Hybrid Identities

Music is a tremendously powerful channel through which people develop their personal and social identities. Music is used to communicate emotions, thoughts, political statements, social relationships, and physical expressions. But, just as language can mediate the construction and negotiation of developing identities, so music can also be a means of communication through which aspects of people's identities are constructed. Music can have a profound influence on our developing sense of identity, our values, and our beliefs, be it from rock music, classical music, or jazz. Musical identities (MacDonald, Hargreaves and Miell, 2002) was unique in being one of the first books to explore this fascinating topic. This new book documents the remarkable expansion and growth in the study of musical identities since the publication of the earlier work. The editors identify three main features of current psychological approaches to musical identities, which concern their definition, development, and the identification of individual differences, as well as four main real-life contexts in which musical identities have been investigated, namely in music and musical institutions; specific geographical communities; education; and in health and well-being. This conceptual framework provides the rationale for the structure of the Handbook. The book is divided into seven main sections. The first, 'Sociological, discursive and narrative approaches', includes several general theoretical accounts of musical identities from this perspective, as well as some more specific investigations. The second and third main sections deal in depth with two of the three psychological topics described above, namely the development of and individual differences in musical identities. The fourth, fifth and sixth main sections pursue three of the real-life contexts identified above, namely 'Musical institutions and practitioners', 'Education', and 'Health and well-being'. The seventh and final main section of the Handbook - 'Case studies' - includes chapters which look at particular musical identities in specific times, places, or contexts. The multidisciplinary range and breadth of the Handbook's contents reflect the rapid changes that are taking place in music, in digital technology, and in their role in society as a whole, such that the study of musical identity is likely to proliferate even further in the future.

Imagining Frontiers, Contesting Identities

Offers accounts of the diversity of living transgender. This book is suitable for scholars and students in sociology and gender and sexuality studies.

Navigating Multiple Identities

Superheroes have been the major genre to emerge from comics and graphic novels, saturating popular culture with images of muscular men and sexy women. A major aspect of this genre is identity in the roles played by individuals, the development of identities through extended stories and in the ways the characters inspire audiences. This collection analyses stories from popular comics franchises such as Batman, Captain America, Ms Marvel and X-Men, alongside less well known comics such as Kabuki and Flex Mentallo. It explores what superhero narratives can reveal about our attitudes towards femininity, race, maternity, masculinity and queer culture. Using this approach, the volume asks questions such as why there are no black supervillains in mainstream comics, how second wave feminism and feminist film theory may help us to understand female comic book characters, the ways in which Flex Mentallo transcends the boundaries of straightness and gayness and how both fans and industry appropriate the sexual identity of superheroes. The book was originally published in a special issue of the Journal of Graphic Novels and Comics.

Tribal Identities

Social scientists attached to the Centre for Applied Cross Cultural Research at Victoria University of Wellington examine issues of New Zealand identity.

Identity

In our increasingly complex, globalized world, people often carry conflicting psychosocial identities. This volume considers individuals who are navigating across racial minority or majority status, various cultural expectations and values, gender identities, and roles. The authors explore how people bridge loyalties and identifications.

Transgender Identities

Online Identities: Creating and Communicating the Online Self presents a critical investigation of the ways in which representations of identities have shifted since the advent of digital communications technologies. Critical studies over the

past century have pointed to the multifaceted nature of identity, with a number of different theories and approaches used to explain how everyday people have a sense of themselves, their behaviors, desires, and representations. In the era of interactive, digital, and networked media and communication, identity can be understood as even more complex, with digital users arguably playing a more extensive role in fashioning their own self-representations online, as well as making use of the capacity to co-create common and group narratives of identity through interactivity and the proliferation of audio-visual user-generated content online. Makes accessible complex theories of identity from the perspective of today's contemporary, digital media environment Examines how digital media has added to the complexity of identity Takes readers through examples of online identity such as in interactive sites and social networking Explores implications of inter-cultural access that emerges from globalization and world-wide networking

