of HIV disease progression; explores the psychotherapeutic context of HIV clinical work; and addresses risk reduction and prevention.
