radically new market dynamics... 2 indispensable traders' guides, now in a convenient e-format, at a great price! 2 indispensable books deliver profound insights into today's markets — and translate deep knowledge into outsized profits! Today's markets are radically different — and you can't profit unless you understand how they've changed. Now, two breakthrough books give you powerful market insights you won't find anywhere else — insights honed to reflect new realities, and deliver massive new profits. First, in *The Playbook*, Mike Bellafiore offers a complete course in becoming a truly great trader, whether you want to trade on your own or for someone else's firm. Using the same high-intensity "boot camp" approach he uses to teach his own firm's new traders, Bellafiore walks through actual trades, explains what the traders were trying to do, and offering brutally tough expert critiques. Trade by trade, he reveals how professional traders must think in order to succeed "under fire," how they assess their own performance, and how they work relentlessly to improve. Using concrete, actionable setups drawn from his extensive experience, he illuminates support plays, bull-and-bear flags, opening drives, important intraday levels, bounce and fade trades, pullbacks, scalps, technical opportunities, consolidation, relative strength, market trades, and more. He also presents indispensable insights on psychology and trader development, based on his work with hundreds of traders on a major commodity exchange and an elite prop firm's trading desk. Then, in *Shock Markets*, Robert I. Webb and Alexander Webb show you exactly how to transform crises into profits. They offer meticulous breakdowns of recent

crises, revealing how these events impacted both individual stocks and overall markets, and helping you create detailed game plans for profiting from future shocks. They answer crucial questions like: What moves stock prices? What moves the overall market? How can you profit from catalysts that precipitate sudden sharp stock price movements? From regulatory decisions to macroeconomic reports, seemingly remote factors can have a huge, sudden impact on stocks. *Shock Markets* illuminates these catalysts, and demonstrates their shifting behavior during fads, fashions, bubbles, crashes, and market crises. The focus is completely practical: helping savvy traders uncover profit where others find only peril. From expert traders and trading instructors Mike Bellafiore, Robert I. Webb, and Alexander R. Jeffrey Hirsch discusses how to capture market-beating returns by following specific stock market cycles While predicting the direction of the stock market at any given point is difficult, it's a fact that the market exhibits well-defined and sometimes predictable patterns. As a result, many practitioners have now turned to a new forecasting "cocktail" that combines traditional charting methodologies with chaos theory and human psychology. In this groundbreaking book, Bill Williams, a seasoned trader at the forefront of this dynamic new approach, explains exactly what it is, how it works in current stock and commodity markets, and how to use it to your advantage. Based on human nature rather than

the vagaries of the market, the new trading dimension works on the premise that we trade not the market, but our own belief system. By assessing what your personal biases are, you can determine how they influence your ultimate success-or failure-and then adjust your trading strategies accordingly. Written by an expert in the field who has been featured in Futures, Worth, Success, and other prominent publications, *New Trading Dimensions* takes the latest in scientific knowledge about human behavior and applies it directly to the fields of stock and commodity investing and trading. With straightforward guidelines, it shows you how to adopt the right attitude toward the behavior of the market and use the right tools (ATTITOOLS) for profitable trading. Packed with practice exercises, specific applications to different types of investments, and a detailed review of important market signals, here's where you'll learn how to:

- \* Discover what the market wants and align your own beliefs with the direction of the market

- \* Use Williams' "Market Alligator" for analyzing and profiting from the markets
- \* Employ a multidimensional trading program that includes such tools and techniques as fractals, oscillators, AC signals, psychological zones, and balance lines

## **Profiting from Market Trends**

Over seven years, 45 of the world's top investors were given between \$25 and \$150m to invest by fund manager Lee Freeman-Shor. His instructions were simple. There was only one rule. They could only invest in their ten best ideas to make money. It seemed like a foolproof plan to make a lot of money. What could possibly go wrong? These were some of the greatest minds at work in the markets today - from top European hedge fund managers to Wall Street legends. But most of the investors' great ideas actually lost money. Shockingly, a toss of a coin would have been a better method of choosing whether or not to invest in a stock. Nevertheless, despite being wrong most of the time, many of these investors still ended up making a lot of money. How could they be wrong most of the time and still be profitable? The answer lay in their hidden habits of execution, which

until now have only been guessed at from the outside world. This book lays bare those secret habits for the first time, explaining them with real-life data, case studies and stories taken from Freeman-Shor's unique position of managing these investors on a day-to-day basis. A riveting read for investors of every level, this book shows you exactly what to do and what not to do when your big idea is losing or winning - and demonstrates conclusively why the most important thing about investing is always the art of execution.

