English historical linguistics is a subfield of linguistics which has developed theories and methods for exploring the history of the English language. This Handbook provides an account of state-of-the-art research on this history. It offers an in-depth survey of materials, methods, and language-theoretical models used to study the long diachrony of English. The frameworks covered include corpus linguistics, historical sociolinguistics, historical pragmatics and manuscript studies, among others. The chapters, by leading experts, examine the interplay of language theory and empirical data throughout, critically assessing the work in the field. Of particular importance are the diverse data sources which have become increasingly available in electronic form, allowing the discipline to develop in new directions. The Handbook offers access to the rich and many-faceted spectrum of work in English historical linguistics, past and present, and will be useful for researchers and students interested in hands-on research on the history of English.

Art History's History

A pioneering overview of art and psychoanalysis that shows how each field can enrich and enlarge the other.

The Methodologies of Art

Since the nineteenth century, when art history became an established academic discipline, works of art have been 'read' in a variety of ways. These different ways of describing and interpreting art are the methodologies of artistic analysis, the divining rods of meaning. Regardless of a work's perceived difficulty, an art object is, in theory, complex. Every work of art is an expression of its culture (time and place) and its maker (the artist) and is dependent on its media (what it's made of). The methodologies discussed here (formal analysis, iconology and iconography, Marxism, feminism, biography and autobiography, psychoanalysis, structuralism, race and gender) reflect the multiplicity of meanings in an artistic image. The second edition includes nineteen new images, new sections on race, gender, orientalism, and colonialism, and a new epilogue that analyzes a single painting to illustrate the different methodological viewpoints.

The UX Book: Process and Guidelines for Ensuring a Quality User Experience aims to help readers learn how to create and refine interaction designs that ensure a quality user experience (UX). The book seeks to expand the concept of traditional usability to a broader notion of user experience; to provide a hands-on, practical guide to best practices and established principles in a UX lifecycle; and to describe a pragmatic process for managing the overall development effort. The book provides an iterative and evaluation-centered UX lifecycle template, called the Wheel, for interaction design. Key concepts discussed include contextual inquiry and analysis; extracting interaction design requirements; constructing design-informing models; design production; UX goals, metrics, and targets; prototyping; UX evaluation; the interaction cycle and the user action framework; and UX design guidelines. This book will be useful to anyone interested in learning more about creating interaction designs to ensure a quality user experience. These include interaction designers, graphic designers, usability analysts, software engineers, programmers, systems analysts, software quality-assurance specialists, human factors engineers, cognitive psychologists, cosmic psychics, trainers, technical writers, documentation specialists, marketing personnel, and project managers. A very broad approach to user experience through its components—usability, usefulness, and emotional impact with special attention to lightweight methods such as rapid UX evaluation techniques and an agile UX development process. Universal applicability of processes, principles, and guidelines—not just for GUIs and the Web, but for all kinds of interaction and devices: embodied interaction, mobile devices, ATMs, refrigerators, and elevator

controls, and even highway signage Extensive design guidelines applied in the context of the various kinds of affordances necessary to support all aspects of interaction Real-world stories and contributions from accomplished UX practitioners A practical guide to best practices and established principles in UX A lifecycle template that can be instantiated and tailored to a given project, for a given type of system development, on a given budget

History of Western Art W/ Core Concepts

This is a book about how to read visual images: from fine art to photography, film, television and new media. It explores how meaning is communicated by the wide variety of texts that inhabit our increasingly visual world. But, rather than simply providing set meanings to individual images, Visual Culture teaches readers how to interpret visual texts with their own eyes. While the first part of the book takes readers through differing theoretical approaches to visual analysis, the second part shifts to a medium-based analysis, connected by an underlying theme about the complex relationship between visual culture and reality. Howells and Negreiros draw together seemingly diverse methodologies, while ultimately arguing for a polysemic approach to visual analysis. The third edition of this popular book contains over fifty illustrations, for the first time in colour. Included in the revised text is a new section on images of power, fear and seduction, a new segment on video games, as well as fresh material on taste and judgement. This timely edition also offers a glossary and suggestions for further reading. Written in a clear, lively and engaging style, Visual Culture continues to be an ideal introduction for students taking courses in visual culture and communications in a range of disciplines, including media and cultural studies, sociology, and art and design.

