The Book of Telling

Trapped in a job or business that's "just not you"? Always dreaming of your next vacation or living for the weekend? Marianne Cantwell's straight-talking bestseller will help you break out of that career cage and Be A Free Range Human. It's about much more than just quitting your job and becoming your own boss. It's about life on your terms, working when, where and how you want - so you don't have to fit yourself into someone else's box to make a great income. This second edition won't just inspire you, it will give you unconventional and practical steps to: - Discover what you really want to do with your life (even if no answer has ever fully fit) - Get started in 90 days, with what you have - Create a free range career, tailor-made for you and the life you want (be it travelling the world or hanging out in your favourite café) - Stand out from the crowd and get paid well to be you Be A Free Range Human was one of the first and most popular guides to creating a custom career (without an office or a boss). Updated with new advice on how to make free range work for your personality (you don't need to be a constantly-networking extrovert. have an MBA, or get funding), this smart, energizing guide will help you cut through the noise, see your options in a new way, and get the freedom and fulfilment you crave.

The Mystic Spiral

As the inward-winding labyrinth, it constitutes the hero's journey to the still center where the secret of life is found. As the spherical vortex, spiraling through its own center, it combines the inward and outward directions of movement. In this original and engrossing book, Jill Purce traces the significance of one man's central symbols from the double spirals of Stone

Age art and the interlocking spirals of the Chinese Yin Yang symbol to the whorls of Celtic crosses, Maori tattoos and the Islamic arabesque. Many of the superb images here were intended as objects of contemplation; for the spiral is a cosmic symbol. Art and Imagination series: These large-format, gloriously-illustrated paperbacks cover Eastern and Western religion and philosophy, including myth and magic, alchemy and astrology. The distinguished authors bring a wealth of knowledge, visionary thinking and accessible writing to each intriguing subject.

Energies of Transformation

Numerous books have been published over the past few decades on the subject of the apparent similarities between Eastern philosophy and the ideas of the "New Physics." However, without exception, these writings have failed to address the real meaning of "As above, so below" that the macrocosm of the universe is mirrored in the microcosm of the human body, and that the archetypal patterns of structure on the causal and astral levels of reality have their lower reflections on the physical level of being. In *The Science of the Soul*, Geoffrey D. Falk corrects this significant oversight. Drawing equally from yogic, Buddhist, Christian and Taoist sources, Falk shows that it is only by considering the detailed structure of the cosmos and the microcosmos that we can understand both the unified message which the scriptures have tried to convey, and their precise relation to the physicists' understanding of the physical level of reality - in particular, the ideas of David Bohm and Itzhak Bentov. I endorse whole-heartedly the road you have traveled. Light is a - perhaps the - powerful entry point to Spirit, and you ring the changes on it well. It's a book I would like to have on my shelves to refer to. Huston Smith, Ph.D., author, *The World's Religions Combines* astutely some of the great wisdoms of the spiritual world with the emerging understanding of the physical universe. Dr. James Fadiman, Board of Editors, *The Journal of Transpersonal Psychology* As a heroic journey of the mind into the mysterious realm of consciousness and maya in a vehicle fitted with the wheels of modern science and powered by the engine of yoga, the book merits a close study. S. Srinivasachar, The Ramakrishna Institute

Altered Perceptions

Many people have heard of the extraordinary phenomenon of kundalini awakening, and over the years, a growing number of men and women have had firsthand encounters. In some cases, the experience involves very disturbing physical and psychological effects. This volume, which has sold 50,000 copies, documents numerous case studies to demystify the process & reassure those who sometimes fear for their own sanity.

Biocentrism

The Message of a Master is the story of a seemingly miraculous change that takes place in a man after he meets a true master of life. He learns, and shares with us, teachings that allow him to develop his powers so that he can accomplish anything he desires.

The Initiate; Some Impressions of a Great Soul

Admitting I'm nuts would mean that the journey has not been real. *Memoirs of a Schizophrenic Goddess* begins with the murder of John Lennon. The superstar's spirit leads me to a book on science, ritual and religion called *Tantrism*. In the book I find pictures of a woman spinning in a circle. Finally there is a reason for the dance that I've been hiding in all of my life. According to the book I am a goddess, but the book is too difficult to understand, the science is too complex. To understand the journey I must read every book in the library. That's millions of books. Adding to my misery are the voices and the visions. Jesus and The Virgin are flesh and blood in my world, and devil-fighting rituals are a way of life. Exhausting my resources I search for help. No one wants to listen. I am encouraged to be quiet, not to let my "craziness" surface. That doesn't work for me because the journey is real.