Transnational Identities

In the new world of work and organizations, creating and maintaining a positive identity is consequential and challenging for individuals, for groups and for organizations. New challenges for positive identity construction and maintenance require new theory. This edited volume uncovers new topics and new theoretical approaches to identity through the specific focus on positive identities of individuals, groups, organizations and communities. This volume aims to forge new ground in identity research and organizations through a compilation of new frame-breaking chapters on positive identity written by leading identity scholars. In chapters that build theoretical and empirical bridges between identity and growth, authenticity, relationships, hope, sustainability, leadership, resilience, cooperation, and community reputation and other important variables, the authors jumpstart an exciting domain of research on new ways that work organizations are sites of and contributors to identities that are beneficial or valuable to individuals or collectives. This volume invites readers to consider, "When and how does applying a positive lens to the construct of identity generate new insights for organizational researchers?" A unique feature of this volume is that it brings together explorations of identity from multiple levels of analysis: individual, dyadic, group, organization and community. Commentary chapters integrate the chapters within each level of analysis, illuminate core themes and unearth new questions. The volume is designed to accomplish three objectives: To establish Positive Identities and Organizations as an interdisciplinary, multi-level domain of inquiry To integrate a focus on Positive Identity with existing theory and research on identity and organizations To map out a vibrant new research territory in organizational studies . This volume will appeal to an international community of scholars in Management, Psychology, and Sociology, as well as practitioners who seek to generate positive identity-related dynamics, states and outcomes in work organizations.

Telling Identities

The identity implications have been overlooked from discussions on devolution, which have tended to focus on constitutional, legal and financial issues. In this volume, contributors from the communities under discussion explore the ways in which devolution is experienced and understood by citizens from the devolved regions of the UK. The additional inclusion of a US perspective allows parallels with American federalism to be drawn out. Informed by a discursive/textual/communication approach to identity, *Devolution and Identity* offers a range of theoretical and empirical perspectives, including both macro- and micro-level analyses of devolution and identity processes. Themes covered include discourse and interaction, national identity, flags and emblems, gender representation, newspaper letters, regional marketing, language ideology, history and culture, artistic practice, minority identities and political ideology. In exploring the impact of the devolution process on both individual and group identities, this book provides a richer understanding of the devolution process itself, as well as a new understanding of the relationship between socio-political structures and identity.

Identity

'The book is easy to use and its layout demonstrates some skill in constructing volumes that 'work' as study guides and reference tools. The merit of this book goes well beyond its suitability for course applications. Contemporary ideas on identity provide new meanings for an old concept' - Multilingual and Multicultural In recent years, identity and difference have been the focus of key debates in cultural studies. This broad-ranging book examines the challenge of these debates and outlines their applications to central questions of gender, sexuality, embodiment, health, 'race' and nation. The text renders accessible some of the most exciting and controversial issues in recent cultural studies. It comb

Albanian Identities

Playing and watching sport can teach us a great deal about wider social issues. This book looks at how identities are constructed and reinforced in sport, exploring notions of race, class, sexuality and nationalism. With contributions from international experts, this book is key reading for students of sociology and sports studies.

American Identities

Adolescent Identities draws the reader into the inner world of the adolescent to examine the process of identity formation through the various lenses of history, anthropology, sociology, psychology, and psychoanalysis. The volume reveals there is no single "normal" adolescent, nor is there a singular adolescent experience. Editor Deborah L. Browning illustrates that in the course of development, each individual must integrate one's unique biologically-given constitution and temperament,

personal life history, and the influence of the social and cultural milieu. The book consists of six sections, arranged by concentric circles of influence, from the most exterior, identifiable, and potentially overt and conscious, to the most internal, private, and potentially unconscious concerns. Opening papers are drawn from sociology, European history, and cross-cultural anthropology, and address the question of whether and how adolescence can be considered a stage in development. The second section explores how visible or potentially knowable minority statuses are experienced, and how these interact with individual identity processes. Moving closer to the adolescent's interpersonal world, the third section presents papers about intimate relationships between adolescents and about the conscious preoccupations of adolescents when they are alone. Extensive excerpts of Erikson's most important contributions on identity formation and adolescence are offered in the fourth section. Papers on the most internal, private, and potentially unconscious conflicts comprise the fifth section. The book concludes with a section of papers on "failed solutions" to the challenge of adolescent identity consolidation: homelessness, drug abuse, eating disorders, and suicide. Adolescent Identities provides mental health practitioners, teachers, and graduate students in both fields with a variety of perspectives on the internal experience of adolescents.

