In this book, Michael J. Buckley investigates the rise of modern atheism, arguing convincingly that its roots reach back to the seventeenth century, when Catholic theologians began to call upon philosophy and science-rather than any intrinsically religious experience-to defend the existence of god. Buckley discusses in detail thinkers such as Lessius, Mersenne, Descartes, and Newton, who paved the way for the explicit atheism of Diderot and D'Holbach in the eighteenth century. [A] capaciously learned and brilliantly written book This is one of the most interesting and closely argued works on theology that i have read in the last decade.-Lawrence S. Cunningham, Theology Today

Blending insights from linguistic and social theories of speech, ritual and narrative with music-analytic and historical criticism, Britten's Musical Language offers interesting perspectives on the composer's fusion of verbal and musical utterance in opera and song. It provides close interpretative studies of the major scores (including Peter Grimes, Billy Budd, The Turn of the Screw, War Requiem, Curlew River and Death in Venice) and explores Britten's ability to fashion complex and

mysterious symbolic dramas from the interplay of texted song and a wordless discourse of motives and themes. Focusing on the performative and social basis of language, Philip Rupprecht replaces traditional notions of textual 'expression' in opera with the interpretation of topics such as the role of naming and hate speech in Peter Grimes; the disturbance of ritual certainty in the War Requiem; and the codes by which childish 'innocence' is enacted in The Turn of the Screw.

Mediation Ethics is a groundbreaking text that offers conflict resolution professionals a much-needed resource for traversing the often disorienting

landscape of ethical decision making. Edited by mediation expert Ellen Waldman, the book is filled with illustrative case studies and authoritative commentaries by mediation specialists that offer insight for handling ethical challenges with clarity and deliberateness. Waldman begins with an introductory discussion on mediation's underlying values, its regulatory codes, and emerging models of practice. Subsequent chapters treat ethical dilemmas known to vex even the most experienced practitioner: power imbalance, conflicts of interest, confidentiality, attorney misconduct, cross-cultural conflict, and more. In each chapter, Waldman analyzes the competing values at stake and introduces a challenging case, which is followed by commentaries by leading mediation scholars who discuss how they would handle the case and why. Waldman concludes each chapter with a synthesis that interprets the commentators' points of agreement and explains how different operating premises lead to different visions of what an ethical mediator should do in a given case setting. Evaluative, facilitative, narrative, and transformative mediators are all represented. Together, the commentaries showcase the vast diversity that characterizes the field today and reveal the link between mediator philosophy, method, and process of ethical deliberation. Kaeti and her companions inhabit a strange world; a 'theatre of the mind' where the unexpected is commonplace, where ghosts, vampires and even the odd goddess may be encountered at any turn. It is a tribute to the author's skill that Kaeti's world seems, at all times, as real as our own, sometimes uncomfortably so. Whether satirising the mores of the Thames Valley or exposing the curious antics of the publishing world, Roberts is equally at home. He explores the gamut of human emotions; high comedy alternates with terror, the most delicate of love scenes are set against the iron dreariness of Death Row. Always though, at the focus, is Kaeti; witty and resourceful, resilient and vulnerable by turns. Some characters may change their roles with lightning speed, like the players in a repertory company - but Kaeti remains. As does London. Robert always displays a knowledge of a city haunted by its own past, and a love for its highways and byways, that will surprise old fans and win him many new admirers.

## **The Dred Scott Case**

By mapping the remarkable run of the icon of Justice, a woman with scales and sword, and by tracing the development of public spaces dedicated to justice—courthouses—the authors explore the evolution of adjudication into its modern form as well as the intimate relationship between the courts and democracy. The authors analyze how Renaissance “rites” of judgment turned into democratic “rights,” requiring governments to respect judicial independence, provide open and public hearings, and accord access and dignity to “every person.” With over 220 images, readers can see both the longevity of aspirations

for justice and the transformation of courts, as well as understand that, while venerable, courts are also vulnerable institutions that should not be taken for granted.

### **How to Build and Manage an Estates Practice**

This book proposes a principled approach to the regulation of dispute resolution. It

covers dispute resolution mechanisms in all their varieties, including negotiation, mediation, conciliation, expert opinion, mini-trial, ombud procedures, arbitration and court adjudication. The authors present a transnational Guide for Regulating Dispute Resolution (GRDR). The regulatory principles contained in this Guide are based on a functional taxonomy of dispute resolution mechanisms, an open normative framework and a modular structure of regulatory topics. The Guide for Regulating Dispute Resolution is formulated and commented upon in a concise manner to assist legislators, policy-makers, professional associations, practitioners and academics in thinking about which solutions best suit local and regional circumstances. The aim of this book is to contribute to the understanding and development of the legal framework governing national and international dispute resolution. Theory, empirical research and regulatory models have been taken from the wealth of experience in 12 jurisdictions: Austria, Belgium, Denmark, England and Wales, France, Germany, Italy, Japan, the Netherlands, Norway, Switzerland and the United States of America. Experts with a background in academia, practice and law-making describe and analyse the regulatory framework and social reality of dispute resolution in these countries. On this basis the authors draw conclusions about policy choices, regulatory strategies and the practice of conflict resolution.

## **A Concise Law Dictionary of Words, Phrases, and Maxims**

## **The Opposite of COMBAT: A Parents' Guide for Teaching Siblings How to Collaborate and Solve Their Own Conflicts**

## **International Public Goods and Transfer of Technology Under a Globalized Intellectual Property Regime**

Distinguished economists, political scientists, and legal experts discuss the implications of the increasingly globalized protection of intellectual property rights for the ability of countries to provide their citizens with such important public goods as basic research, education, public health, and environmental protection. Such items increasingly depend on the exercise of private rights over technical inputs and information goods, which could usher in a brave new world of accelerating technological innovation. However, higher and more harmonized

levels of international intellectual property rights could also throw up high roadblocks in the path of follow-on innovation, competition and the attainment of social objectives. It is at best unclear who represents the public interest in negotiating forums dominated by powerful knowledge cartels. This is the first book to assess the public processes and inputs that an emerging transnational system of innovation will need to promote technical progress, economic growth and welfare for all participants.

### **A Selection of Legal Maxims**

### **Rabelais and His World**

Arbitration has become an increasingly important mechanism for dispute resolution, both in the domestic and international setting. Despite its importance as a form of state-sanctioned dispute resolution, it has largely remained outside the spotlight of constitutional law. This landmark work represents one of the first attempts to synthesize the fields of arbitration law and constitutional law. Drawing on the author's extensive experience as a scholar in arbitration law who has lectured and studied around the world, the book offers unique insights into how arbitration law implicates issues such as separation of powers, federalism, and

individual liberties.

As lawyers we are normally interested in various substantive areas of law; and as comparative lawyers we are interested in finding out about the differences and similarities between national legal systems. But from time to time we should also reflect on how we think and operate, and look at basic questions of legal methodology -- both for the sake of understanding better what we do as lawyers immersed in our own legal systems and as lawyers attempting to assess and comprehend how foreign legal systems work. The nine essays in this volume are devoted to the topics of law-making today (with a focus on Japan, Turkey and Russia), judicial decision-making today (with a focus on England and Wales, Switzerland and Argentina), and legal scholarship today (with a focus on the United States, France and South Africa); and they thus revolve around the three protagonists of legal development: legislators, judges and professors. With contributions by: Aditi Bagchi, Basak Baysal, Jean-Sebastien Borghetti, Thomas Coendet, Matthew Dyson, Yuko Nishitani, Agustin Parise, Helen Scott, Andrey M. Shirvindt
