This volume is a continuation of the catalogue compiled by Colin F. Baker and Meira Polliack, *Arabic and Judaeo-Arabic Manuscripts in the Cambridge Genizah Collections: Arabic Old Series (T-S Ar. 1a-54)* published in 2001, and covers the manuscripts in the New Series. The volume describes almost 9,500 Arabic and Judaeo-Arabic fragments of the Cairo Genizah. The manuscripts include Bible translations and commentaries, philosophical, medical and historical texts, as well as business and private letters. They will be of interest to scholars from a broad range of fields including theology, history of the Middle East, Jewish studies, Middle Arabic, comparative Semitic studies, medicine, mathematics and geography. These manuscripts offer a rare glimpse into the everyday lives of the Jews living in Arab lands in the medieval period.

This publication takes stock of economic developments in Malaysia since the Asian economic crisis of 1997. It looks at the aspects of economic performance, policy and reform that contributed to the strong recovery. The individual papers include: a comparative review of policies and performance; potential output and inflation; challenges to fiscal management; capital controls in response to the Asian crisis; financial sector issues; corporate performance and reform.

Many agree that the foreign aid system - which today involves virtually every nation on earth - needs drastic change. But there is much conflict as to what should be done. In *Aid on the Edge of Chaos*, Ben Ramalingam argues that what is most needed is the creative and innovative transformation of how aid works. Foreign aid today is dominated by linear, mechanistic ideas that emerged from early twentieth century industry, and are ill-suited to the world we face today. The problems and systems aid agencies deal with on a daily basis have more in

common with ecosystems than machines: they are interconnected, diverse, and dynamic; they cannot be just simply re-engineered or fixed. Outside of aid, social scientists, economists, business leaders, and policy makers have started applying innovative and scientific approaches to such problems, informed by ideas from the 'new science' of complex adaptive systems. Inspired by these efforts, aid practitioners and researchers have started experimenting with such approaches in their own work. This book showcases the experiences, insights, and often remarkable results of innovative thinkers and practitioners who are working to bring these approaches into the mainstream of aid. From transforming child malnutrition to rethinking economic growth, from building peace to reversing desertification, from rural Vietnam to urban Kenya, the ideas of complex systems thinking are starting to be used to make foreign aid more relevant, more appropriate, and more catalytic. *Aid on the Edge of Chaos* argues that such ideas and approaches should play a vital part of the transformation of aid. Aid should move from being an imperfect post-World War II global resource transfer system, to a new form of global cooperation that is truly fit for the twenty-first century.

Every day, large numbers of altruistic individuals, in the absence of any legal duty, provide substantial and essential services for elderly and disabled people. In doing so, many such informal carers suffer financial and other disadvantages. This book considers the scope for a "private law" approach to rewarding, supporting or compensating carers, an increasingly vital topic in the context of an ageing population and the need for savings in public expenditure. Adopting a comparative approach, the book explores the recognition of the informal carer and his or her relationship with the care recipient within diverse fields of private law, from unjust enrichment to succession. Aspects of the analysis include the importance of a promise of a reward from the care recipient and the appropriate measure of any remedy. In considering the potential for expansion of a "private law" approach for carers, the book addresses the fundamental and controversial question of the price of altruism. Winner of the University of Cambridge's Yorke Prize 2014

## **The Unschooled Mind**

Much maligned in the past as wasteful and self-serving, government public relations provides several distinct services that can be used to advance the

substantive mission of an agency in ways that save money, time, and effort. In the same manner as budgeting, HR, strategic planning, and performance assessment, public relations must be included in t

Based on years of research conducted at the NASA Jet Propulsion Laboratory, Low-Energy Lunar Trajectory Design provides high-level information to mission managers and detailed information to mission designers about low-energy transfers between Earth and the moon. The book answers high-level questions about the availability and performance of such transfers in any given month and year. Low-energy lunar transfers are compared with various other types of transfers, and placed within the context of historical missions. Using this book, designers may reconstruct any transfer described therein, as well as design similar transfers with particular design parameters. An Appendix, "Locating the Lagrange Points," and a useful list of terms and constants completes this technical reference. Surveys thousands of possible trajectories that may be used to transfer spacecraft between Earth and the moon, including transfers to lunar libration orbits, low lunar orbits, and the lunar surface Provides information about the methods, models, and tools used to design low-energy lunar transfers Includes discussion about the variations of these transfers from one month to the next, and the important operational aspects of implementing a low-energy lunar transfer Additional

discussions address navigation, station-keeping, and spacecraft systems issues

Contemporary attachment theory both enriches our understanding of human development and informs clinical practice. Examining the relational bonds between young children and their caregivers, it traces its origins to several scientific and

social fields, most notably psychoanalysis, social work, behaviorism, ethology, evolutionary theory, and biology. The first portion of this book examines attachment theory and its relationship to other psychodynamic theories of development and then discusses the landmark contributions of John Bowlby, the "father" of modern attachment theory. The section concludes with a detailed summary of research on attachment, highlighting the work of Mary Ainsworth, Mary Main, Allan Sroufe, and Peter Fonagy. The second portion focuses on clinical applications with children, adolescents, and adults. Brief vignettes and lengthier case illustrations consider a verity of attachment disorders and treatment approaches, paying special attention to clinical method and technique, process dimensions, and transference and countertransference phenomena. Cases are set in a range of treatment venues, such as college and family counseling service, community mental health centers, and private practice, and involve an ethnoculturally and clinically diverse clientele.