## **The Art of Execution**

As stock prices and investor confidence have collapsed in the wake of Enron, WorldCom, and the dot-com crash, people want to know how this happened and how to make sense of the uncertain times to come. Into the breach comes one of Wall Street's legendary investors, Leon Levy, to explain why the market so often confounds us, and why those

who ought to understand it tend to get chewed up and spat out. Levy, who pioneered many of the innovations and investment instruments that we now take for granted, has prospered in every market for the past fifty years, particularly in today's bear market. In *The Mind of Wall Street* he recounts stories of his successes and failures to illustrate how investor psychology and willful self-deception so often play critical roles in the process. Like his peers George Soros and Warren Buffett, Levy takes a long and broad view of the rhythms of the markets and the economy. He also offers a provocative analysis of the spectacular Internet bubble, showing that the market has not yet completely recovered from its bout of "irrational exuberance." *The Mind of Wall Street* is essential reading for all of us, whether we are active traders or simply modest contributors to our 401(k) plans, as volatile and unnerving markets come to define so much of our net worth.

## **Rule the Freakin' Markets**

Markets are transitioning from place to space-but as the collapse of the initial B2B boom demonstrated, the journey won't be easy. Pioneering market makers from eBay and British Petroleum to the Dutch Flower Auctions and ChemConnect are leading the way to create new value through markets. Their experiences make two things increasingly clear: Success in the marketplace will require new ways of operating, and participation won't be optional. Ajit Kambil and Eric van Heck-respected authorities on electronic markets-argue that online auctions and exchanges will soon be an essential part of business practice. They explain why companies must adopt electronic markets now if they hope to compete in the future. And they prove that success lies not in achieving "first-mover" advantage in new markets, but in creating winning strategies to design and use markets to manage the supply chain, connect with customers, increase efficiency, and make decisions. Based on the authors' decade-long study of nearly one hundred successful and failed electronic markets in the United States, Europe, and Asia, the book reveals how market makers are rewriting the rules of commerce. They offer a strategic blueprint for designing, implementing, and profiting from electronic markets. Making Markets shows how companies can:

- Creatively use markets in procurement, resale, and clearance, and in more novel applications such as prediction, risk management, and decision making.
-

## **Strategies for Profiting on Every Trade**

Markets in Profile explores the confluence of three disparate philosophical frameworks: the Market Profile, behavioral finance, and neuroeconomics in order to present a unified theory of how markets work. The Market Profile is an ever-evolving, multidimensional graphic that gives visual form to the market's continuing auction process, revealing the myriad underlying dynamics that influence market

activity. Behavioral finance posits that investors are driven more by emotional factors and the subjective interpretation of minutia than by "rationality" when making investment decisions. And neuroeconomics is the study of how investor psychology permeates and affects the financial markets. Mr. Dalton explicates the ways in which irrational human behavior influences the market's natural auction process, creating frequently predictable market structure, which results in opportunities for investors to ameliorate risk. The book will improve investors ability to interpret change in markets, enabling better, more confident investment decisions.

"It's hard to talk clearly about investing and make sense to ordinary readers at the same time. seasoned investors alike, Katsenelson explains in plain English why volatility and sideways markets are a stock picker's best friend." — The Motley Fool, [www.Fool.com](http://www.Fool.com) Praise for Active Value Investing "This book reads like a conversation with Vitaliy: deep, insightful, inquisitive, and civilized." — Nassim Nicholas Taleb, author of *The Black Swan* "Thoroughly enjoyable . . . for the thoughtful and often entertaining way in which it is delivered. . . Katsenelson takes his reader step by step into the mind of the value investor by relating, in a fictional addendum to *Fiddler on the Roof*, the story of Tevye's purchase of Golde, the cow. He also describes his own big-time gambling evening (he was willing to lose a maximum of \$40) and that of a half-drunken, rowdy fellow blackjack player to stress the importance of process. He then moves on to the fundamental principles of active value investing. What differentiates this book from so many others on value investing is that it describes, sometimes through the use of case studies, the thinking of a value investor. Not just his models or his metrics but his assessments. Katsenelson is an empiricist who weighs facts, looks for contraindications, and makes decisions. He makes value investing come alive. This may be a little book, but it's packed with insights for both novices and experienced investors. And it is a delight to read." —Seeking Alpha

Malliaris, Professor of Economics and Finance, Loyola University Chicago “Denise Shull wants us to get in touch with our feelings, not to beat our bare chests and utter primordial screams. Far from it—her techniques are focused on making more money.” —Financial Times “Denise Shull’s gem of a book is long overdue. . . . [Market Mind Games] has made the ability to analyze and overcome our unconscious biases and prejudices available to everyone.” —Dr. Donald T. Wargo, Department of Economics, Temple University “Market Mind Games is iconoclastic to say the very least! Pay attention to the last word in the subtitle: risk. This book will change your perspective on how to approach and think about the markets and your life!” —Michael J. Levas, Founder, Senior Managing Principal, and Director of Trading, Olympian Capital Management, LLC “Denise changes the way you look at yourself and investing. Her insights and methods are necessary to succeed in the markets, period.” —Jared Levy, Portfolio Manager and author of Your