Memoirs of a Schizophrenic Goddess

This book calls on research and experience to take a new look at the practices of dowsing, such as "water-witching" and other such mechanical techniques to obtain information not available to the physical senses, and to examine the astonishing psychological and psychic consequences.

Nursing Theories and Nursing Practice

An Orthodox rabbi who studied with Native American healers explores the parallels between shamanic beliefs and practices and the tribal roots of Judaism, including Jewish traditions concerning the four directions; the medicinal attributes of animals, plants, and minerals; and the sacredness of the earth and the heavens.

Digital Consciousness: A Transformative Vision

The Science of the Soul

Suppose you could communicate with a visitor who was not from this place, time-space or even this dimension? What would

you want to ask them? The answers probably lie in what our own response would be if we were them. This book is based on a collection of interviews I have had with a few individuals who may have actually had such an experience. The idea is that if enough of us are ready to ask the questions and gain the answers, then our collective knowledge and understanding of the "multiverse" about us can only continue to be enhanced. Sometimes the responses that you will read here are similar; often they are diametrically opposed to each other. An open but highly skeptical mind is extremely necessary if you are going to sift through the data that is presented in this book. The intent is that it should peak your curiosity to learn more about "visitors." In this way, we may be better informed and prepared, and thus in some sort of coherent shape to deal with their arrival. If you read this book, you must be well prepared to choose for yourself what you will or will not believe.

Dowsing for Higher Consciousness

Robert Lanza is one of the most respected scientists in the world a US News and World Report cover story called him a genius and a renegade thinker, even likening him to Einstein. Lanza has teamed with Bob Berman, the most widely read astronomer in the world, to produce Biocentrism, a revolutionary new view of the universe. Every now and then a simple yet radical idea shakes the very foundations of knowledge. The startling discovery that the world was not flat challenged and ultimately changed the way people perceived themselves and their relationship with the world. For most humans of the 15th century, the notion of Earth as ball of rock was nonsense. The whole of Western, natural philosophy is undergoing a sea change again, increasingly being forced upon us by the experimental findings of quantum theory, and at the same time, toward doubt and uncertainty in the physical explanations of the universes genesis and structure. Biocentrism completes this shift in worldview, turning the planet upside down again with the revolutionary view that life creates the universe instead of the other way around. In this paradigm, life is not an accidental byproduct of the laws of physics. Biocentrism takes the reader on a seemingly improbable but ultimately inescapable journey through a foreign universe our own from the viewpoints of an acclaimed biologist and a leading astronomer. Switching perspective from physics to biology unlocks the cages in which Western science has unwittingly managed to confine itself. Biocentrism will shatter the readers ideas of life--time and space, and even death. At the same time it will release us from the dull worldview of life being merely the activity of an admixture of carbon and a few other elements; it suggests the exhilarating possibility that life is fundamentally immortal. The 21st century is predicted to be the Century of Biology, a shift from the previous century dominated by physics. It seems fitting, then, to begin the century by turning the universe outside-in and unifying the foundations of science with a simple idea discovered by one of the leading life-scientists of our age. Biocentrism awakens in readers a new sense of possibility, and is full of so many shocking new perspectives that the reader will never see reality the same way again.

Transcending the Speed of Light

What could be a more compelling read than a book that explains the greatest mysteries known to man in one fell swoop. Who is God? What happens after we die? What the heck is quantum entanglement? Why did Dolly's braces disappear in the movie "Moonraker?" Our reality is not what it appears to be. The latest physics experiments demonstrate that an objective reality doesn't exist. And no one truly knows what consciousness is or where the mind resides. Strange interconnectedness, anomalous events, and changing histories confound even the most open-minded of scientists. No single theory seems to be able to explain it all. Until now.

Health as Expanding Consciousness

From its arrival on earth to the vast areas it traverses before emptying into the sea, water holds all the knowledge and experience it has acquired. As phenomenal as it may seem, water carries its whole history, just as we carry ours. It carries secrets, too. In *The Secret Life of Water*, bestselling author Masaru Emoto guides us along water's remarkable journey through our planet and continues his work to reveal water's secret life to humankind. He shows how we can apply its wisdom to our own lives, and how, by learning to respect and appreciate water, we can better confront the challenges that face the twenty-first century—and rejuvenate the planet.

Kundalini--psychosis Or Transcendence?