Nested Identities

"Social Identity provides a clearly-written accessible introduction to sociological and social anthropological approaches to identity. Looking at the work of Mead, Goffman and Barth, this book makes clear their relevance to everyday life. Insisting that reflexive self identity is not a modern phenomenon, the core argument is that individual and collective identity can both be understood using the same model, as 'internal' and 'external' processes." "Social Identity brings together sociological and social anthropological theories of identity, and makes an original contribution to social theory. Focusing on identity as individual and collective, this book brings us a fresh perspective on the relationship between the individual and society. This book provides an essential guide to the concept of social identity, offering students critical discussions of Schutz, Berger and Luckman, Becker, Anthony Cohen, Giddens, Bourdieu and many others."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

Curriculum

Investigating Identities: Questions of Identity in Contemporary International Crime Fiction is one of the relatively few books to date which adopts a comparative approach to the study of the genre. This collection of twenty essays by international scholars, examining crime fiction production from over a dozen countries, confirms that a comparative approach can both shed light on processes of adaptation and appropriation of the genre within specific national, regional or local contexts, and also uncover similarities between the works of authors from very different areas. Contributors explore discourse concerning

national and historical memory, language, race, ethnicity, culture and gender, and examine how identity is affirmed and challenged in the crime genre today. They reveal a growing tendency towards hybridization and postmodern experimentation, and increasing engagement with philosophical enquiry into the epistemological dimensions of investigation. Throughout, the notion of stable identities is subject to scrutiny. While each essay in itself is a valuable addition to existing criticism on the genre, all the chapters mutually inform and complement each other in fascinating and often unexpected ways. This volume makes an important contribution to the growing field of crime fiction studies and to ongoing debates on questions of identity. It will therefore be of special interest to students and scholars of the crime genre, identity studies and comparative literature. It will also appeal to all who enjoy reading contemporary crime fiction.

Contesting Identities

Henri Tajfel made a major contribution to social psychology in Europe. This collection bring together the ideas of authors who worked with him in Bristol. Each has been strongly influenced by Tajfel, an influence which has encouraged diverse approaches and the development of social identity theory.

Identity Theory

Publisher's description: Since the earliest days of the silent era, American filmmakers have been drawn to the visual spectacles of sports and their compelling narratives of conflict, triumph, and individual achievement. In *Contesting Identities* Aaron Baker examines how these cinematic representations of sports and athletes have evolved over time--from *The Pinch Hitter* and Buster Keaton's *College* to *White Men Can't Jump*, *Jerry Maguire*, and *Girlfight*. He focuses on how identities have been constructed and transcended in American society since the early twentieth century. Whether depicting team or individual sports, these films return to that most American of themes, the master narrative of self-reliance. Baker shows that even as sports films tackle socially constructed identities such as class, race, ethnicity, sexuality, and gender, they ultimately underscore transcendence of these identities through self-reliance. In addition to discussing the genre's recurring dramatic tropes, from the populist prizefighter to the hot-headed rebel to the "manly" female athlete, Baker also looks at the social and cinematic impacts of real-life sports figures from Jackie Robinson and Babe Didrikson Zaharias to Muhammad Ali and Michael Jordan.

Social Identities

Despite the ubiquity of conflict, gaps remain in our knowledge of what influences its escalation and resolution. How collective identity formation impacts social conflicts is taken up in this text, ranging from church and community disputes,

to international trade disputes and wars.

Vanished: Hidden Identities: Book One

Identity and Difference

Sport and Social Identities

Over the past decade, a significant body of work on the topic of deaf identities has emerged. In this volume, Leigh and O'Brien bring together scholars from a wide range of disciplines -- anthropology, counseling, education, literary criticism, practical religion, philosophy, psychology, sociology, and deaf studies -- to examine deaf identity paradigms. In this book, contributing authors describe their perspectives on what deaf identities represent, how these identities develop, and the ways in which societal influences shape these identities. Intersectionality, examination of medical, educational, and family systems, linguistic deprivation, the role of oppressive influences, the deaf body, and positive deaf identity development, are among the topics examined in the quest to better understand deaf identities. In reflection, contributors have intertwined both scholarly and personal perspectives to animate these academic debates. The result is a book that reinforces the multiple ways in which deaf identities manifest, empowering those whose identity formation is influenced by being deaf or hard of hearing.

