Investigating the Planet Ocean

A hermit crab who has outgrown his old shell moves
into a new one, which he decorates and enhances

with the various sea creatures he meets in his travels.

Fish Bioacoustics

In her third book inspired by First Nations' stories, children's author and illustrator Carroll Simpson explains the significance of community values. She introduces readers to a world of creatures like Sea Lion, Killer Whale, Dogfish and Kingfisher. Her dramatic tale of young twins and their transformation shows how working together keeps a community healthy. When new twins are born in a mythical Pacific Coast village, everyone celebrates because the birth of twins is a rare occasion; twins are the children of the salmon. But when the twins grow selfish and greedy, Thunderbird transforms them into a Two-Headed Sea Serpent. Can the Serpent's heads learn to work together? The question becomes more important when the salmon don't run up the river and the villagers start to go hungry. The Serpent's heads have to co-operate with each other to solve the mystery and restore the salmon run. Written for children aged 3 to 10, this charming story is illustrated with Simpson's distinctive colour paintings that celebrate First Nations culture. A glossary of mythical creatures and sea life provides informative teaching points and invites further exploration of West Coast cultures. Also available in hardcover.

Seattle's Totem Poles

The critical reading section on standardized tests, especially the SAT 1 exam, is often cited as a trouble

section for even the best test-takers. Examinees get test-targeted reading comprehension practice questions to score better with LearningExpress' series, Skill Builder in Focus. This specialized drill book provides the focused practice necessary for test-taking success. Plus, all answers are explained, using terms that clarify context, main ideas, themes, and critical thinking skills for effective studying and positive reinforcement. Almost every standardized test in verbal skills, including civil service exams, contains reading comprehension questions. Each practice consists of several passages followed by questions and answer explanations.

The Big Book of Words You Should Know

The Wednesday Wars

S'abadeb, *The Gifts* captures the essence of Coast Salish culture through its artistry, oral traditions, and history. Developed in conjunction with the first extensive exhibition of the art and culture of the Coast Salish peoples of Washington State and British Columbia, the book traces the development of Salish art from prehistory to the present. Sculpture in wood, stone, and bone--including monumental house posts--as well as expertly crafted basketry, woven regalia, and contemporary works in glass, print media, and painting showcase a sweeping artistic tradition and its contemporary vibrant manifestations. S'abadeb is the Lushootseed term for "gifts" and invokes a principle at the heart of Salish sculpture:

reciprocity, both in the public and spiritual domains. This richly symbolic word expresses the importance of giving gifts at potlatches, of giving thanks during first food ceremonies, of the creativity bestowed upon artists and other leaders, and of the roles of the master artists, oral historians, and cultural leaders in passing vital cultural information to the next generations. The theme of S'abadeb and practices of reciprocal exchange in Salish society are illuminated here through the intersection of art with ceremony, oral traditions, the land, and contemporary realities.

Octavia and Her Purple Ink Cloud

A 2008 Newbery Honor Book In this Newbery Honor-winning novel, Gary D. Schmidt offers an unforgettable antihero. *The Wednesday Wars* is a wonderfully witty and compelling story about a teenage boy's mishaps and adventures over the course of the 1967–68 school year in Long Island, New York. Meet Holling Hoodhood, a seventh-grader at Camillo Junior High, who must spend Wednesday afternoons with his teacher, Mrs. Baker, while the rest of the class has religious instruction. Mrs. Baker doesn't like Holling—he's sure of it. Why else would she make him read the plays of William Shakespeare outside class? But everyone has bigger things to worry about, like Vietnam. His father wants Holling and his sister to be on their best behavior: the success of his business depends on it. But how can Holling stay out of trouble when he has so much to contend with? A bully demanding cream puffs; angry rats; and a baseball hero signing autographs the very

same night Holling has to appear in a play in yellow tights! As fate sneaks up on him again and again, Holling finds Motivation—the Big M—in the most unexpected places and musters up the courage to embrace his destiny, in spite of himself.