The space-time continuum of physics ignores the realm of the mind. But consciousness is unconfined by space or time and represents a higher organizing principle, a fifth dimension, that transcends the speed of light. Marc Seifer examines relativity, ether theory, precognition, telepathy, and synchronicity, all from the perspective of the conscious universe.

Women's Intuition

The Hidden Intelligence explores what intuition is and is not, and why it is often hidden. Based on interviews with executives from Fortune 500 organizations to entrepreneurial startups, the book is full of insights the author has gathered over the years working with creative problem solving and ideation techniques. It brings our intuition into the mainstream of those skills crucial to running a successful business. *The Hidden Intelligence* explores how intuition in its various forms helps to create new products and marketing strategies at large and organizations. It explains what is and what is not intuition, why it is often hidden, and demonstrates that when it is used correctly, the intuitively-based decision is always correct. Sandra Weintraub began Management Resources over twenty years ago as a training and management development consulting firm. She has provided training for Fortune 500, educational, and governmental organizations, served as an adjunct professor in management skills at Brandeis University, and published several articles on management

and intuition.

Shaman of Tibet

For the author of this book, disease is not an "enemy" that strikes a "victim." Rather, health and disease comprise a unitary whole of individual and environment. Health as Expanding Consciousness is an inspiration to those seeking a full experience of personal health.

Tractatus Logo-philosophicus

The Message of a Master is the story of a seemingly miraculous change that takes place in a man after he meets a true master of life. He learns, and shares with us, teachings that allow him to develop his powers so that he can accomplish anything he desires.

Future Memory

There are many different paths to the future. According to P.M.H. Atwater, one of the foremost investigators into near-death experiences, future memory allows people to "live" life in advance and remember the experience in detail when something triggers that memory. Atwater explains the unifying, and permanent, effect of that experience is a brain a "brain shift" which she believes "may be at the very core of existence itself." In Future Memory, Atwater shows that structural and chemical changes are occurring in our brains, changes indicative of higher evolutionary development. This mind-blowing exploration of a mind-blowing topic traces her findings about this phenomenon and explores its implications for the individual and for society. Future Memory: Provides a series of steps to assist in developing future memory Explores new models of time, existence, and consciousness Presents an in-depth study of the brain shift and how it can be experienced Offers an extensive appendix and resource manual Future Memory is an important step in understanding the relationship between human perception and reality.

Be A Free Range Human

Sharona Ben-Tov Muir discovered after the death of her father, inventor and New Age guru Itzhak Bentov, that he had created Israel's first rocket. A secret group of scientists working in a rooftop shed, the "Science Corps," of which he was a part, invented weapons during Israel's war of independence and later developed Israel's nuclear resources and other major scientific projects. Bentov, however, settled in Boston and made his fortune with such medical inventions as a cardiac

catheter, which he created in his home laboratory, where Muir played as a child. Haunted by the question of why her father had never discussed his past, Muir traveled to Israel to find the Corps. Through her own memories and the memories they share, Muir comes to know the brilliant, impassioned, and creative young Bentov as he demonstrates his latest invention for her, takes her canoeing, and reveals his thoughts about consciousness and the cosmos. Muir elegantly evokes the hubbub of Jerusalem streets, the wartime adventures of her hosts, and the inner lives of Israelis. The resulting story of invention and self-invention, of the Corps's wartime experience as told for the first time, and of a deep, abiding love between father and daughter is an incandescent memoir. The author provides a new preface for this new Bison Books edition.

A Cosmic Book

This book is about the subtle energy of the life force, the pure consciousness beyond mind and the ecstatic experience of spiritual awakening. It also tells of physical collapse, psychic chaos, and personality upheaval, those elements of human transformation that uproot individuals to the core. It tells the stories of people, both ancient and modern, who have discovered and integrated an experience that pushes the edges of their sanity and their divinity. And it is a guide for survival and transformation. It appears that when people pray, meditate, or turn inward with great intensity to find God, what they may ultimately experience is the sat-chit-ananda of the ancient Indian scriptures. Sat is existence or beingness, the substance or essence that is all things. Chit is cosmic intelligence or knowledge that fills everything, a consciousness without personal identity. Ananda is ecstatic bliss. Indian pandits identify these three qualities as the essential nature of existence. Direct intuition of them becomes possible following the eruption of Kundalini energy, which is latent in each of us. This book is to help you recognize and support a unique, universal and ageless process related to spiritual experience and psychological wholeness and identified in ancient times as Kundalini awakening.

