## **The Weather Machine**

In *We Are the Weather*, Jonathan Safran Foer explores the central global dilemma of our time in a surprising, deeply personal, and urgent new way. Some people reject the fact, overwhelmingly supported by scientists, that our planet is warming because of human activity. But do those of us who accept the reality of human-caused climate change truly believe it? If we did, surely we would be roused to act on what we know. Will future generations distinguish between those who didn't believe in the science of global warming and those who said they accepted the science but failed to change their lives in response? The task of saving the planet will involve a great reckoning with ourselves—with our all-too-human reluctance to sacrifice immediate comfort for the sake of the future. We have, he reveals, turned our planet into a farm for growing animal products, and the consequences are catastrophic. Only collective action will save our home and way of life. And it all starts with what we eat—and don't eat—for breakfast.

### **Elmer's Weather Board Book**

The first behind-the-scenes look at the life of the most enigmatic First Lady in U.S. history Melania Trump is an enigma. Regardless of your political leanings, she is fascinating—a First Lady who, in many ways, is the most modern and groundbreaking in recent history. A former model whose beauty in person leaves people breathless, a woman whose upbringing in a communist country spurred a relentless drive for stability, both for herself and for her family. A reluctant pillar in a controversial presidential administration who speaks five languages and runs

the East Wing like none of her predecessors ever could—underestimate her at your own peril (as a former government official did and was summarily fired). But who is she really? In *Free, Melania* we get an insider's look at Melania Trump, from her childhood in Slovenia to her days in the White House, and everything in between. We see the Trump family dynamics that Melania has had to navigate, including her strained relationship with Ivanka. We get a rare glimpse into what goes into her famous and sometimes infamous clothing choices (including perhaps the real message behind Melania's controversial jacket, "I Really Don't Care, Do U?", which she wore while visiting the U.S.-Mexico border), and how a publicly quiet Melania actually speaks very loudly—if you just know where, and how, to listen. And we get a behind-the-scenes look at her often eyebrow-raising relationship with Donald Trump, from their beginnings to becoming the most unusual First Family in modern history. Looking at Melania in the pantheon of historic First Ladies, Kate Bennett shows just how different Melania Trump is and why she matters. Bennett, an expert on First Ladies, has unparalleled access to Melania's very small and loyal inner circle. As she shows in this page-turning book, the seemingly most reluctant First Lady is, in many ways, the most compelling and complex First Lady, ever.

### **What's the Weather?**

A 2018 New York Times and New York Public Library Best Illustrated Picture Book When Mae's family moves to a new home, she wishes she could bring her garden with her. She'll miss the apple trees, the daffodils, and chasing butterflies in the wavy grass. But there's no room for a garden in the city. Or is

there? Mae's story, gorgeously illustrated in watercolor, is a celebration of friendship, resilience in the face of change, and the magic of the natural world.

### **Hello, World! Weather**

From the acclaimed author of *Tubes*, a lively and surprising tour through the global network that predicts our weather, the people behind it, and what it reveals about our climate and our planet. The weather is the foundation of our daily lives. It's a staple of small talk, the app on our smartphones, and often the first thing we check each morning. Yet, behind all these humble interactions is the largest and most elaborate piece of infrastructure human beings have ever constructed—a triumph of both science and global cooperation. But what is the weather machine, and who created it? In *The Weather Machine*, Andrew Blum takes readers on a fascinating journey through the people, places, and tools of forecasting, exploring how the weather went from something we simply observed to something we could actually predict. As he travels across the planet, he visits some of the oldest and most important weather stations and watches the newest satellites blast off. He explores the dogged efforts of forecasters to create a supercomputer model of the atmosphere, while trying to grasp the ongoing relevance of TV weather forecasters. In the increasingly unpredictable world of climate change, correctly understanding the weather is vital. Written with the sharp wit and infectious curiosity Andrew Blum is known for, *The*

Weather Machine pulls back the curtain on a universal part of our everyday lives, illuminating our changing relationships with technology, the planet, and our global community.

## **Hello, World! How Do Apples Grow?**

"Every child in the world has a birthday. But how children celebrate this occasion depends on where they live. In this latest addition to the Around the World series, award-winning author Margriet Ruurs explores the fascinating ways that children experience birthdays. You'll meet fourteen kids from different countries, each celebrating a birthday according to their local traditions. Bram from Belgium

never gets to sleep in on his birthday - his family wakes him up by clanging pots and pans. For Ninoshka in India, it's important to give thanks to the Hindu gods and share sweets with her classmates. And some kids don't celebrate their birthdays at all. Instead, Phúc Khang in Vietnam celebrates Tet, when everyone in the country turns one year older. A world map that pinpoints the countries in the book, a Note to Parents and Teachers with interactive activities and a glossary of foreign words and phrases help to enrich the reading experience. Based on interviews with real people from each country, Birthdays Around the World is an invitation to experience a different culture, think about your own birthday celebrations and even learn how to say "Happy Birthday" in another language (like Hawaiian: "Hau oli la hanau" [ho-O-lee LA HA-now])!"--