Devolution and Identity

First published in 1968, *The Irony of Early School Reform* quickly became essential reading for anyone interested in American education. One of the first books to survey the relationship between public educational systems and the rise of urbanization and industrialization, *Irony* was instrumental in mapping out the origins of school reform and locating the source of educational inequalities and bureaucracies in patterns established in the nineteenth century. This new and enhanced version of the classic text is now available for the legions of people who have asked for it. It includes an update by the author along with the same cohesive text and criticism contained in the original. Readers will appreciate that this edition: brings back into print a book that holds an important place in the field of educational history and in the modern literature of educational reform; assesses the impact of the original publication in light of writing about American history and education since its original publication and explains its continuing significance; shatters warm and comforting myths about the origins of public education; and shows how some of the most problematic features of public education have their

origins in nineteenth century styles of educational reform.

Social Conflicts and Collective Identities

Digital Identities

'Identity' attracts some of social science's liveliest and most passionate debates. Theory abounds on matters as disparate as nationhood, ethnicity, gender politics and culture. However, there is considerably less investigation into how such identity issues appear in the fine grain of everyday life. This book gathers together, in a collection of chapters drawing on ethnomethodology and conversation analysis, arguments which show that identities are constructed 'live' in the actual exchange of talk. By closely examining tapes and transcripts of real social interactions from a wide range of situations, the volume explores just how it is that a person can be ascribed to a category and what features about that category are cons

New Zealand Identities

Combining theoretical and empirical pieces, this book explores the emerging theoretical work seeking to describe hybrid identities while also illustrating the application of these theories in empirical research. The sociological perspective of this volume sets it apart. Hybrid identities continue to be predominant in minority or immigrant communities, but these are not the only sites of hybridity in the globalized world. Given a compressed world and a constrained state, identities for all individuals and collective selves are becoming more complex. The hybrid identity allows for the perpetuation of the local, in the context of the global. This book presents studies of types of hybrid identities: transnational, double consciousness, gender, diaspora, the third space, and the internal colony. Contributors include: Keri E. Iyall Smith, Patrick Gun Cuninghame, Judith R. Blau, Eric S. Brown, Fabienne Darling-Wolf, Salvador Vidal-Ortiz, Melissa F. Weiner, Bedelia Nicola Richards, Keith Nurse, Roderick Bush, Patricia Leavy, Trinidad Gonzales, Sharlene Hesse-Biber, Emily Brooke Barko, Tess Moeke-Maxwell, Helen Kim, Bedelia Nicola Richards, Helene K. Lee, Alex Frame, Paul Meredith, David L. Brunisma and Daniel J. Delgado.

Deaf Identities

The New York Times bestselling author of *The Origins of Political Order* offers a provocative examination of modern identity politics: its origins, its effects, and what it means for domestic and international affairs of state. In 2014, Francis Fukuyama wrote that American institutions were in decay, as the state was progressively captured by powerful interest groups. Two

years later, his predictions were borne out by the rise to power of a series of political outsiders whose economic nationalism and authoritarian tendencies threatened to destabilize the entire international order. These populist nationalists seek direct charismatic connection to “the people,” who are usually defined in narrow identity terms that offer an irresistible call to an in-group and exclude large parts of the population as a whole. Demand for recognition of one’s identity is a master concept that unifies much of what is going on in world politics today. The universal recognition on which liberal democracy is based has been increasingly challenged by narrower forms of recognition based on nation, religion, sect, race, ethnicity, or gender, which have resulted in anti-immigrant populism, the upsurge of politicized Islam, the fractious “identity liberalism” of college campuses, and the emergence of white nationalism. Populist nationalism, said to be rooted in economic motivation, actually springs from the demand for recognition and therefore cannot simply be satisfied by economic means. The demand for identity cannot be transcended; we must begin to shape identity in a way that supports rather than undermines democracy. *Identity* is an urgent and necessary book—a sharp warning that unless we forge a universal understanding of human dignity, we will doom ourselves to continuing conflict.