The Hidden Intelligence

From Christian believers in the Apocalypse and the Rapture to New Age enthusiasts of prophecies concerning the year 2012, Doomsday lore has been a part of culture, a myth that colors how we perceive the world. Why do we remain obsessed with Doomsday myths even when they fail to materialize? What if we haven't recognized the true message of these myths? Blending history, psychology, metaphysics, and story, philosopher and author Joseph Felser explores the spiritual questions raised by these enduring myths. Along the way he consults the work of Joseph Campbell, Carl Jung, Marie-Louise von Franz, Black Elk, Wovoka, Itzhak Bentov, Jane Roberts, Seth, Hermann Hesse, Ingo Swann, David Bohm, Fred Alan Wolf, J. Allen Boone, William James, and Robert Monroe through ever-widening circles of understanding. Felser suggests that our obsession with "The End of the World" hides a repressed, healthy longing for reconciliation with our inner and outer worlds--with nature and our own natural spirituality. He urges us to recognize and act upon that longing. When we begin to listen to nature's voice and pay heed to our own dreams--including visions, intuitions, and instinctive promptings--the greatest revolution in all history will unfold. We can create a future of our own choosing, a beginning rather than an ending.

The Message of a Master

In recent years, alternative historians have gained remarkable insight into the mysteries of ancient Egypt—but according to Lynn Picknett and Clive Prince, their discoveries tie into a dangerous conspiracy nearly fifty years in the making. At the center of this conspiracy is a group of respected, powerful individuals who believe that the ancient Egyptian gods are really extraterrestrials who will soon return to earth. The conspirators have intimate and exclusive knowledge of this momentous second coming—but they insist on keeping it to themselves. What could be the purpose of such a conspiracy? Why are the conspirators so desperate to keep their information a secret? And what does it mean for mankind? In this riveting, well-researched book, Picknett and Price offer compelling evidence that the conspiracy exists—and expose the insidious motivations of the individuals and organizations behind it.

Stalking the Wild Pendulum

While a rational consciousness grasps many truths, Gananath Obeyesekere believes an even richer knowledge is possible through a bold confrontation with the stuff of visions and dreams. Spanning both Buddhist and European forms of visionary experience, he fearlessly pursues the symbolic, nonrational depths of such phenomena, reawakening the intuitive, creative

impulses that power greater understanding. Throughout his career, Obeyesekere has combined psychoanalysis and anthropology to illuminate the relationship between personal symbolism and religious experience. In this book, he begins with Buddha's visionary trances wherein, over the course of four hours, he witnesses hundreds of thousands of his past births and eons of world evolution, renewal, and disappearance. He then connects this fracturing of empirical and visionary time to the realm of space, considering the experience of a female Christian penitent, who stares devotedly at a tiny crucifix only to see the space around it expand to mirror Christ's suffering. Obeyesekere follows the unconscious motivations underlying rapture, the fantastical consumption of Christ's body and blood, and body mutilation and levitation, bridging medieval Catholicism and the movements of early modern thought as reflected in William Blake's artistic visions and poetic dreams. He develops the term "dream-ego" through a discussion of visionary journeys, Carl Jung's and Sigmund Freud's scientific dreaming, and the cosmic and erotic dream-visions of New Age virtuosos, and he defines the parameters of a visionary mode of knowledge that provides a more elastic understanding of truth. A career-culminating work, this volume translates the epistemology of Hindu and Buddhist thinkers for western audiences while revitalizing western philosophical and scientific inquiry.

Brother of the Third Degree

Unlock the Boundless Power of Your Intuition We've all experienced moments of "knowing" that defy logic and reason. But just what is this extra sense and how does it work? Why do certain life experiences—falling in love, feeling intense grief, having a near-death experience—seem to bring it on? Let this thoughtful and illuminating guide help you coax out your own intuitive wisdom.

Rocket Fuel on a Budget

Anyone interested in the inner reaches of the mind, the greater structure of the cosmos, and the spiritual evolution of humanity will find this book an informed and delightful read. Bentov explains the Kabbalistic principles of number and sound, the meaning of cosmic symbols, and ultimately, shows that the universe and thought are inseparable.