The Methodologies Of Art

Appropriate for one-semester art history surveys or historically-focused art appreciation classes, A History of Western Art, Fifth Edition, combines sound scholarship, lavish visuals, and a lively narrative to provide students with an accessible and engaging introduction to art history. Focusing on the Western canon, the text presents a compelling chronological narrative from prehistory to the present. A non-Western supplement, World Views: Topics in Non-Western Art, addresses specific areas of non-Western art and augments the Western chronology by illustrating moments of thematic relationships and cross-cultural contact.

The recent trend in innovative school design has provided exciting places to both learn and teach. New generation learning environments have encouraged educators to unleash responsive pedagogies previously hindered by traditional classrooms, and has allowed students to engage in a variety of learning experiences well beyond the traditional 'chalk and talk' common in many schools. These spaces have made cross-disciplinary instruction, collaborative learning, individualised curriculum, ubiquitous technologies, and specialised equipment more accessible than ever before. The quality of occupation of such spaces has also been encouraging. Many learning spaces now resemble places of collegiality, intellectual intrigue and comfort, as opposed to the restrictive and monotonous classrooms many of us experienced in years past. These successes, however, have generated a very real problem. Do these new generation learning environments actually work – and if so, in what ways? Are they leading to the sorts of improved experiences and learning outcomes for students they promise? This book describes strategies for assessing what is actually working. Drawing on the best thinking from our best minds – doctoral students tackling the challenge of isolating space as a variable within the phenomenon of contemporary schooling – *Evaluating Learning Environments* draws together thirteen approaches to learning environment evaluation that capture the latest thinking in terms of emerging issues, methods and knowledge.

Art And Psychoanalysis

This book explores digital artists' articulations of globalization. Digital artworks from around the world are examined in terms of how they both express and simulate globalization's impacts through immersive, participatory and interactive technologies. The author highlights some of the problems with macro and categorical approaches to the study of globalization and presents new ways of seeing the phenomenon as a series of processes and flows that are individually experienced and expressed. Instead of providing a macro analysis of large-scale political and economic processes, the book offers imaginative new ways of knowing and understanding globalization as a series of micro affects. Digital art is explored in terms of how it re-centers articulations of globalization around individual experiences and offers new ways of accessing a complex topic often expressed in general and intangible terms. *The Work of Art in a Digital Age: Art, Technology and Globalization* is analytic and accessible, with material that is of interest to a range of researchers from different disciplines.

Students studying digital art, film, globalization, cultural studies or digital media trends will also find the content fascinating.

Italian Renaissance Art

Widely acclaimed for its accessibility and engaging approach to the subject, the fourth edition of *The Methods and Skills of History* combines theory and instruction with hands-on practice, making it a comprehensive guide to historical research and writing. Combines theory with hands-on practice in its introduction to historical methods Includes a series of field-tested exercises designed to make the research and writing of history more meaningful and accessible to readers Features expanded coverage of writing history and up-to-date coverage of online research Designed to strengthen students' critical thinking and communication skills

The Object Stares Back

This survey explores the history of nineteenth-century European art and visual culture. Focusing primarily on painting and sculpture, it places these two art forms within the larger context of visual culture including photography, graphic design, architecture, and decorative arts. In turn, all are treated within a broad historical framework to show the connections between visual cultural production and the political, social, and economic order of the time. Topics covered include *The Classical Paradigm*, *Art and Revolutionary Propaganda In France*, *The Arts under Napoleon* and *Francisco Goya and Spanish Art at the Turn of the Eighteenth Century*. For art enthusiasts, or anyone who wants to learn more about Art History.