Identities in Everyday Life

This original work explores the increasingly important phenomenon of the formation of transnational identity. Considering the ongoing relevance of the European Union, the contributors ask a series of intriguing questions: Is a European identity possible? How are the various types of European identity formed and maintained? How are these identities linked to the process of European integration? Examining the psychological, institutional, and political mechanisms that encourage or impede identification with transnational groups, the book considers these theoretical questions in light of new evidence drawn from a rich body of primary research, including field experiments, in-depth interviews with elites, and public opinion surveys. Brought together for the first time, social psychologists, sociologists, political scientists, and ethnographers share their theoretical and methodological perspectives in tackling the common issues surrounding the emergence of “European” as a political identity. Paying special attention to the role of the institutions of the EU, the authors investigate the impact of neo-functional strategies and find that the processes of identity formation are far more complicated than can be explained by material and institutional factors alone. The authors engage in a fruitful dialogue about how much a European identity exists and how much it matters as they delve into the sources of disagreement and their implications.

Identities in Talk

Featuring essays by world-renowned scholars, *Diasporas* charts the various ways in which global population movements and associated social, political and cultural issues have been seen through the lens of diaspora. Wide-ranging and interdisciplinary, this collection considers critical concepts shaping the field, such as migration, ethnicity, post-colonialism

and cosmopolitanism. It also examines key intersecting agendas and themes, including political economy, security, race, gender, and material and electronic culture. Original case studies of contemporary as well as classical diasporas are featured, mapping new directions in research and testing the usefulness of diaspora for analyzing the complexity of transnational lives today. *Diasporas* is an essential text for anyone studying, working or interested in this increasingly vital subject.

Investigating Identities

This collection of essays by established writers in postmodern pedagogy stakes out new conceptual territories, redefines the field, and presents a complete review of contemporary curriculum practice and theory in a single volume. Drawing upon contemporary research in political, feminist, theological, literary, and racial theory, this anthology reformulates the research methodologies of the discipline and creates a new paradigm for the study of curriculum into the next century. The contributors consider gender, identity, narrative and autobiography as vehicles for reviewing the current and future state of curriculum studies. *Special Features* Presents new essays by established writers in postmodern pedagogy, *Reviews* curriculum studies through the filters of race, gender, identity, narrative, and autobiography, *Offers* in a single, affordable volume a complete review of contemporary curriculum practice and theory.

Superheroes and Identities

This groundbreaking work explores the vital importance of territory and space to any genuine understanding of nationalism and identity. Too often, the contributors argue, national identity is analyzed apart from the lands that are integral to its formation, as territory is seen as a commodity to be brokered rather than as central to a group's self-definition. This volume combines theoretical insights with structured case studies on how national identity manifests itself in space and at different geographical scales.

Exploring Positive Identities and Organizations

Sport is far more than a national and international entertainment: it is a source of political identity, morale, pride and superiority. *Tribal Identities* explores the influence of sport on the nations of Europe as a mechanism of national solidarity promoting a sense of identity, unity, status and esteem; as an instrument of confrontation between nations, stimulating aggression, stereotyping, and images of inferiority and superiority; and as a cultural bond linking nations across national boundaries, providing common enthusiasm, shared experiences, the transcendence of national allegiances, and opportunities for association, understanding and goodwill.

Diasporas

Burdened by Race showcases recent innovative research and writing on coloured identity in southern Africa. It brings new levels of understanding to coloured self-identification and manifestations of colouredness across the region, using interlinking themes and case studies from South Africa, Zimbabwe, Zambia and Malawi to present analyses that challenge and overturn much of the conventional wisdom around this identity.

Burdened by Race

Sánchez offers the first historical and literary analysis of thirty 1870s testimonios from the original Spanish-speaking settlers of Alta California. Telling Identities scrutinizes the role of gender, class, race, language, and ethnicity in group identity formation as it looks into history to help articulate the cultural politics of contemporary Chicano and Latino culture in the United States.

Social Groups and Identities

Writing New Identities

Hidden Identities is a novel about a girl who is trying to find her place in the world. I believe this is something that we all struggle with at some point in our lives. Why are we here? What am I supposed to be doing while on this earth? We spend our lives trying to answer questions like this. The main character, Katelyn, struggles with this until she is rescued by Donovan. A handsome, recluse man who helps open up parts of her that she never knew existed. He shows her how to fight, how to shoot a gun, and brings her on all sorts of adventurous and exciting dates. He has her doing things that she would have never thought to do on her own and she finds that she is only happy when she is with him. Donovan didn't have the easiest childhood and had learned many of these skills early on, because he had to. He wants to teach Katelyn these skills to keep her safe from anything that might happen to her. He wants her to be prepared. Every date and adventure he takes her on is meticulously planned so she can get the most out of it. Katelyn doesn't even realize it. She assumes he is just planning these interesting dates for her and she just absolutely loves it. One day, Donovan vanishes, only leaving behind a ransacked apartment and a trail of obscure clues. Katelyn isn't sure what to do and who to trust. She does her best to follow the clues and has to make a decision. Does she try and save the man she loves on her own, or does she call someone for help. She has to use the skills that Donovan taught her to find him. The question is, will she find him in time, or will she be too late?

