Now in its third edition, this very popular guide to studying psychology remains an invaluable tool for students at both undergraduate and pre-degree level, along with those deciding whether to take psychology as an academic subject. Providing insights into the most critical aspects of studying psychology, *A Student's Guide to Studying Psychology* is distinguished from other texts by its easy to follow format and practical nature. Topics covered include: \* perspectives within psychology \* making the most of seminars, tutorials and lectures \* how to write essays and empirical reports \* guidelines on exam preparation and technique \* information on careers in psychology and tips for applying for jobs, including how to write your own curriculum vitae. For this fully updated third edition, new advice is included on web-based research and referencing. Subject coverage is expanded to include contemporary research trends in cognitive neuroscience, evolutionary psychology and positive psychology. In addition, new material investigates postgraduate specialisms including neuropsychology, psychotherapy and sport psychology.

Essay from the year 2017 in the subject Romance Languages - General, University of Birmingham, course: PGDipEd Secondary (QTS) French, language: English, abstract: In this discussion, I evaluate my practice with regards to assessment and monitoring progress. I first consider the relevant literature and explore assessment of learning and assessment for learning, as well as suggestions for monitoring pupil progress. Assessment for learning (AfL) is defined by Driscoll, Macaro and Swarbrick as: 'formative assessment and the practical implementation of this by teachers in classrooms'. Assessment of learning (AoL), often referred to as summative assessment, 'identifies the standard of attainment achieved at a particular moment in time'. I then discuss my approach in my research design, followed by a critical evaluation of my progress so far, supported by my documentary evidence. As a key part of the teaching and learning process, assessment is a frequent focus in educational research, both generally and specifically in modern languages (ML). The Office for Standards in Education state that best practice includes 'regular assessment of all four language skills', while the Department for Education (DfE) make no specific mention of assessment in the National Curriculum. This shows that there are multiple viewpoints on the importance of assessment and monitoring.
