The popularity of beading is at an all-time high, and it's a great choice for beginners because the supplies are inexpensive and easy to come by, and readers can get terrific results with just an hour or two of practice. Beaded Bugs features 30 options based on just six basic prototypes, so you can quickly pick up the basics and build on your skills. The projects are graded by difficulty level, so you can start with your very first quick and simple butterfly or move on to more complex bees and beetles. Each project also includes full-color photos, illustrations, and step-by-step pattern instructions. The finished bugs can be turned into beautiful, unique jewelry, or adornments for key rings and cell phones. They make great gifts, too. The cute critters in Beaded Bugs are based on real species, and the book also includes a few fun facts on each bug to read as you bead. decades-old radar networks. These agencies including the National Oceanic and Atmospheric Administration (NOAA) National Weather Service (NWS), the Federal Aviation Administration (FAA), the Department of Defense (DOD) and the Department of Homeland Security (DHS) have many and varied requirements and possible applications of modern radar technology. This book analyzes what is lacking in the current system, the relevant capabilities of phased array technology, technical challenges, cost issues, and compares possible alternatives. Both specific and overarching recommendations are outlined.

This title is directed primarily towards trainee psychiatrists sitting MRCPsych or similar exams and qualified psychiatrists. It summarizes information on a wide range of topics such as important journal articles, clinical trials, government White Papers, guidelines and rating scales which are vital for both good exam performance and clinical practice, but which are not available elsewhere between one set of covers. Brings together information from disparate sources on the major areas of psychiatry - saves much trawling through journals and other sources. Covers the vital areas for each topic as relevant - summaries of journal articles, clinical trials, government directives, national guidelines. Presents the information

in an easily accessible form through the use of bullet points, lists, tables and diagrams. Invaluable for the hard pressed exam candidate revising for the essay paper and clinical sections of Part II of the MRCPsych and similar exams. Also highly relevant for psychiatric CPD and for day to day practice.

Nineteen thirty-nine Hawaii: two Hollywood actresses, the artillery brigade's handsomest officer and finest polo player, the polo player's beautiful wife, a Japanese carrier pilot who is sketching the aerial approach to Pearl Harbor, and the captain of the sketcher's sampan unite in a mélange of passionate encounters that find coherence in the symbology of a Tahitian black pearl. Sidelights are the gold mesh necklace concealed in the God Kane's chest and the emerald cut diamond lost in the sand of the officer's beach at Waialua. BookWire Review January 23, 2006 Bidwell Moore's fast-paced novella recreates 1939 military and social life in Hawaii as it existed just a few years before the attack on Pearl Harbor that

changed the tranquil islands forever. Moore intertwines the lives of a cast of interesting characters, including two glamorous Hollywood actresses, a group of soldiers and their wives, and quirky island locals, as well as a Japanese carrier pilot who is sketching the aerial approach to Pearl Harbor. Charlotte Ross is a beautiful, young, military wife who is also a treasure hunter. She is trying to discover the identity of the owner of a gold mesh necklace concealed in a statue of the island god Kane. While searching for sea treasure, Charlotte survives a near-fatal accident and has a brief but memorable encounter with a handsome Japanese pilot that will forever change her life. Later, a mysterious black pearl is sent to her. To help her solve the mystery of the pearl, Charlotte employs the help
