Everything You Need to Know About the L.A.R.E

When did we lose our right to be lazy, unhealthy, and politically incorrect? Move over Big Brother! An insidious new group has inserted itself into American politics. They are the nannies—not the stroller-pushing set but an invasive band of do-gooders who are subtly and steadily stripping us of our liberties, robbing us of the inalienable right to make our own decisions, and turning America into a nation of children. As you read this, countless busybodies across the nation are rolling up their sleeves to do the work of straightening out your life. Certain Massachusetts towns have banned school-yard tag. San Francisco has passed laws regulating the amount of water you should use in dog bowls. The mayor of New York City has french fries and doughnuts in his sights. In some parts of California, smoking is prohibited . . . outside. The government, under pressure from the nanny minority, is twisting the public's arm into obedience. Playground police, food fascists, anti-porn crusaders —whether they're legislating morality or wellbeing—nannies are popping up all over America. In the name of health, safety, decency, and—shudder—good intentions, these ever-vigilant politicians and social activists are dictating what we eat, where we smoke, what we watch and

read, and whom we marry. Why do bureaucrats think they know what's better for us than we do? And are they selectively legislating in the name of political expediency? For instance, why do we ban mini-motorbikes, responsible for five deaths each year, and not skiing, which accounts for fifty deaths each year? Why is medical marijuana, a substance yet to claim a single life, banned and not aspirin, which accounts for about 7,600 deaths? Exhaustively researched, sharply observed, and refreshingly lucid, Nanny Sate looks at the myriad ways we are turning the United States into a soulless and staid nation—eroding not only our personal freedoms but our national character.

Landscape Architecture News Digest

New edition of a classic work on Southern heirloom gardening . . . Heirloom plants belong in Southern gardens. Tough and adapted, tried and true, pretty and useful, these living antiques--passed through countless generations--represent the foundation of traditional gardens as we know them today. Heirloom Gardening in the South is a comprehensive resource that also offers a captivating, personal encounter with two dedicated and passionate gardeners whose love of heritage gardening infuses the work from beginning to end. Anyone who wants to know how to find and grow time-honored and pass-along plants or wants to create and nurture a traditional garden is sure to find this a must-have addition to their home gardening library. Inside the book: New essays on naturalizing daffodils, slips and starts, and growing fruit; A completely updated and expanded heirloom

plant encyclopedia; Revised plant lists (bulbs, cemetery plants, etc.) New material on the creation of two of the authors' personal gardens Building on the popularity of the original edition, this lively, entertaining, and informative new book from two proven experts will be enthusiastically welcomed by gardeners and horticulturists throughout Texas and the South.

Floral Management

America's founders thought the right to earn a living was so basic and obvious that it didn't need to be mentioned in the Bill of Rights. The Right to Earn a Living charts the history of this fundamental human right, from the constitutional system that was designed to protect it by limiting government's powers, to the Civil War Amendments that expanded protection to all Americans, regardless of race.

What is landscape architecture? Is it gardening, or science, or art? In this book, Bruce Sharky provides a complete overview of the discipline to provide those that are new to the subject with the foundations for future study and practice. The many varieties of landscape practice are discussed with an emphasis on the significant contributions that landscape architects have made across the world in daily practice. Written by a leading scholar and practitioner, this book outlines the subject and explores how, from a basis in garden design, it 'leapt over the garden wall' to encapsulate areas such as urban and park design, community and regional planning, habitat restoration, green infrastructure and sustainable design, and site engineering and implementation. Coverage includes: The effects that natural and human factors have upon design, and how the discipline is uniquely placed to address these challenges Examples of contemporary landscape architecture work - from storm water management and walkable cities to well-known projects like the New York High Line and the London Olympic Park Exploration of how art and design, science, horticulture, and construction come together in one subject Thinking about Landscape Architecture is perfect for those wanting to better understand this fascinating subject, and those starting out as landscape architecture students.

The Woody Plant Seed Manual

This advanced level course book teaches stylistic variations of modern French grammar using examples from films and interviews as well as other authentic texts. Written entirely in French, it focuses on the most difficult grammar points and their usage, rather than on their formation. Variations stylistiques includes an abundance of oral and written exercises that are practical, relevant, creative, and fun, encouraging students to use the grammar in meaningful contexts. By highlighting the many linguistic variants employed by native speakers,

Dansereau provides an engaging alternative to traditional French grammar textbooks. An ancillary Web site features quizzes and other valuable resources for instructors.

The European Competition Law Annual 2004 is ninth in a series of volumes following the annual workshops on EU Competition Law and Policy held at the Robert Schuman Centre of the European University Institute in Florence. The volume reproduces the materials of the roundtable debate that took place at the ninth edition of the workshop (11-12 June 2004), which

examined the relationship between competition law and the regulation of (liberal) professions. The (liberal) professions and the rules governing their functioning have become of interest for EC competition law enforcement since the early nineties, making the object of a series of Commission decisions and judgments of the European courts. The subject has gained in importance in the perspective of the recent decentralisation of EC antitrust enforcement. The regulation of (liberal) professions is also a matter of increasing concern from the perspective of freedom of services in the internal market. The workshop participants - a group of senior representatives of the Commission and the national competition authorities of some Member States, reknown international academics and legal practitioners - discussed the economic, legal and political/institutional issues that arise in the relationship between competition law and the regulation of (liberal) professions.

The Constitution was designed to limit government power and protect individuals from the tyranny of majorities and interest-group politics. But those protections are meaningless without judges who are fully committed to enforcing them, and America's judges have largely abdicated that responsibility. All too often, instead of judging the constitutionality of

government action, courts simply rationalize it, as the Supreme Court did in upholding the Affordable Care Act, which represented the largest—and most blatantly unconstitutional—expansion of federal power since the New Deal. The problem lies not with the Constitution, but with courts' failure to properly enforce it. From the abandonment of federalism to open disregard for property rights and economic freedom, the Supreme Court consistently protects government prerogatives at the expense of liberty. The source of this error lies in the mistaken belief on both the left and the right that the leading constitutional value is majority rule and the chief judicial virtue is reflexive deference to other branches of government. This has resulted in a system where courts actually judge the constitutionality of government action in the handful of cases they happen to care about, while merely pretending to judge in others. The result has been judicial abdication, removing courts from their essential role in the system of checks and balances so carefully crafted by our Founders. This book argues that principled judicial engagement—real judging in all cases with no exceptions—provides the path back to constitutionally limited government.
