Major New York Times bestseller Winner of the National Academy of Sciences Best Book Award in 2012 Selected by the New York Times Book Review as one of the

ten best books of 2011 A Globe and Mail Best Books of the Year 2011 Title One of The Economist's 2011 Books of the Year One of The Wall Street Journal's Best Nonfiction Books of the Year 2011 2013 Presidential Medal of Freedom Recipient Kahneman's work with Amos Tversky is the subject of Michael Lewis's *The Undoing Project: A Friendship That Changed Our Minds* In the international bestseller, *Thinking, Fast and Slow*, Daniel Kahneman, the renowned psychologist and winner of the Nobel Prize in Economics, takes us on a groundbreaking tour of the mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. He offers practical and enlightening insights into how choices are made in both our business and our personal lives—and how we can use different techniques to guard against the mental glitches that often get us into trouble. Winner of the National Academy of Sciences Best Book Award and the Los Angeles Times Book Prize and selected by The New York Times Book Review as one of the ten best books of 2011, *Thinking, Fast and Slow* is destined to be a classic.

Whitaker's Five-year Cumulative Book List

McDougal Littell Biology

Written on the occasion of copyright's 300th anniversary, John Tehranian's *Infringement Nation* presents an engaging and accessible analysis of the history and evolution of copyright law and its profound impact on the lives of ordinary individuals in the twenty-first century. Organized around the trope of the individual in five different copyright-related contexts - as an infringer, transformer, pure user, creator and reformer - the book charts the changing contours of our copyright regime and assesses its vitality in the digital age. In the process, Tehranian questions some of our most basic assumptions about copyright law by highlighting the unseemly amount of infringement liability an average person rings up in a single day, the counterintuitive role of the fair use doctrine in radically expanding the copyright monopoly, the important expressive interests at play in even the unauthorized use of copyright works, the surprisingly low level of protection that American copyright law grants many creators, and the broader political import of copyright law on the exertion of social regulation and control. Drawing upon both theory and the author's own experiences representing clients in various high-profile copyright infringement suits, Tehranian supports his arguments with a rich array of diverse examples crossing various subject matters - from the unusual origins of Nirvana's "Smells Like Teen Spirit," the question of numeracy among Amazonian hunter-gatherers, the history of stand-offs at papal nunciatures, and the tradition of judicial plagiarism to contemplations on Slash's criminal record, Barbie's retroussé nose, the poisonous tomato, flag burning, music as a form of torture, the smell of rotting film, William Shakespeare as a man of the people, Charles Dickens as a lobbyist, Ashley Wilkes's sexual orientation, Captain Kirk's reincarnation, and Holden Caulfield's maturation. In the end, *Infringement Nation* makes a sophisticated yet lucid case for reform of existing doctrine and the development of a copyright 2.0.