The Mirror of the Artist

This book provides a lively and stimulating introduction to methodological debates within art history. Offering a lucid account of approaches from Hegel to post-colonialism, the book provides a sense of art history's own history as a discipline from its emergence in the late-eighteenth century to contemporary debates.

Exploring the Humanities

Research Methods in Education introduces research methods as an integrated set of techniques for investigating questions about the educational world. This lively, innovative text helps students connect technique and substance, appreciate the value of both qualitative and quantitative methodologies, and make ethical research decisions. It weaves actual research “stories” into the presentation of research topics, and it emphasizes validity, authenticity, and practical significance as overarching research goals. The text is divided into three sections: Foundations of Research (5 chapters), Research Design and Data Collection (7 chapters), and Analyzing and Reporting Data (3 chapters). This tripartite conceptual framework honors traditional quantitative approaches while reflecting the growing popularity of qualitative studies, mixed method designs, and school-based techniques. This approach provides a comprehensive, conceptually unified, and well-written introduction to the exciting but complex field of educational research.

Looking at Art

This book provides a comprehensive analysis of the significant growth of sculpture as an artistic form in Europe and America from 1900-1945. Using a clearly-defined thematic structure it identifies key issues and developments throughout this important period in the history of art. Individual chapters cover: public sculpture, the monument, the object, image-making, the built environment, the figurative ideal, and different materials. These themes broadly reflect the changing

cultural and political climate of a turbulent period which included two world wars, each preceded by widespread rising nationalism. The practice of sculpture is considered within the wider artistic context of painting and architecture and the development of international art markets. Auguste Rodin, whose ground-breaking exhibition opened in Paris in 1900, serves as the book's point of departure, and as a recurrent point of reference.

The Cambridge Handbook of English Historical Linguistics

This is an analysis of complex forms of art history. It covers a broad range of approaches, presenting individual arguments, controversies and divergent perspectives. The book begins by introducing the concept of theory and explains why it is important to the practice of art history.

The Methodologies of Art

This undergraduate text covers the standard (old and new) methodological approaches to art history, in a clear, direct and understandable way.

Content analysis is one of the most important but complex research methodologies in the social sciences. In this thoroughly

updated Second Edition of The Content Analysis Guidebook, author Kimberly Neuendorf draws on examples from across numerous disciplines to clarify the complicated aspects of content analysis through step-by-step instruction and practical advice. Throughout the book, the author also describes a wide range of innovative content analysis projects from both academia and commercial research that provide readers with a deeper understanding of the research process and its many real-world applications.

The Methodologies of Art

Now thoroughly revised and updated throughout, featuring extended discussions of Mannerism and the expanding role of women in the visual arts and significant illustration program enhancements, Italian Renaissance Art is a readable, student-friendly, lavishly-illustrated introduction to one of the greatest periods of artistic genius in western history. Art historian Laurie Schneider Adams opens the text with the late Byzantine work of Cimabue and concludes with the transition to Mannerism. The author presents the most important and innovative artists and their principal works, with a clear emphasis on selectivity and understanding. Italian Renaissance Art also focuses on style and iconography, and on art and artists, incorporating different methodological approaches to create a wider understanding and appreciation of the art. Distinguishing features of the second edition include: More than 400 images throughout the work, with over 300 in full-color. Over 50 images were changed from black and white to full-color for this edition. Illustration program now includes works by Correggio, Bronzino, and Pontormo. Large format illustrations retained for readability and visual access by students. Design changes make the text more attractive and readable. 'Connections', with thumbnail images of earlier works, show the historical continuity of the images. 'Comparison' thumbnails have also been added for the purpose of comparing and contrasting later works with earlier ones. New treatment of Mannerism and the expanding role of women in the visual arts. Coverage includes Lavinia Fontana, Sofonisba Anguissola, and Properzia de' Rossi, and a new feature box discusses the role of Isabella d'Este as an influential art patron and humanist. Maps, plans, and diagrams included throughout. Also features a historical chronology, a full glossary of art-historical terms, and a select bibliography.

