Origami Sea Life

Internationally renowned origami artist John Montroll presents 26 models of horses. Full-color illustrations accompany detailed instructions for folding fanciful figures -- including a stick horse, rocking horse, unicorn, and Pegasus -- as well as actual breeds such as Clydesdale, thoroughbred, and mustang. Suitable

for folders at all levels, the models range from simple to complex. Dover Original.

The Joy of Origami

Did you know that any straight-line drawing on paper can be folded so that the complete drawing can be cut out with one straight scissors cut? That there is a planar linkage that can trace out any algebraic curve, or even 'sign your name'? Or that a 'Latin cross' unfolding of a cube can be refolded to 23 different convex polyhedra? Over the past decade, there has been a surge of interest in such problems, with applications ranging from robotics to protein folding. With an emphasis on algorithmic or computational aspects, this treatment gives hundreds of results and over 60 unsolved 'open problems' to inspire further research. The authors cover one-dimensional (1D) objects (linkages), 2D objects (paper), and 3D objects (polyhedra). Aimed at advanced undergraduate and graduate students in mathematics or computer science, this lavishly illustrated book will fascinate a broad audience, from school students to researchers.

Modern Paper Crafts

This richly illustrated book provides step-by-step instructions for the construction of over 30 different modular origami structures. The author describes basic folding techniques required to construct the "modules" that are used as building blocks to construct complex ornamental models. The diagrams are clear, crisp, and easy to follow, and are

accompanied by inspiring color photographs. Additional tips encourage the reader to design their own original creations. Advance Praise for *Marvelous Modular Origami* "A must-have for any modular origami polyhedra enthusiast." -Rona Gurkewitz, co-author of *Multimodular Origami Polyhedra* "The models are paper folding in its purest form. They range from simple Sonobe to floral and geometrical constructions. All are eye-catching and satisfying to fold, and the finished constructions are pleasing to behold. Also included are short sections on the mathematics behind the shapes and optimum color choices." -David Petty, author of *Origami A-B-C* "In this colorful book, you'll find wonderful original origami modular creations. Meenakshi's clear instructions and helpful hints will have you zipping through these modules as well as improvising your own." -Rachel Katz, co-author of *FUN FOLDS: Language Learning Through Paper Folding* "*Marvelous Modular Origami* is a colorful addition to the literature of mathematical origami." -Florence Temko, author of many origami and other craft books

People lived because she killed. People died because he lived. Zafira is the Hunter, disguising herself as a man when she braves the cursed forest of the Arz to feed her people. Nasir is the Prince of Death, assassinating those foolish enough to defy his autocratic father, the sultan. If Zafira was exposed as a girl, all of her achievements would be rejected; if Nasir displayed his compassion, his father would punish him in the most brutal of ways. Both Zafira and Nasir are legends in the kingdom of Arawiya—but neither wants to be. War is brewing, and the Arz sweeps closer with each passing day, engulfing the land in shadow. When Zafira embarks on a quest to

uncover a lost artifact that can restore magic to her suffering world and stop the Arz, Nasir is sent by the sultan on a similar mission: retrieve the artifact and kill the Hunter. But an ancient evil stirs as their journey unfolds—and the prize they seek may pose a threat greater than either can imagine.

World's Best Origami

The world of sixteen-year-old Jeremy Duncan revolves around his insatiable "growing boy" appetite, lip-locking with squeeze Sarah, keeping his jerry-rigged vehicle roadworthy, and playing with his band, Goat Cheese Pizza. Somewhere in the background, he's vaguely aware of some muted voices, constantly beseeching him to pick up his Matterhorn-sized clothes pile, to be home on time (so lame!), and to (God forbid!) communicate with them. The disembodied voices are those of Connie and Walt, his mostly patient, but sometimes frustrated to exploding, parents. In Zits, they portray a hilarious view of coping with a teenager and with being a teenager. Created in 1997 by Pulitzer Prize-winning editorial cartoonist Jim Borgman and Reuben Award-winning cartoonist/writer Jerry Scott, Zits appears in more than 1,600 newspapers worldwide in 45 countries and is translated into 15 different languages. The comic has an estimated daily readership of more than 200 million readers.

Zits Apocalypse

For over 1000 years people have practiced origami-the Japanese art of paper folding-and relatively little has changed. In Lawrence Beall's thought provoking visual and verbal sketchbook, he shares an unfiltered perspective on his journey as an origami artist.

Shortly after becoming a master of origami, he worked to understand why museums refused to include origami in their collections. Ultimately, he deemed origami's countless rules and strict standards of homogeneity as barriers to innovative artistic expression. "The systematic taboos present in the art form's heritage have prevented the origami from reaching 'museum-quality' work." In December 2016, Beall broke away from the international origami community to create his own new style of folded art: Neo Origami. His new style has only one common theme: "There are no rules." Beall pushes the boundaries of what is imaginable from the ancient art form. "Origami ought to be stripped to only its purest essence—the fundamental beauty inherent to the folded form."

Laugh-Out-Loud Jokes for Kids

Origami master Sy Chen shares his passion of paper folding through 51 of his own delightful heart designs. Ranging from simple to intermediate difficulty level, he combines basic heart designs and the color changing technique to make elegant heart models. The heart shape is one of the most powerful symbols that express love, and combining the folded heart with other objects makes the models speak for themselves. The author shows the reader how to incorporate origami hearts into letters, cards, and rings that can be used in daily life. Folding can be playful and magical, as action model hearts will not only amuse you, but also stun your friends and audiences with endless entertainment.

Neo Origami

Hallelujah, it's a book! After proving itself to be the "funniest calendar of the year" (according to Gene Shalit), "irresistible" (USA Weekend), and "habit-forming" (Maxim magazine), the Nuns Having Fun calendar has inspired Nuns Having Fun, a book of endearing nuttiness. Catholic kitsch doesn't get any funnier. Written by Maureen Kelly and Jeffrey Stone, pitch-perfect co-authors of the nuns calendar and the New York Times bestseller *Growing Up Catholic*, Nuns Having Fun features hundreds of sisters in full habit, cutting loose and having a hoot. Here are nuns in the surf ("This is even more fun than walking on water"), nuns in bumper cars ("We brake for Jesus"), nuns in a beer hall ("Ale Marys"), and nuns in the museum, huddled in front of a study of nudes ("It's okay to open your eyes. Sister Wendy says it's art"). There are nuns on skates, at bat, at the theater, skeet shooting (nuns with guns!), even hitting the slots (you

know it's for a good cause). The 125 images are from the 1950s and '60s, black-and-white and possessing a pure retro charm; the written material is all-new. Drawing on their years as parochial school students, the authors explore the lore and legends surrounding nuns, including Favorite Punishments from Nuns, Nuns Say the Darndest Things, How to Recognize a Nun After Vatican II, a Wimple Watch, and List of People Who Could Have Been Nuns. As Sister says, "To err is human. To laugh is divine."
