Handbook of Neonatal Intensive Care

"Have a chew of dulse," said Crubog . . . "What is it?" asked Potter, half-suspiciously. "Seaweed. " "Is it good for the virility? . . . " "And what is the virility?" asked the old man. "Does it make you more attractive to women?" Potier shouted in his ear. "No. " "What is it good for then?" "WortnS. " "Worms?" "Intestinal worms. You'll never again pass a worm if you eat a fistful of dulse first thing in the morning and last thing at night. " "If it's an anthelmintic, I'll try a spot of it," said Potter. - From Bogmail, a novel by Patrick McGinley (1981) With modern techniques of chemical isolation and structure determination, the old distinction between herbal and chemical remedies has largely been broken down. By chemotherapy we now mean simply the treatment of disease by drugs (the word medicines has unhappily been eclipsed). The distinction made between chemotherapy and non chemical therapy (e. g. , radiation, physiotherapy, surgical intervention, immunomodulation) remains useful despite some minor overlapping. The present work thus deals with drugs and their use in parasitic disease. (Since we are dealing with the treatment of incipient as well as established infection, chemotherapy subsumes chemoprophylaxis as well as chemotherapeusis per se.) Definition of parasitism as a biological modus vivendi, although important in itself, need not concern us here. We need simply delimit the scope of the book, and that is easily done.

Bruno—the new kid on the block—finds himself at the center of the mystery when he discovers his natural map-reading abilities are actually supernatural. When the reluctant hero isn’t engaged in cosmic battles against evil, Bruno is swooning over the mesmerizing Celia (from *The Suburban Strange*) and navigating the goth sensibilities and musical obsessions of the Rosary, her über-chic clique. A hypnotic coming-of-age novel that chills and thrills.