Sacred sites offer believers the possibility of communing with the divine and achieving deeper insight into their faith. Yet their spiritual and cultural importance can lead to competition as religious groups seek to exclude rivals from practicing

potentially sacrilegious rituals in the hallowed space and wish to assert their own claims. Holy places thus create the potential for military, theological, or political clashes, not only between competing religious groups but also between religious groups and secular actors. In *War on Sacred Grounds*, Ron E. Hassner investigates the causes and properties of conflicts over sites that are both venerated and contested; he also proposes potential means for managing these disputes. Hassner illustrates a complex and poorly understood political dilemma with accounts of the failures to reach settlement at Temple Mount/Haram el-Sharif, leading to the clashes of 2000, and the competing claims of Hindus and Muslims at Ayodhya, which resulted in the destruction of the mosque there in 1992. He also addresses more successful compromises in Jerusalem in 1967 and Mecca in 1979. Sacred sites, he contends, are particularly prone to conflict because they provide valuable resources for both religious and political actors yet cannot be divided. The management of conflicts over sacred sites requires cooperation, Hassner suggests, between political leaders interested in promoting conflict resolution and religious leaders who can shape the meaning and value that sacred places hold for believers. Because a reconfiguration of sacred space requires a confluence of political will, religious authority, and a window of opportunity, it is relatively rare. Drawing on the study of religion and the study of politics in equal measure, Hassner's account offers insight into the often-violent dynamics that come into play at the places where religion and politics collide.

### **The Law Journal**

Excellent technical writing on corporation tax abounds, but it tends to be inaccessible to public lawyers, political theorists and political economists. Although recent years have seen not only an explosion in public law scholarship but also a reawakening of interest in interpretative political theory and political economy, the potential of these perspectives to illuminate the corporation tax debate has remained unexplored. In this important work, John Snape seeks to reconcile these disparate strands of scholarship and to contribute to a new way of understanding and conceptualising the reform of the law relating to corporate taxation. Drawing on important developments in public law scholarship, the study combines elements of political theory and political economy. It advances a new interpretation of

corporation tax law as an instrument of rule, through the maximisation of a nation's economic potential. Snape shows how corporate taxation belongs at the centre of any discussion of economic globalisation, not only because of the potential of national tax systems to influence inward investment decisions but also because of the potential of those decisions to shape the public interest that those tax systems might embody. Following public law and politics models, the book looks afresh at the impact of Britain's political institutions, of the processes of its representative government and of the theory that moulds and orders the values that the corporation tax code contains. This is a timely exploration of cutting-edge issues of public policy.

## **Index of Conference Proceedings**

The only radiation therapy text written by radiation therapists, Principles and Practice of Radiation Therapy, 4th Edition helps you understand cancer management and improve clinical techniques for delivering doses of radiation. A problem-based approach makes it easy to apply principles to treatment planning and delivery. New to this edition are updates on current equipment, procedures, and treatment planning. Written by radiation therapy experts Charles Washington and Dennis Leaver, this comprehensive text will be useful throughout your radiation therapy courses and beyond. Comprehensive coverage of radiation therapy includes a clear introduction and overview plus complete information on physics, simulation, and treatment planning. Spotlights and shaded boxes identify the most important concepts. End-of-chapter questions provide a useful review. Chapter objectives, key terms, outlines, and summaries make it easier to prioritize, understand, and retain key information. Key terms are bolded and defined at first mention in the text, and included in the glossary for easy reference. UPDATED chemotherapy section, expansion of What Causes Cancer, and inclusions of additional cancer biology terms and principles provide the essential information needed for clinical success. UPDATED coverage of post-image manipulation

techniques includes new material on Cone beam utilization, MR imaging, image guided therapy, and kV imaging. NEW section on radiation safety and misadministration of treatment beams addresses the most up-to-date practice requirements. Content updates also include new ASRT Practice Standards and AHA Patient Care Partnership Standards, keeping you current with practice requirements. UPDATED full-color insert is expanded to 32 pages, and displays images from newer modalities.

More than fifty specialists have contributed to this new edition of volume 4 of The

Cambridge Bibliography of English Literature. The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis, articulation and coordination that it has been retained in all its essentials for the new edition. The task of the new contributors has been to revise and integrate the lists of 1940 and 1957, to add materials of the following decade, to correct and refine the bibliographical details already available, and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries.
