chance to discover a career path, this is an essential resource for any student no matter their college or career path. It's no secret that college costs are getting higher while admissions rates are dropping. Students and parents are faced with growing fears that higher education might not even be worth it in the long run. With the release of *The Ultimate Summer Program Guide: For High School Students*, readers will find a better way to prepare for one of life's largest and most impactful decisions. As the academic industry's largest, most extensive publication dedicated exclusively to summer programs, it's an essential guide for every prospective college student and family. Do I really know what my major of interest entails? Do I even know what other majors are out there? Will I like living away from home as much as I hope I will? Does my desired campus atmosphere support my learning needs? Am I really ready? Very few college resources address these types of questions, much less by virtue of fingertip access to experiences that provide the answers in context. Unlike the majority of college resources, which are designed for students who know exactly what they want to do, this guide provides a connection to trialing colleges, careers, and communities, which in turn aids in self-reflection and educational planning. The diverse and far-reaching offerings enclosed within *The Ultimate Summer Program Guide: For High School Students* are intended to give students a glimpse into what they think they want, and question what else there might be. Those who apply for and complete one or more summer programs using the information provided will no doubt join the ranks of the most academically, socially and contextually prepared college

applicants. In addition, they will have gained an unrivaled and distinctive edge that makes their application stand out.

College counselor Ethan Sawyer (aka The College Essay Guy) will show you that there are only four (really, four!) types of college admission essays. And all you have to do to figure out which type is best for you is answer two simple questions: 1. Have you experienced significant challenges in your life? 2. Do you know what you want to be or do in the future? With these questions providing the building blocks for your essay, Sawyer guides you through the rest of the process, from choosing a structure to revising your essay, and answers the big questions that have probably been keeping you up at night: How do I brag in a way that doesn't sound like bragging? and How do I make my essay, like, deep? The world can be a bit negative sometimes, which is kind of like saying rain is wet. Smiles have been replaced by cell phones and cynical is the new normal. The pursuit of happiness has been changed into the pursuit for dollars and in a tough economic climate, it's a race most of us are losing. Comedian and author Bryan Cohen thinks that it's time to remember what happiness is all about. He believes that normal people like you (without diamond-bejeweled muscle shirts) can still be happy with a few changes to your attitude, your beliefs and a short training routine to build up your joy. Cohen has laid out 35 exercises that you can use to create a happiness workout plan to help you in the following areas: * Keeping your negative thoughts at bay and learning to control your emotions * Finding things to like about the job you hate and how to quit it to start a job you love * Loving the one you're with and strengthening your family's happiest memories * Learning more about yourself and what you're good at without a master's degree * Embracing silence in a world overrun by digital doohickeys * Finding time and energy to embrace your

College for Me: A College Guide for Students with Attention Deficit Disorder

ABOUT THE BOOK The most important thing to remember about my College Crossroads blog at Forbes.com is that my posts are different than what is typically written elsewhere on college planning, and that is because I bring a rather unique perspective to this specialized area. For almost twenty years I have specialized in helping families determine their best strategy to pay for college, and doing so requires a rare knowledge of how four key areas must come together to form a family's best strategy: College selection, financial aid, tax aid, and personal resources. College admissions and financial aid professionals know their respective areas well, as do tax and financial advisors, but virtually none have a solid grasp of the areas outside their own, let alone how each area impacts the others for college planning purposes. That's where I come in. I have spent twenty years working with families and collaborating with these other professionals, making it my business to make the connections, gain the insights, and innovate ways to help families determine their best strategy to pay for college and enjoy a Real Life Retirement. My blog posts are less about what the latest studies or headlines say, and more about what you really need to know. I am about answers, not more and more information. If I think you need to know about a single topic in more detail, I go to the experts on those topics and interview them in the context of the four key

areas: College selection, financial aid, tax aid, and the use of your personal resources to pay your share of the cost, with or without financial aid. It keeps the focus on strategy and simplicity; the best strategy to pay for the colleges that are the best fit. Finally, unless a student is independently wealthy, getting a college degree is ultimately about getting a job. The blog and this book cover that too.

ABOUT THE AUTHOR Troy Onink is a nationally-known authority on college planning. Troy has specialized in college planning for twenty years, during which he pioneered this specialized field by integrating the areas of financial planning, investing, college admissions, financial aid, tax strategies, and wealth management, for the purpose of determining each family's best strategy to pay for college. Troy views college as a tollbooth on the road to retirement, and by having a strategy families choose the right exits, pay the toll as wisely as possible, and stay up to speed for retirement. Troy is CEO of Stratagee.com, the firm he co-founded to create innovative college planning software to help families identify where their children may be able to get in to college and get aid, and determine the family's best strategy to pay for the colleges that are the best fit for their children.

EXCERPT FROM THE BOOK Why College Co-Op Programs Totally Rock "I made \$46,000 working as a Co-Op student for a great company while I was getting my college degree from a well-known university, and now the company that I did my Co-Op with wants to hire me." This isn't too good to be true. The truth is that College Co-Op programs totally rock, and I could have gotten that quote from thousands of Co-Op students nationwide. There are several reasons why college Co-

Op programs rock. Added Work Experience and Job Offers Think about this: One student goes to college, tries to find a job in the summer just to help with expenses, and then graduates on time with good grades but no work experience, and a boat load of student loans. Another student goes to college for the first half of the year, then goes to work at a company that is part of her university's Co-Op program, gains six months of work experience for which she is paid \$11,000 - \$18,000, then goes back to campus to learn in the classroom, repeating this cycle until she graduates with both a degree and meaningful work experience.
