Wayne Cascio's *Managing Human Resources, 7/e*, is perfect for the general management student whose job inevitably will involve responsibility for managing people. It explicitly links the relationship between productivity, quality of work life, and profits to various human resource management activities and, as such, strengthens the students' perception of human resource management as an important function, which affects individuals, organizations, and society. It is research-based and contains strong links to the applicability of this research to real business situations.

Employment Practices Decisions

This book aims to discredit the myth that has the 'unique cultural traits' of the Japanese as the key to the country's success, arguing that the more realisable foundation of long-term investment in training and research is responsible. The book looks at the development of Japan in the pre-War period. Yukiko Fukusaku sees the achievements of this period as central to the present competitiveness of the country's industrial technology. She uses the Mitsubishi Nagasaki shipyard as a case study, looking at technological innovation and training as the keys to long-term stability and economic success. The book has implications for industrial development worldwide. Japan's starting point over a century ago was similar to the present conditions of many developing countries and the book's emphasis on the acquisition of better skills as a key to development is as relevant to Europe and America as it is to the Third World.

Technology and Industrial Growth in Pre-War Japan: The Mitsubishi-Nagasaki Shipyard 1884-1934

Break the rules and take charge of your career! The traditional job-search approaches just don't work anymore, and the days of trusting your career to your employer are long over. The new-millennium workplace requires all of us to rewrite the rules and start treating our careers like we're running a business—which means understanding the markets for our talents, knowing our value, and looking out over the horizon to plot our paths going forward. Liz Ryan is a former Fortune 500 HR SVP and the world's most widely read workplace thought leader. She understands the recruiting system as only an insider can, and she shows you how to stay focused on your goals and distinguish yourself from masses of job seekers. In *Reinvention Roadmap*, you'll discover new tools, such as a "Pain Letter" and your "Human-Voiced Resume" to land not just any job, but a job that celebrates your unique talents and takes you to the level where you want to be. Whether you're entering the workplace or looking to switch careers, you can get the perfect job if you step off the beaten path and follow the approaches insiders use to gain access to the best positions. *Reinvention Roadmap* is the colorful, fun, irreverent, and deeply practical guide to getting the job you want and building the career of your dreams.

Lifting the veil on all facets of the marijuana industry, *Start Your Own Cannabis Business* sheds light the business opportunities available as it becomes legal and regulated across the globe. From retailers to growers, producers, and suppliers there's a seemingly never-ending list of startup opportunities in this emerging market such as providing security and courier services; making concentrates and edibles; growing, distribution, and sales to list a few. In 2016, cannabis sales in North America reached about \$6.7 billion and is expected to surge to \$30 billion by 2021. Add in the fact that 70 to 80 percent of startup cannabis businesses reach break-even within the first year and that makes for an unprecedented opportunity for business ventures of all sizes. Cannabis, biotech and entrepreneurship reporter Javier Hasse introduces forward-thinking entrepreneurs, like you, to the industry and shares hard-earned tips and success stories from pioneers and visionaries in the marijuana industry. You'll also learn how to: Evaluate your cannabis business idea, build a business plan, and find funding Grow your business into a multi-state company Comply with the IRS and regulations with the guidance of cannabis-savvy lawyers and accountants

A blended learning approach to automotive engineering at levels one to three.

Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.
