The tenth-anniversary edition of the book that changed lives in profound ways, now with a new foreword and afterword. In 2006, a groundbreaking feature-length film revealed the great mystery of the universe—The Secret—and, later that year,

Rhonda Byrne followed with a book that became a worldwide bestseller. Fragments of a Great Secret have been found in the oral traditions, in literature, in religions and philosophies throughout the centuries. For the first time, all the pieces of The Secret come together in an incredible revelation that will be life-transforming for all who experience it. In this book, you'll learn how to use The Secret in every aspect of your life—money, health, relationships, happiness, and in every interaction you have in the world. You'll begin to understand the hidden, untapped power that's within you, and this revelation can bring joy to every aspect of your life. The Secret contains wisdom from modern-day teachers—men and women who have used it to achieve health, wealth, and happiness. By applying the knowledge of The Secret, they bring to light compelling stories of eradicating disease, acquiring massive wealth, overcoming obstacles, and achieving what many would regard as impossible.

Congressional Government: A Study in American Politics

The Science of Getting Rich

What therefore, is the incentive to create poor people and legislate a means to keep them down? Did I hear you say capitalism? You are right. The status quo must be maintained. Some may not see hypocrisy in this. But, let us think about this rationally. If non-blacks were to empathize (for lack of a better word) with white folks, what will be a reason to discriminate against others and institutionalize

racism? Let's look at a few angles. 1. Hatred? Hatred or hate is a deep emotional and extreme dislike. Such hatred can be directed against certain individuals or groups. To say hatred is the reason to keep non-whites poor will be far-fetched. Even when non-whites were slaves, they had cherished values of—live and let live. Disdain? May be, but definitely, not hatred. 2. Fear? Fear is a phobia. Phobia is the extreme aversion embedded deep in our psyches, activated when we come face-to-face with that which we fear. Some people—mostly non blacks—are afraid of black people. Is it a fear based on facts or a belief that the black man is inherently bad or is it a fear of repercussion emanating from what our grandfathers did to the black man? This angle is worth pursuing but then, it is just a very lethal phobia. 3. Greed? This is more like it. Greed is good for those at the top. Greed is good for the few landowners represented by corporations now. The rich have a need to create an imaginary enemy. They do not want to be seen as the enemy just like the corporations don't want you to know that they manage the world's resources for a select few. They hand out some minute resources, here and there to the operators/managers of the corporations, who are the middle class. Thus, the middle class thinks they are buddy-buddy with the landowners. The landowners must provide an incentive so as to maintain a grip at their corporations, so the design is to make the middle class believe that the lower class is at that level because they are lazy and seeking handouts. Were black people lazy during slavery? Did black folks seek handouts during slavery? Of course, they received handouts in shapes of chit lings, pig feet and cow feet. How all of a sudden, blacks became lazy, as soon as slavery was "over". Can you begin to see the design now? 4. By design? It is a design in plain sight. Many people cannot see it. Those who see it, are incapable to do anything about it because by design, the whole plot has been legislated into law. Just like apartheid, the various governments and departments at many levels justified the discrimination, through laws the oppressed cannot surmount. It was so then and it is so today with little or no legislative modification in sight. Have you ever imagined why the 44th president of United States is having so much problems with the Congress? You think the Congress populated by mostly old white men are giving the black president a tough time because of race? Or, you think they hate the first black president of the union? If you answered yes to any of these questions you are yet to understand the workings of a country, some have christened "God's own Country". The fear of a black president undoing four hundred years of discriminative laws, the phobia of taking down the protections of the rich landowners and the enforcers of that protection led to a section of a congress to proclaim from day 1 of the black president's inauguration: "if Obama wants it, we reject it right off the bat." This simply means, an opposition to President Obama's policies on all fronts. Some were not hiding their enthusiasm for an Obama failure, they worked for it. They feared an Obama presidency that might implement programs that would invite non-whites to participate thus engaging in capitalism. Slogans like "take our country back" were dusted up for re-use. It was strategic. They were all noises meant to drown some of Obama's signature programs like the affordable care act, popularly known as Obamacare. It has always been by design.

Open Secrets contests the dominant influences of utilitarianism, expressive individualism, and imperatives to self-improvement by examining a series of texts in which "nothing happens" and arguing that these works, far from hiding from narrative demands, make an open secret of fulfilled experience and yield a revelation without insistence or rhetorical underscoring.

The object of this book is to point out the most characteristic practical features of the federal system. Taking Congress as the central and predominant power of the system, its object is to illustrate everything Congressional. Everybody has seen, and critics without number have said, that our form of national government is singular, possessing a character altogether its own; but there is abundant evidence

that very few have seen just wherein it differs most essentially from the other governments of the world. There have been and are other federal systems quite similar, and scarcely any legislative or administrative principle of our Constitution was young even when that Constitution was framed. Contents: The House of Representatives The House of Representatives. Revenue and Supply The Senate The Executive

The Secret

In this controversial and provocative book, Mary Anne Franks examines the thin line between constitutional fidelity and constitutional fundamentalism. The Cult of the Constitution reveals how deep fundamentalist strains in both conservative and liberal American thought keep the Constitution in the service of white male supremacy. Constitutional fundamentalists read the Constitution selectively and self-servingly. Fundamentalist interpretations of the Constitution elevate certain constitutional rights above all others, benefit the most powerful members of society, and undermine the integrity of the document as a whole. The conservative fetish for the Second Amendment (enforced by groups such as the NRA) provides an obvious example of constitutional fundamentalism; the liberal fetish for the First Amendment (enforced by groups such as the ACLU) is less obvious but no less influential. Economic and civil libertarianism have increasingly merged to produce a deregulatory, "free-market" approach to constitutional rights that achieves fullest expression in the idealization of the Internet. The worship of guns, speech, and the Internet in the name of the Constitution has blurred the boundaries between conduct and speech and between veneration and violence. But the Constitution itself contains the antidote to fundamentalism. The Cult of the Constitution lays bare the dark, antidemocratic consequences of constitutional fundamentalism and urges readers to take the Constitution seriously, not selectively.
