The Second Son

Based on the best-selling Calculus and Its Applications by Marv Bittinger, this new text is appropriate for a two-semester calculus course for life science majors. With four new chapters and two new co-authors, Calculus for the Life Sciences continues the Bittinger reputation as one of the most student-oriented and clearly written Applied Calculus texts available. The exercises and examples have been substantially updated to include additional relevant life science applications and current topics.

Hegel's Logic

Clark Butler presents an innovative analysis of Hegel's most challenging work in Hegel's Logic -- the first major English-language treatment of Hegel's Science of Logic to appear in nearly fifteen years. Although earlier commentators on the Logic have considered standard analytical philosophy-and with it modern logic-in opposition to Hegel. Butler views it as a legitimate approach in terms of which Hegel needs to be understood. This interpretation allows him to address the rigor of Hegel's thought on several levels as at once an exercise in purely conceptual redefinition and a full-bodied work in metaphysical ontology and even theology. The result is an account of the Logic intelligible to analytical philosophers as well as non-specialists.

Calculus for the Life Sciences

Dr. S. Franklin Logsdon, Bible teacher and evangelist, says of this book: "These principles of Bible study by Dr. J. Edwin Hartill have been tested and proved in his own personal teaching for many years. They are succinct, pointed, practical, original, understandable -- simple keys to unlock the storehouse of Scripture to things both old and new. This publication makes a distinct contribution to Bible lovers in their search for increased knowledge of divine truth. It is a privilege and an honor to commend it to God's people." Using a graphic combination of text, charts, and outlines, Dr. Hartill states, "I trust that as you study these principles, your understanding of the Word and your love for its truth may deepen, so that you may more ably pass it on to others."

Wireless Sensor Networks

Ethnic Group Politics

The Second Son is a powerful drama, taut with international intrigue that reaches from the Vatican to the White House. But The Second Son also tells a story of passionate love between both a man and a woman, and between man and God. It offers entertainment as unforgettable as it is provocative.

Principles of Biblical Hermeneutics

Wireless Sensor Networks presents the latest practical solutions to the design issues presented in wireless-sensor-network-based systems. Novel features of the text, distributed throughout, include workable solutions, demonstration systems and case studies of the design and application of wireless sensor networks (WSNs) based on the first-hand research and development experience of the author, and the chapters on real applications: building fire safety protection; smart home automation; and logistics resource management. Case studies and applications illustrate the practical perspectives of: · sensor node design; · embedded software design; · routing algorithms; · sink node positioning; · co-existence with other wireless systems; · data fusion; · security; · indoor location tracking; · integrating with radio-frequency identification; and · Internet of things Wireless Sensor Networks brings together multiple strands of research in the design of WSNs, mainly from software engineering, electronic engineering, and wireless communication perspectives, into an over-arching examination of the subject, benefiting students, field engineers, system developers and IT professionals. The contents have been well used as the teaching material of a course taught at postgraduate level in several universities making it suitable as an advanced text book and a reference book for final-year undergraduate and postgraduate students.