Italian Renaissance Art

This text comprises eleven chapters, each focusing on a discrete area of non-Western or Native American art. With nearly 180 illustrations (many in full color) and an accessible 8 1/2 x 11 format, students are introduced to important subjects and artworks outside of the Western tradition.

Leo Steinberg's classic *Other Criteria* comprises eighteen essays on topics ranging from "Contemporary Art and the Plight of Its Public" and the "flatbed picture plane" to reflections on Picasso, Rauschenberg, Rodin, de Kooning, Pollock, Guston, and Jasper Johns. The latter, which Francine du Plessix Gray called "a tour de force of critical method," is widely regarded as the most eye-opening analysis of the Johns's work ever written. This edition includes a new preface and a handful of additional illustrations. "The art book of the year, if not of the decade and possibly of the century. . . .The significance of this volume lies not so much in the quality of its insights—although the quality is very high and the insights are important—as in the richness, precision, and elegance of its style. . . . A meeting with the mind of Leo Steinberg is one of the most enlightening experiences that contemporary criticism affords." —Alfred Frankenstein, *Art News* "Not only one of the most lucid and independent minds among art critics, but a profound one."—Robert Motherwell

Sculpture 1900-1945

This book surveys the main methodologies used in artistic analysis: formal analysis, iconology and iconography, Marxism, feminism, biography and autobiography, semiotics (structuralism, post-structuralism, and deconstruction), and psychoanalysis. Various works of art are considered from the different methodologies discussed. There are 70 black-and-white illustrations integrated with the text, 4 plates in color, notes, a bibliography, and an index.

The UX Book

The Long Interview provides a systematic guide to the theory and methods of the long qualitative interview or intensive interviewing. It gives a clear explanation of one of the most powerful tools of the qualitative researcher. The volume begins with a general overview of the character and purpose of qualitative inquiry and a review of key issues. The author outlines the four steps of the long qualitative interview and how to judge quality. He then offers practical advice for those who commission and administer this research, including sample questionnaires and budgets to help readers design their own. The author introduces key theoretical and methodological issues, various research strategies, and a simple four-stage model of inquiry, from the design of an open-ended questionnaire to the write up of results.

Art Across Time

Lucrezia Tornabuoni de' Medici and the Medici Family in the Fifteenth Century is a fresh, new biography of a Renaissance woman who lived during the heyday of Medici power. A remarkable person in her own right, the author of religious poems and sacred narratives, as well as an accomplished businesswoman, Lucrezia was the mother of Lorenzo the Magnificent, the grandmother of two popes, and the great-great grandmother of Catherine de' Medici, Queen of France. This glimpse of her

life and times is a window onto the political intrigues and intellectual achievements of Medici Florence.

Food Science and Technology: A Series of Monographs: Food Texture and Viscosity: Concept and Measurement focuses on the texture and viscosity of food and how these properties are measured. The publication first elaborates on texture, viscosity, and food, body-texture interactions, and principles of objective texture measurement. Topics include area and volume measuring instruments, chemical analysis, multiple variable instruments, soothing effect of mastication, reasons for masticating food, rheology and texture, and the rate of compression between the teeth. The book then examines the practice of objective texture measurement and viscosity and consistency, including the general equation for viscosity, methods for measuring viscosity, factors affecting viscosity, tensile testers, distance measuring measurements, and shear testing. The manuscript takes a look at the selection of a suitable test procedure and sensory methods of texture and viscosity measurement. Discussions focus on nonoral methods of sensory measurement; correlations between subjective and objective measurements; variations on the texture profile technique; and importance of sensory evaluation. The publication is a vital source of information for food experts and researchers interested in food texture and viscosity.