Options Handbook “Market Mind Games offers a new school of trading psychology. Truly an important work that needs to be on the bookshelf of every serious market participant.” —Mike Bellafiore, author of One Good Trade “Masterful explanation of not only why emotionless trading is a myth, but how we can take advantage of our natural wiring to gain an edge.” —Derek Hernquist, Chief Investment Officer, Integrative Capital, LLC “Shull details ways to learn how you ‘feel’ before you ‘act’ so that your buy, sell, or hold decisions become more successful.” —E. Bernstein, OPUS Trading “A must-read for those who want to make their livelihood as a professional investor, trader, or algorithmic trading developer.” —Larry Tabb, founder and CEO, Tabb Group “Denise Shull enlightens the reader how to effectively unlock one’s psychological capital and translate that awareness into clear and concise investment decisions.” —Grant Mashek, Managing Member, Palm Equity, LLC “Shull’s book is not only a great read but lays out an entirely more effective approach to thinking about any decision that involves the unknown—market related or not.” —Leslie Shaw, Ph.D., Behavioral Economics, and trained psychoanalyst About the Book: What if the mystery of market crashes stems from a simple but total misunderstanding of our own minds? Could everything we think we know about ourselves—intelligence and rationality versus emotion and irrationality—be wildly off the mark? Simply put: yes. With these words, Denise Shull introduces her radical—and supremely rational— approach to risk. Her vision stems from the indisputable fact that human beings can’t make any decision at all without

emotion and that emotion gets the first—and last—word when it comes to our perceptions and judgments. Shull should know. She started out managing major accounts for IBM and then chose to research unconscious emotional patterns instead of getting her MBA. Next she became a trader and trading desk manager while continuing to study biopsychology. We are all taught that sidelining our emotions is the best way to make good decisions—Shull declares the converse: emotions inform us. Attempting to control them actually increases the risks we take. Shull advocates treating feelings as data, and she convincingly argues that doing so eradicates the baffling question that repeats itself in our heads after making a poor investing decision: “What was I thinking?” Through a series of “lectures,” Shull logically but engagingly connects emotions, beliefs, and context to our innate reaction to uncertainty and risk (yes, the two are different). In *Market Mind Games*, she merges more than 20 years of studying risk decisions into a single, astoundingly effective strategy. A reasonable approach to emotion is the best and only way to win the investing game. The methods Shull details in *Market Mind Games* shake the foundation of conventional market and decision psychology. And, most important, they work.

such as support and resistance, chart patterns, and trend lines. Developed in the 1980s by finance experts at the Chicago Board of Trade, the Market Profile has become one of the most powerful analytical tools for traders, investors, and market analysts. And now, THE POWER OF THE MARKET PROFILE CAN BE YOURS.

Market value is the core concept behind any trade; and the core of any trader's decision is based on the perception of value. In his brand-new book, Dr. John Keppler, seasoned business professor and the founder of StrategicTrading.net, reveals how the Market Profile makes it possible to identify and track market value in real time, in every time frame. From the basics of the key elements of a Profile chart to insightful discussion of market auction theory, Profit with the Market Profile will guide traders through a new understanding of the market that will allow them to:

- identify the most profitable trade opportunities as they happen,
- make more informed, confident trading decisions with increased accuracy,
- develop Profile-based trading strategies and improve trade planning to reduce losses,
- secure better entries and exits, and implement more effective targets and stops.

See with clarity what is happening at the present moment in stocks, ETFs, futures, commodities, bonds, and currencies. Test your understanding and knowledge with interactive self-tests. PLUS, you will get the very first look at the Keppler Volume Tracking Indicator (KVT), based on Dr. Keppler's extensive research studies on volume patterns and volume variations on a variety of instruments. Using a proprietary formula, KVT looks at the current traded volume at every price and highlights trading volume considered to be above the

usual or average levels, allowing traders to identify trends and determine the level of conviction in order to capitalize on opportunities as they present themselves in the market.

Seize the advantage in every trade using your greatest asset—"psychological capital"! When it comes to investing, we're usually taught to "conquer" our emotions. Denise Shull sees it in reverse: We need to use our emotions. Combining her expertise in neuroscience with her extensive trading experience, Shull seeks to help you improve your decision making by navigating the shifting relationships among reason, analysis, emotion, and intuition. This is your "psychological capital"—and it's the key to making decisions calmly and rationally during the heat of trading. Market Mind Games explains the basics of neuroscience in language you understand, which is the first tool you need to manage the emotional ups and downs of the trading. It then provides you with a rock-solid trading system designed to take full advantage of your emotional assets.

## **Steidlmayer on Markets**

As stock prices and investor confidence have collapsed in the wake of Enron, WorldCom, and the dot-com crash, people want to know how this happened and how to make sense of the uncertain times to come. Into the breach comes one of Wall Street's legendary investors, Leon Levy, to explain why the market so often confounds us, and why those who ought to understand it tend to get chewed up and spat out. Levy, who pioneered many of the innovations and investment instruments that we now take for granted, has prospered in every market for the past fifty years, particularly in today's bear market. In *The Mind of Wall Street* he recounts stories of his successes and failures to illustrate how investor psychology and willful self-deception so often play critical roles in the process. Like his peers George Soros and Warren Buffett, Levy takes a long and broad view of the rhythms of the markets and the economy. He also offers a provocative analysis of the spectacular Internet bubble, showing that the market has not yet completely recovered from its bout of "irrational exuberance." *The Mind of Wall Street* is
