Sports-specific Rehabilitation

With modules corresponding to the material in the Gould's Pathophysiology for the Health Professions, 5th Edition text, Pathophysiology Online demonstrates disease processes and disorders in a clear and visual way. Animations, slide shows, and other interactive resources enhance understanding of pathophysiology for any learning style. A case-based approach presents information in small "chunks" for

easier comprehension, encourages critical thinking, and helps you apply concepts. Within each module, a set of lessons lets you study and review pathophysiology - with exercises to allow self-assessment. Developed for students in the health professions, Pathophysiology Online is the perfect tool to get the most out of your book! Clinical Correlation case studies let you apply pathophysiology to the real world, with each case including a patient with a pathology pertaining to a specific body system, along with an electronic health record and self-assessment questions. Animations, slide shows, and audio narration demonstrate the more difficult disease and health processes, showing how, why, when, and the order in which abnormal physiologic processes take place. Self-assessment activities promote learning with Self-Check activities such as image association, drag-and-drop, matching, multiple choice, and flash card activities, and Think About short-answer exercises - all with immediate feedback and source references. Student-friendly features in each module include a lesson overview with learning objectives, glossary terms, and a module summary. Audio glossary offers quick, easy access to new and unfamiliar terms - some with illustrations - along with pronunciations and definitions. Additional photos and illustrations not included in the textbook visually reinforce learning.

Concise and readable approach includes the information you need without overwhelming you, even if you have a limited scientific background. Format for individual disorder discussions includes 1) background, 2) pathophysiology, 3) etiology, 4) signs and symptoms, 5) diagnoses, 6) possible related complications/disorders, and 7) treatments/research. UNIQUE! Apply Your Knowledge questions ask you to use what you've learned to predict What can go wrong with this structure or system, transitioning you from normal anatomy and physiology into pathophysiology. UNIQUE! Think About questions alert you to important points and help with self-evaluation, test preparation, and review. Warning Signs boxes help in identifying the pre-emptive signs of physiologic events such as strokes. Emergency Treatment boxes give step-by-step instructions to follow for emergencies such as shock, cardiac arrest, and pneumothorax. Research boxes discuss new developments, problem areas of pathophysiology, and complications associated with research. Key terms, learning objectives, and bulleted chapter summaries help you focus on key concepts and information. NEW!