The Atlas Obscura Explorer's Guide for the World's Most Adventurous Kid

In this innovative celebration of diversity and affirmation of individuality in animals and humans, Joan Roughgarden challenges accepted wisdom about gender identity and sexual orientation. A distinguished evolutionary biologist, Roughgarden takes on the medical establishment, the Bible, social science—and even Darwin himself. She leads the reader through a fascinating discussion of diversity in gender and sexuality among fish, reptiles, amphibians, birds, and mammals, including primates. *Evolution's Rainbow* explains how this diversity develops from the action of genes and hormones and how people come to differ from each other in all aspects of body and behavior. Roughgarden reconstructs primary science in light of feminist, gay, and transgender criticism and redefines our understanding of sex, gender, and sexuality. Witty, playful, and daring, this book will revolutionize our understanding of sexuality. Roughgarden argues that principal elements of Darwinian sexual selection theory are false and suggests a new theory that emphasizes social inclusion and control of access to resources and mating opportunity. She disputes a range of scientific and medical concepts, including

File Type PDF Orca Whale Curriculum Seattle Aquarium 66745

Wilson's genetic determinism of behavior, evolutionary psychology, the existence of a gay gene, the role of parenting in determining gender identity, and Dawkins's "selfish gene" as the driver of natural selection. She dares social science to respect the agency and rationality of diverse people; shows that many cultures across the world and throughout history accommodate people we label today as lesbian, gay, and transgendered; and calls on the Christian religion to acknowledge the Bible's many passages endorsing diversity in gender and sexuality. Evolution's Rainbow concludes with bold recommendations for improving education in biology, psychology, and medicine; for democratizing genetic engineering and medical practice; and for building a public monument to affirm diversity as one of our nation's defining principles.

Bright ocean colors and playful rhyme come together in this fun fish story that's sure to turn even the poutiest of frowns upside down. The Pout-Pout Fish is a 2009 Bank Street - Best Children's Book of the Year.

Orca

The Role of Scientists in the Professional Development of Science Teachers

S'abadeb, the Lushootseed word for "gifts," invokes the reciprocity that is at the heart of Salish culture. It expresses the importance of offering gifts at potlatches, giving thanks during ceremonies, respecting the creativity bestowed upon artists and leaders and honouring the master artists, oral historians and cultural leaders who pass vital cultural information to future generations. S'abadeb-The Gifts brings together current scholarship with indigenous knowledge for the first time. Twelve essays examine how the history and culture of gifts are reflected in art, including pieces written by: artists Susan Point (Musqueam) and Shaun Peterson (Puyallup/Tulalip)

File Type PDF Orca Whale Curriculum Seattle Aquarium 66745

scholars Carolyn Marr and Wayne Suttles cultural specialists Sonny McHalsie (Sto:lw) and Bruce Miller (Skokomish) More than 200 photographs, most of them full colour, showcase the best of Salish art, including monumental house posts, expertly crafted basketry and woven regalia and stunning contemporary works in glass wood, and paint.

Five Hundred and One Critical Reading Questions

Scientists nationwide are showing greater interest in contributing to the reform of science education, yet many do not know how to begin. This highly readable book serves as a guide for those scientists interested in working on the professional development of K-12 science teachers. Based on information from over 180 professional development programs for science teachers, the volume addresses what kinds of activities work and why. Included are useful examples of programs focusing on issues of content and process in science teaching. The authors present "day-in-a-life" vignettes, along with a suggested reading

File Type PDF Orca Whale Curriculum Seattle Aquarium 66745

list, to help familiarize scientists with the professional lives of K-12 science teachers. The book also offers scientists suggestions on how to take first steps toward involvement, how to identify programs that have been determined effective by teachers, and how to become involved in system-wide programs. Discussions on ways of working with teachers on program design, program evaluation, and funding sources are included. Accessible and practical, this book will be a welcome resource for university, institutional, and corporate scientists; teachers; teacher educators; organizations; administrators; and parents.

Earth Child

Stylish Designer Journal / Notebook. Interior 150 lined pages. Size 6"x 9". Glossy softcover. Perfect for everyday use. Perfectly spaced between lines to allow plenty of room to write. Wild Pages Press are publishers of unique journals, school exercise books, college or university lecture pads, memo books, notebooks, journals and travel journals that are a little bit quirky and different. Stunning covers, sturdy for everyday use. Great quality, we offer thousands, upon thousands of different designs to choose from. Our quality products make amazing gifts perfect for any special occasion or for a bit of luxury for everyday use. Our products are so versatile, they come in a wide range, be it the perfect travel companion, or a stylish lecture pad for college or university, cool composition and school exercise books for school, comprehensive notebook for work, or as a journal, the

perfect family heirloom to be treasured for years to come. Competitively priced so they can be enjoyed by everyone.

