Textbook of Basic Nursing

Improving Nursing Documentation and Reducing Risk Patricia A. Duclos-Miller, MSN, RN, NE-BC In the age of electronic health records (EHR) and value-based purchasing, accurate and complete nursing documentation is crucial. Proper documentation affects not only quality of care, but also facilities' costs and revenues. Redundant documentation wastes time and money, while inadequate documentation negatively affects Joint Commission core measures and can result in license suspensions or legal action against a healthcare facility--an expensive and often damaging outcome. Improving Nursing Documentation and Reducing Risk helps nurse managers create policies, processes, and ongoing auditing practices to ensure that complete and accurate documentation is implemented by their staff, without creating additional time burdens. Nurse managers, especially new nurse managers, do not clearly understand their legal accountability for poor or inadequate documentation created by nursing staff who report to them. While each state's nurse practice act (NPA) differs, every NPA addresses nursing liability for documentation; however, many nurse managers remain unaware of these and other regulations that hold them accountable for the documentation crafted by their nurses. This book helps nurse managers protect themselves and their staff by clearly explaining to their employees the impact of documentation practices on
