While we are commonly told that the distinctive method of mathematics is rigorous proof, and that the special topic of mathematics is abstract structure, there has been no agreement among mathematicians, logicians, or philosophers as to just what either of these assertions means. John P. Burgess clarifies the nature of mathematical rigor and of mathematical structure, and above all of the relation between the two, taking into account some of the latest developments in mathematics, including the rise of experimental mathematics on the one hand and computerized formal proofs on the other hand. The main theses of Rigor and Structure are that the features of mathematical practice that a large group of philosophers of mathematics, the structuralists, have attributed to the peculiar nature of mathematical objects are better explained in a different way, as artefacts of the manner in which the ancient ideal of rigor is realized in modern mathematics. Notably, the mathematician must be very careful in deriving new results from the previous literature, but may remain largely indifferent to just how the results in the previous literature were obtained from first principles. Indeed, the working mathematician may remain largely indifferent to just what the first principles are supposed to be, and whether they are set-theoretic or category-theoretic or something else. Along the way to these conclusions, a great many historical developments in mathematics, philosophy, and logic are surveyed. Yet very little in the way of background knowledge on the part of the reader is presupposed.

Now for the first time the Bible students will have a lexicon/dictionary with every one of the original 8,674 Hebrew words, and also every one of the 5,624 Greek words of the Scriptures included in it.. For ninety-five out of the hundred times the Bible student, preacher, Bible class teacher, or the host of God's saints who study to show themselves workmen unashamed (2 Tim. 2:15), this quick reference, easy-to-use lexicon is a jewel. You will literally wear it out, using it weekly, if not daily. The words are alphabetical in order. This is important with the Hebrew words in particular. For the most used Hebrew lexicon is the Brown-Driver-Briggs Hebrew-Aramaic Lexicon. And one must know the root word to look up Hebrew entries in that lexicon, or else they must have a multi-paged index to it. This brief lexicon can even be used instead of the Brown-Driver Briggs Lexicon in most cases when anyone desires a quick reference to the grammatical construction and the meaning of a word. For the fact is, this lexicon is an abbreviated edition of the Brown-Driver Briggs Lexicon, most of the information coming from that great work. Yet this little lexicon contains more information than can be found in B-D-B. Proper names appear in alphabetical order, often with their meanings. Derivation of words is given. More grammatical information is given than is in the larger lexicon. The Greek section also provides coding to Strong's Exhaustive Concordance, and it gives page references to Thayer's Greek-English Lexicon, Arndt-Gingrich Greek-English Lexicon, and, Kittel's Theological Dictionary. The reader will learn to

appreciate these quick and easy references by use of the Arabic numbers in numerical order, coupled with the original language. This handy, quick study tool will revolutionize study of the Bible, saving a multitude of hours of study, yet providing comprehensive information not available in any other existing volume. The savings in time alone is enough to recommend this handy little lexicon. The fact that it contains both the Hebrew-Aramaic words and the Greek words in a single easy-to-access volume is a time-saver not to be found in any other book (it appears that no previous book has contained both the 8,674 Hebrew words and the 5,624 Greek words, with their meanings, and other items of information, which the student of either language can use with ease.) Maurice A. Robinson (PhD) is Associate Professor of Greek at Southeastern Baptist Theological Seminary in Wake Forest, South Carolina. Jay P. Green, Sr. (1918-) is Translator and Editor of The Interlinear Hebrew-Greek-English Bible and the translator of the Modern King James Version of the Holy Bible, the Teenage Version of the Holy Bible, the Literal translation of the Holy Bible and the KJ3-Literal Translation Bible. He has written numerous books on textual criticism.