The Pout-Pout Fish

The link between private corporations and U.S. world power has a much longer history than most people realize. Transnational firms such as the United Fruit Company represent an earlier stage of the economic and cultural globalization now taking place throughout the world. Drawing on a wide range of archival sources in the United States, Great Britain, Costa Rica, and Guatemala, Colby combines "top-down" and "bottom-up" approaches to provide new insight into the role of transnational capital, labor migration, and racial nationalism in shaping U.S. expansion into Central America and the greater Caribbean. *The Business of Empire* places corporate power and local context at the heart of U.S. imperial history. In the early twentieth century, U.S. influence in Central America came primarily in the form of private enterprise, above all United Fruit. Founded amid the U.S. leap into overseas empire, the company initially depended upon British West Indian laborers. When its black workforce resisted white American authority, the firm adopted a strategy of labor division by recruiting Hispanic migrants. This labor system drew the company into increased conflict with its host nations, as Central American nationalists denounced not only U.S. military interventions in the region but also American employment of black immigrants. By the 1930s, just as Washington renounced military

File Type PDF Orca Whale Curriculum Seattle Aquarium 66745

intervention in Latin America, United Fruit pursued its own Good Neighbor Policy, which brought a reduction in its corporate colonial power and a ban on the hiring of black immigrants. The end of the company's system of labor division in turn pointed the way to the transformation of United Fruit as well as the broader U.S. empire.

The Salmon Twins

A twenty-five foot killer whale is captured and subsequently trained in a Seattle aquarium.

A House for Hermit Crab

When a professional states, "Your child has Autism Spectrum Disorder (ASD)," it is enough to make your whole world fall apart. What does it mean to be on the autism spectrum? How will this affect your child's life, your life, the life of your family, and others you interact with? What sorts of medications, therapies, and alternative methods are used to help manage the disorder? What are the financial and legal ramifications? How will this affect schooling, your spiritual growth, and everyday life? These are just a few of the questions that will rapidly cross your mind. *Caring for Autism: Practical Advice from a Parent and Physician* delves into all these questions and more. As the father of a daughter with ASD and as a trained psychiatrist who specializes in ASD, Dr. Michael A. Ellis provides a holistic view of what comes after diagnosis. In user-friendly tones, he answers the most commonly asked questions about what it's actually

File Type PDF Orca Whale Curriculum Seattle Aquarium 66745

like to live with ASD, what medications and therapies are available, and the global impact it has on the child's environment. With the help of his wife, Lori Layton Ellis, to provide a mother's perspective, Dr. Ellis shares personal stories of their 10-year journey in order to provide insight and support for anyone - patient, parent, caregiver - traversing the difficulties of autism.

Earth Child 2000

On a hot summer night in 1963, a teenager named Walt Crowley hopped off a bus in Seattle's University District, and began his own personal journey through the 1960s. Four years later at age 19, he was installed as a rapidograph in residence at the Helix, the region's leading underground newspaper. His cartoons, cover art, and political essays helped define his generation's experience during that tumultuous decade. *Rites of Passage: A Memoir of the Sixties in Seattle* weaves Crowley's personal experience with the strands of international, intellectual, and political history that shaped the decade. As both a member and in-house critic of the New Left and counter-culture, the author offers a unique perspective in explaining why the experiments and excess of the period made sense at the time. Anti-war marches, human be-ins, rock festivals, psychedelic drugs, underground newspapers, free universities, light shows, inner-city riots, radical skirmishes, and hippie antics are chronicled with personal anecdotes, contemporary accounts, and historical insights. In the pages of *Rites of Passage*, the reader will encounter

File Type PDF Orca Whale Curriculum Seattle Aquarium 66745

Black (and White) Panthers, the Seattle and Chicago Seven, Weathermen and Radical Women, and many more remarkable characters. As an engaging blend of history and personal reminiscence, *Rites of Passage* places the sixties in a context unavailable to its participants at the time. In addition to his text, Crowley has assembled a chronology of the decade beginning with its harbingers in the forties and fifties and continuing through its aftermath. This compilation covers political, social, and cultural events, and provides the most complete synopsis of sixties history now in print.

Exploration

Informal science is a burgeoning field that operates across a broad range of venues and envisages learning outcomes for individuals, schools, families, and society. The evidence base that describes informal science, its promise, and effects is informed by a range of disciplines and perspectives, including field-based research, visitor studies, and psychological and anthropological studies of learning. *Learning Science in Informal Environments* draws together disparate literatures, synthesizes the state of knowledge, and articulates a common framework for the next generation of research on learning science in informal environments across a life span. Contributors include recognized experts in a range of disciplines--research and evaluation, exhibit designers, program developers, and educators. They also have experience in a range of settings--museums, after-school programs, science

File Type PDF Orca Whale Curriculum Seattle Aquarium 66745

and technology centers, media enterprises, aquariums, zoos, state parks, and botanical gardens. Learning Science in Informal Environments is an invaluable guide for program and exhibit designers, evaluators, staff of science-rich informal learning institutions and community-based organizations, scientists interested in educational outreach, federal science agency education staff, and K-12 science educators.

