Cambridge IGCSE® Physics Practical Workbook

The University of Cambridge Anthologies of Poetry and Stories. Stories of Ourselves is a set text for the Cambridge Literature in English courses at IGCSE, O Level, AS and A Level. The anthology contains stories by writers from many different countries and cultures.

Physics for You

As the human race continues to pursue a better understanding of nature, the world, and the limitless universe, physics continues to play an increasingly important role in our existence. Author Brian Mills, CPhys, MInstP, makes a passionate contribution to the field by improving physics education and fostering a deeper public interest in the subject. This guide, while specifically designed for students preparing to take the GCSE or IGCSE examinations, will appeal to anyone interested in a deeper understanding of physics. With Mills's accessible explanations, it is also an indispensable tool for teachers wanting to incorporate more physics into their science curriculum-even if they don't have the formal training to instruct the subject at a higher level. Comprehend the mathematics.

Master the formulae. Take the practice tests to assess your understanding, and check your success using the answer key tucked into the back of the book. You will find yourself developing a skill set in a way you never expected, acing those intimidating examinations and gaining a more informed perspective of the world, and universe, around you!

Physics

This full-colour title is fully in line with the new separate-subject GCSE physics specifications, including IGCSE. It is appropriate for use throughout the world for GCSE studies. The language level and design have been carefully refined to make the book accessible to students of all abilities. Features to assist preparation for examinations include key topic lists at the start of each chapter, key ideas summaries at the end of each chapter, self-assessment questions throughout the text and sections of longer examination-style questions. A key feature is the extensive use of detailed worked examples that guide students through the concepts, particularly the mathematical ideas. Differentiation is built in via the use of colour-coded extension material for higher achievers. In addition, novel contexts are used to illustrate the concepts; students will find this book appealing and accessible

Oxford International AQA Examinations: International A Level Physics

"Gibbons begins with a strong theoretical underpinning for her practice, drawing on a functional model of language, sociocultural theories of learning, and current

research on second-language development. After supporting her view that the regular curriculum offers the best language-learning environment for young ESL students, Gibbons demonstrates the ways in which content areas provide a context for the teaching of English skills, from speaking and listening to reading and writing. These skills can be integrated in the learning of diverse subjects as Gibbons illustrates with a wide range of teaching and learning activities across the curriculum, supplemented with programming and assessment formats and checklists."--BOOK JACKET.