The Incomplete Guide to Yoga

Have you ever tried to wrap your head around quantum physics? Have you ever tried to comprehend concepts of time and space that have been popularized by the promoters of the "new physics" and various eastern teachers? If you have, chances are either that your eyes glazed over or you felt as if your head might explode at any moment. Here for the first time, the concepts that have been propounded by the great thinkers and teachers of the twentieth century are made

accessible in an illustrated guide. More importantly, this material is presented in a way that is non-threatening and fun. Using simple and delightful illustrations throughout, *Favour*, explores: The paradigm shift that has occurred, whether we are ready or not. How quantum physics and the new technology has challenged our experience of time and space. How the spiritual thought of East and West have melded. The relationship of self to oneness, of form to emptiness.

The Myth of the Great Ending

Triad Press is proud to offer this hardcover cloth-bound edition of *Brother of the Third Degree* as part of our "Classics of the Western Mystery Tradition" series. Originally published in 1894, this volume continues to inspire seekers on the initiatic path as well as those who are fascinated with the Western Mysteries. While this volume contains a fictionalized account of initiation, those with eyes to see and ears to hear will recognize that a wealth of hermetic and esoteric principles are revealed within its prose.

The Universe in Black and White

How can we rethink teaching practices to include and engage the whole student? What would student experience look like if we integrated silence and feeling with empirical analysis? *Tuning the Student Mind* is the story of one teacher's attempt to answer these questions by creating an innovative college course that marries the spiritual and the theoretical, integrating meditation and self-reflection with more conventional academic curriculum. The book follows Molly Beauregard and her students on their intellectual and spiritual journey over the course of a semester in her class, "Consciousness, Creativity, and Identity." Interweaving personal stories, student writing, and Beauregard's responses, along with recommendations for further reading and a research appendix, it makes the case for the transformative power of consciousness-centered education. Written in a warm, engaging voice that reflects Beauregard's teaching style, *Tuning the Student Mind* provides an accessible, step-by-step template for other educators, while inviting readers more broadly to reconnect with the joy of learning in and beyond the classroom.

Life and Teaching of the Masters of the Far East

In his exciting and original view of the universe, Itzhak Bentov has provided a new perspective on human consciousness and its limitless possibilities. Widely known and loved for his delightful humor and imagination, Bentov explains the familiar world of phenomena with perceptions that are as lucid as they are thrilling. He gives us a provocative picture of ourselves in an expanded, conscious, holistic universe.

The Secret Life of Water

Noted nursing scholars explore the historical and contemporary theories that are the foundation of nursing practice today. The 5th Edition, continues to meet the needs of today's students with an expanded focus on the middle range theories and practice models that link theory to clinical practice. You'll explore the role of these theories in the real-world to see how they guide nursing practice.

Magic of the Ordinary

The Message of a Master

The Kundalini Experience

A new form of Protophysics discerns clues to a deeper form of reality: it lies before, after, beyond, and within the more familiar universe, which is described by mainstream physics. "Tractatus" is a philosophic approach; it tries to give the preliminary outlines for a corresponding "Philosophy in a New Key." It delineates an infinite "megaverse," which seems weird at first sight and comforting at the same time. Seemingly incompatible realms of experience such as "The Structure of the Megaverse," "The Frames for Unfolding and Evolution," "The Role of Cognition and Emotion in the Universe," "The Universality of Love," "The Reality of Prayer and God," "The Roots of Logic and Logos" fall into place: they appear to join in a harmonious whole. The New Philosophy relies on "biperspectivism" as the deepest structure in the Megaverse and in the human mind. Biperspectivism has many forms and names: "Energy vs. Information" is one of them. (Schopenhauer's "Wille und Vorstellung" is but an echo of it all.) In the view of this philosophy, a New Physics spontaneously begets a new METAphysics

A Brief Tour of Higher Consciousness

Tuning the Student Mind

Whether you are completely new to yoga, a more advanced practitioner who feels they can't see the wood for the trees or simply someone who would like to know what all these people who seem to go on about yoga are actually talking about,

this is the first book you need to read. The Incomplete Guide to Yoga is a comprehensive introduction and guide to yoga, covering everything from the philosophical background and history to the nuts and bolts of how to practice - and pretty much everything in between. There are hundreds of books about yoga, covering hundreds of topics and viewpoints, many conflicting with each other. If you have ever stood in a bookshop and thought I AM JUST A NORMAL PERSON WHO WANTS TO KNOW WHAT YOGA IS AND WHAT ON EARTH I AM SUPPOSED TO DO WITH IT, then reading this book will do the job nicely. The Incomplete Guide to Yoga is a unique synthesis of the many aspects of yoga, and its relationship with modern thinking. It provides clear, unbiased explanations and will leave you with your own coherent picture of yoga and how it will work for you.
