Lectures on New Testament Theology

"There are cynics who say that a party platform is something that no one bothers to read and it doesn't very often amount to much. Whether it is different this time than it has ever been before, I believe the Republican Party has a platform that is a banner of bold, unmistakable colors, with no pastel shades." –Ronald Reagan, 1976 Republican National Convention When Ronald Reagan was called to the podium by President Ford during the 1976 Republican National Convention, he had no prepared remarks. But the unrehearsed speech he gave that night is still regarded as one of the most moving speeches of his political career. The reason he was able to give such a powerful speech on a moment's notice was that he was proclaiming the core principles of his heart and soul, which he had been teaching and preaching for years. The New Reagan Revolution reveals new insights into the life, thoughts, and actions of the man who changed the world during the 1980s. The challenges and threats we face today are eerily similar to the conditions in the world before the beginning of the Reagan era. The good news is that we already know what works. Ronald Reagan has given us the blueprint. This book is not merely a diagnosis of our nation's ills, but a prescription to heal our nation, rooted in the words and principles of Ronald Reagan. In these pages, you'll find a plan for returning America to its former greatness, soundness, and prosperity. It's the plan Ronald Reagan developed over years of study, observation, and reflection. It's a plan he announced to the nation, straight from his heart, one summer evening during America's 200th year. It's the plan he put into action during his eight years in office as the most effective president of the 20th century, and it is the plan we can use today to help return America to its former greatness, soundness, and prosperity.

Advances in Emerging Trends and Technologies

Ferdinand Christian Baur (1792-1860), one of the great innovators in the study of the New Testament, argued that each of its books reflects the interests and tendencies of its author in a particular religio-historical milieu. A critique of the writings must precede any judgments about the historical validity of individual stories about Jesus in the Gospels. Thus Baur could move beyond the impasse created by Strauss's Life of Jesus. Baur demonstrated that the Gospel of John is not a historical document comparable to the Synoptic Gospels and cannot be used to reconstruct the teaching of Jesus, and that the Synoptic Gospels must be read critically and selectively. He applied the same principles to the Epistles, arguing that only four are genuinely Pauline (Galatians, 1 and 2 Corinthians, and Romans). Baur's Lectures on New Testament Theology, delivered in Tübingen during the 1850s, summarize thirty years of his research. The lectures begin with an Introduction on the concept, history, and organization of New Testament theology. Part One is devoted to the teaching of Jesus, which Baur finds most reliably in Matthew. Part Two contains the teaching of the Apostles in three chronological periods. The first

period presents the theological frameworks of the Apostle Paul and the Book of Revelation; the second period, the frameworks of Hebrews, the Deutero-Pauline Epistles, James and Peter, the Synoptic Gospels and Acts; and the third period, those of the Pastoral Epistles and the Gospel of John.
