"Being powerless to direct the current, I can only wait to see whither it runs," wrote Jefferson Davis to his wife, Varina, on October 11, 1865, five months after the victorious United States Army took him prisoner. Indeed, in the tumultuous years immediately after the Civil War, Davis found himself more acted upon than active, a dramatic change from his previous twenty years of public service to the United States as a major political figure and then to the Confederacy as its president and commander in chief. Volume 12 of The Papers of Jefferson Davis follows the former president of the Confederacy as he and his family fight to find their place in the world after the Civil War. A federal prisoner, incarcerated in a "living tomb" at Fort Monroe while the government decided whether, where, and by whom he should be tried for treason, Davis was initially allowed to correspond only with his wife and counsel. Released from prison after two hard years, he was not free from legal proceedings until 1869. Stateless, homeless, and without means to support himself and his young family, Davis lived in Canada and then Europe, searching for a new career in a congenial atmosphere. Finally, in November 1869, he settled in Memphis as president of a life insurance company and, for the first time in four years, had the means to build a new life. Throughout this difficult period, Varina Howell Davis demonstrated strength and courage, especially when her husband was in prison. She fought tirelessly for his release and

to ensure their children's education and safety. Their letters clearly demonstrate the Davises' love and their dependence on each other. They both worried over the fate of the South and of family members and friends who had suffered during the war. Though disfranchised, Davis remained careful but not totally silent on the subject of politics. Even while in prison, he wrote without regret of his decision to follow Mississippi out of the Union and of his unswerving belief in the constitutionality of state rights and secession. Likewise, he praised all who supported the Confederacy with their blood and who, like himself, had lost everything.

This book contains tutorial and review articles as well as specific research letters that cover a wide range of topics: (1) dynamics of atmospheric variability from both basic theory and data analysis, (2) physical and mathematical problems in climate modeling and numerical weather prediction, (3) theories of atmospheric radiative transfer and their applications in satellite remote sensing, and (4) mathematical and statistical methods. The book can be used by undergraduates or graduate students majoring in atmospheric sciences, as an introduction to various research areas; and by researchers and educators, as a general review or quick reference in their fields of interest. Contents: Dynamics of Atmospheric Variability Climate Modeling and Numerical Weather Prediction Radiative Transfer and Remote Sensing Mathematical Method Readership: Graduate students, academics and researchers in meteorology/climatology, as well as East Asian weather-forecasting services. Keywords: Atmospheric Variability; Climate Modeling; Numerical Weather Prediction; Atmospheric Radiation; Satellite Remote Sensing

"The Catalogue has been prepared with a view to accomplish two objects. One, to offer an inventory of all the books on the shelves of the Reference Department of the Manchester Free Library: the other, to supply a ready Key both to the subjects of the books, and to the names of the authors." - v. 1, the compiler to the reader.

Soil Survey Papers

Some observations on the 'Remarks of commander Montriou on the malignant attacks on him by dr. Buist, which have appeared in the Bombay times, since 1847', by their subject

Miscellaneous Papers of the University Observatory, Oxford

Accounts and papers

SPIE Milestones are collections of seminal papers from the world literature covering important discoveries and developments in optics and photonics.

Papers Presented at the WMO Technical Conference on Regional and Global Observation of Atmospheric Pollution Relative to Climate, Boulder, 20-24 August 1979

Meteorological Papers

These film contain the papers and publications that were the product of a project to study the sociological history of the people of Britain from 1937-1945 and beyond.