Global Otter Conservation Strategy

Drawing on interviews, official records, private archives, and the author's own family history, this is the definitive story of how the feared and despised "killer" became the beloved "orca", and what that has meant for our relationship with the ocean and its creatures

Captive Orcas

The Cat in the Hat, Sally, and Dick take an undersea voyage aboard the S.S. Undersea Glubber! Traveling down from the Sunny Zone to the Dark Zone to the Trench at the bottom, Captain Cat and his crew get up close and personal with the different life forms found at each level of the ocean. Along the way, they meet sharks, jellyfish, dolphins, manatees, whales, and sea cucumbers, to name just a few!

The World Book Encyclopedia

This new definitive volume on fish auditory systems will interest investigators in both basic research of fish bioacoustics as well as investigators in applied aspects of fisheries and resource management. Topics cover structure, physiology, localization, and acoustic behavior as well as more applied topics such as using sound to detect and locate fish.

Descendants of Johan Zimmermann and Christine Schuld Ewert Zimmermann

Do you know what "quatrefoil" and "impolitic" mean? What about "halcyon" or "narcolepsy"? This book is a handy, easy-to-read reference guide to the proper parlance for any situation. In this book you will find: Words You Absolutely Should Know (covert, exonerate, perimeter); Words You Should Know But Probably Don't (dour, incendiary, scintilla); Words Most People Don't Know (schlimazel, thaumaturgy, epergne); Words You Should Know to Sound Overeducated (ad infinitum, nugatory, garrulity); Words You Probably Shouldn't Know (priapic, damnatory, labia majora); and more. Whether writing an essay, studying for a test, or trying to impress friends, family, and fellow cocktail party guests with their prolixity, you will achieve magniloquence, ebullience, and flights of rhetorical brilliance.

S'abadeb

How to Make Books

Identifies and describes the distinctive features, characteristics, behavior, distribution, habitat, and population of the diverse whale and dolphin species

Scripps Institution of Oceanography, 1903-1978

"Hoyt's passionate sense of kinship with orca makes

File Type PDF Orca Whale Curriculum Seattle Aquarium 66745

his account effective as both a science and literature. He has chronicled his adventures and discoveries with grace, insight, wit--and a comprehensiveness that might satisfy even Herman Melville." (Discover Magazine) Star performers in aquariums and marine parks, killer whales were once considered to be too dangerous to approach in the wild. Erich Hoyt and his colleagues spent seven summers following these intelligent and playful creatures in the waters off northern Vancouver Island, intent on dispelling the killer myth. Orca: The Whale Called Killer is Hoyt's exciting account of those summers of adventure and discovery, and the definitive, classic work on the orca or killer whale. The Free Willy films, inspired in part by Hoyt's pioneering writing about orcas, tell the story of a captive orca being returned to the wild. (Hoyt, in fact, recommended Keiko, the orca who became the star of Free Willy, to Warner Bros.) But Orca: The Whale Called Killer tells the true story of wild orcas befriending humans.

Instructor

Exploring the Pacific States Through Literature

Robert Trivers is a pioneering figure in the field of sociobiology. For Natural Selection and Social Theory, he has selected eleven of his most influential papers, including several classic papers from the early 1970s on the evolution of reciprocal altruism, parent-offspring conflicts, and asymmetry in sexual selection,

File Type PDF Orca Whale Curriculum Seattle Aquarium 66745

which helped to establish the centrality of sociobiology, as well as some of his later work on deceit in signalling, sex antagonistic genes, and imprinting. Trivers introduces each paper, setting them in their contemporary context, and critically evaluating them in the light of subsequent work and further developments. The result is a unique portrait of the intellectual development of sociobiology, with valuable insights for evolutionary biology, anthropology, and psychology.

The Sierra Club Handbook of Whales and Dolphins

From zines you can fold in a minute to luxurious leather journals and sumptuous sketchbooks, *How to Make Books* will walk you through the easy basics of bookmaking. Whether you're a writer, a scrapbooker, a political activist, or a postcard collector, let book artist Esther K. Smith be your guide as you discover your inner bookbinder. Using foolproof illustrations and step-by-step instructions, Smith reveals her time-tested techniques in a fun, easy-to-understand way.