Combinatorial Identities

This book introduces identity, one of the most iconic concepts of our time, which is used ubiquitously but rarely explained. It discusses the various uses of 'identity' separately for different fields of study - philosophy, psychology, sociology, gender studies, and linguistics. This book also compares Western concepts and theories of identity with similar concepts in other parts of the world. It explains how contemporary trends in marketization and globalization have made identity increasingly important to us in the last 50 years. This book also outlines the historical background to the concept of identity.

Social Identity

Identities in Everyday Life explores how identity theory in social psychology can help us understand a wide array of issues across six areas of life including psychological well-being; authenticity; morality; gender, race, and sexuality; group membership; and early-to-later adult identities. Bringing together over 45 scholars presenting original theoretical or empirical work, the chapters build upon prior work to understand the source, development, and dynamics of individuals' identities as they unfold within and across situations. These studies not only advance scholarly research on identities, but they also provide an understanding of the relevance of identities for people's everyday lives. The findings are relevant to a broad-based set of researchers in the academy across disciplines in the social sciences, education, and health, to students at both the graduate and undergraduate level who are interested in identities at both a personal and professional level, to mental health professionals, and to the average person in society.

Handbook of Musical Identities

This book argues that we have a collection of social selves and that our identities are influenced by such things as class, gender, sexuality, race, nationality, religious views and by the media.

Models of Identities in Postcommunist Societies

American Identities is a dazzling array of primary documents and critical essays culled from American history, literature, memoir, and popular culture that explore major currents and trends in American history from 1945 to the present. Charts the rich multiplicity of American identities through the different lenses of race, class, and gender, and shaped by common historical social processes such as migration, families, work, and war. Includes editorial introductions for the volume and for each reading, and study questions for each selection. Enables students to engage in the history-making process while developing the skills crucial to interpreting rich and enduring cultural texts. Accompanied by an instructor's guide

containing reading, viewing, and listening exercises, interview questions, bibliographies, time-lines, and sample excerpts of students' family histories for course use.

Adolescent Identities

The contributors to this study critically de-construct Albanian myths and offer insights into Albanian history and politics. They conclude with contemporary Albanian critiques of the origins and functions of Albanian politics and ideologies.

Cartographies of Diaspora

The concept of identity has become widespread within the social and behavioral sciences in recent years, cutting across disciplines from psychiatry and psychology to political science and sociology. All individuals claim particular identities given their roles in society, groups they belong to, and characteristics that describe themselves. Introduced almost 30 years ago, identity theory is a social psychological theory that attempts to understand identities, their sources in interaction and society, their processes of operation, and their consequences for interaction and society from a sociological perspective. This book describes identity theory, its origins, the research that supports it, and its future direction. It covers the relation between identity theory and other related theories, as well as the nature and operation of identities. In addition, the book discusses the multiple identities individuals hold from their multiple positions in society and organizations as well as the multiple identities activated by many people interacting in groups and organizations. And, it covers the manner in which identities offer both stability and change to individuals. Written in an accessible style, Identity Theory makes, step by step, the full range of this powerful new theory understandable to readers at all levels.

Embracing Identities in Early Childhood Education

Culture, politics, subjectivity and identity are highly contested in contemporary debates. Cartographies of Diaspora throws light on these debates by exploring the intersections of 'race', gender, class, sexuality, ethnicity, generation and nationalism in different discourses, practices and political contexts. Cartographies of Diaspora provides an innovative theoretical framework for the study of 'difference', 'diversity' and 'commonality' which links them to the analyses of 'diaspora', 'border' and 'location'. In relating these questions to contemporary migrations of people, capital and cultures, it offers fresh insights into thinking about late twentieth-century social and cultural formations. It will be essential reading to students of sociology, cultural studies, postcolonial studies, 'race' and ethnic studies, women's studies and anthropology, and will also appeal to teachers, youth and community workers and social workers.
