Late Picasso

"Picasso and Truth" offers a breathtaking and original new look at the most significant artist of the modern era. From Pablo Picasso's early "The Blue Room" to the later "Guernica", eminent art historian T. J. Clark offers a striking reassessment of the artist's paintings from the 1920s and 1930s. Why was the space of a room so basic to Picasso's worldview? And what happened to his art when he began to feel that room-space become too confined--too little exposed to the catastrophes of the twentieth century? Clark explores the role of space and the interior, and the battle between intimacy and monstrosity, in Picasso's art.

Based on the A. W. Mellon Lectures in the Fine Arts delivered at the National Gallery of Art, this lavishly illustrated volume remedies the biographical and idolatrous tendencies of most studies on Picasso, reasserting the structure and substance of the artist's work. With compelling insight, Clark focuses on three central works--the large-scale "Guitar and Mandolin on a Table" (1924), "The Three Dancers" (1925), and "The Painter and His Model" (1927)--and explores Picasso's answer to Nietzsche's belief that the age-old commitment to truth was imploding in modern European culture. Masterful in its historical contextualization, "Picasso and Truth" rescues Picasso from the celebrity culture that trivializes his accomplishments and returns us to the tragic vision of his art--humane and appalling, naive and difficult, in mourning for a lost nineteenth century, yet utterly exposed to the hell of Europe between the wars.

Matisse and Picasso achieved extraordinary prominence during their lifetimes. They have become cultural icons, standing not only for different kinds of art but also for different ways of living. Matisse, known for his restraint and intense sense of privacy, for his decorum and discretion, created an art that transcended daily life and conveyed a sensuality that inhabited an abstract and ethereal realm of being. In

contrast, Picasso became the exemplar of intense emotionality, of theatricality, of art as a kind of autobiographical confession that was often charged with violence and explosive eroticism. In *Matisse and Picasso*, Jack Flam explores the compelling, competitive, parallel lives of these two artists and their very different attitudes toward the idea of artistic greatness, toward the women they loved, and ultimately toward their confrontations with death.

Einstein, Picasso

The most important scientist of the twentieth century and the most important artist had their periods of greatest creativity almost simultaneously and in remarkably similar circumstances. This fascinating parallel biography of Albert Einstein and Pablo Picasso as young men examines their greatest creations -- Picasso's *Les Femmes d'Alger (O. J. R. Version O)* and Einstein's special theory of relativity. Miller shows how these breakthroughs arose not only from within their respective fields but from larger currents in the intellectual culture of the times. Ultimately, Miller shows how Einstein and Picasso, in a deep and important sense, were both working on the same problem.

At the height of his powers, Pablo Picasso was the artist as revolutionary, breaking through the niceties of form in order to mount a direct challenge to the values of his time. At the height of his fame, he was the artist as royalty: incalculably wealthy, universally idolized—and wholly isolated. In this stunning critical assessment, John Berger—one of this century's most insightful cultural historians—trains his penetrating gaze upon this most prodigious and enigmatic painter and on the Spanish landscape and very particular culture that shaped his life and work. Writing with a novelist's sensuous evocation of character and detail, and drawing on an erudition that embraces history, politics, and art, Berger follows Picasso from his childhood in Malaga to the Blue Period and Cubism, from the creation of Guernica to the pained etchings of his final years. He gives us the full measure of Picasso's triumphs and an unsparing reckoning of their cost—in exile, in loneliness, and in a desolation that drove him, in his last works, into an old man's furious and desperate frenzy at the beauty of what he could no longer create.

Matisse and Picasso

This thought-provoking book presents a lively introduction to the 20th century's most important artist, Pablo Picasso. Picasso was a passionate student of the European painting tradition, and his memory for images was voracious. Naturally drawn to Spanish masters Velázquez and Goya, he also engaged with such figures as Rembrandt, Delacroix, Ingres, Manet, and Cézanne. Picasso repeatedly pitted himself against these masters, taking up their signature themes, techniques, and artistic concerns in audacious paintings of his own. Sometimes his "quotations" were direct, other times highly allusive. Always, Picasso made the implicit case that it was he in the 20th century who most forcefully reinvigorated the European tradition. This book showcases his extraordinary work, where we witness the daring transformation of the art of the past into, in Picasso's own words, "something else entirely."

Challenging the Past

The doctrine of moral rights is based on the idea that authors have a special bond with their own creative

work. At present, the legal status of moral rights demands clarification and assessment as never before, as the international expansion of moral rights occurs in the new environment of digital technology. Just as the survival of copyright law depends on its capacity to adapt effectively to the new technological environment, a new approach to moral rights is also necessary. *Moral Rights: Principles Practice and New Technology* is the first work to comprehensively address the role of moral rights in an environment of digital technology, identifying the challenges and confronting moral rights in a digital environment. The challenges are addressed in both practical and theoretical terms, and examples drawn from the legislation and practice of key jurisdictions around the world. *Moral Rights* concludes with a consideration of how the concept of moral rights can contribute to the re-shaping of copyright law in a digital context.

What is "intellectual property"? This book examines the way in which this important area of law is constructed by the legal system. It argues that intellectual property is a body of rules, created by the legal system, that regulate the documented forms of abstract objects, which are also defined into existence by the legal system. Intellectual property law thus constructs its own objects of regulation, and it does so through the application of a collection of core concepts. By analyzing the metaphysical structure of intellectual property law and the concepts the legal system uses to construct "intellectual property," the book sheds new light on the nature of this fascinating area of law. It explains anomalies between social and

intellectual property uses of concepts such as authorship - here dubbed "creatorship" - and originality, and it helps to explain the role of intellectual property from a structural (rather than the traditional normative) perspective.

Constructing Intellectual Property

An unprecedented examination of the history of American modern art through the work of its most influential forerunner Many American artists throughout the 20th century designated Pablo Picasso as the central figure of the modern movement and defined their own artistic achievements through their absorption, critique, or rejection of his example. Picasso and American Art is a groundbreaking publication juxtaposing works by Picasso with the paintings, sculptures, and drawings created in response by an extremely diverse group of his contemporaries and successors, including Max Weber, Stuart Davis, Arshile Gorky, John Graham, Willem de Kooning, Jackson Pollock, David Smith, Roy Lichtenstein, and Jasper Johns. Based on extensive research, Michael FitzGerald's text provides valuable new information on the fundamental role that Picasso

This book also documents, for the first time, the accessibility of Picasso's work in the United States between 1911 and 1957 in exhibitions, collections, and publications through a comprehensive chronology. Françoise Gilot was in her early twenties when she met the sixty-one-year-old Pablo Picasso in 1943. Brought up in a well-to-do upper-middle-class family, who had sent her to Cambridge and the Sorbonne and hoped that she would go into law, the young woman defied their wishes and set her sights on being an artist. Her introduction to Picasso led to a friendship, a love affair, and a relationship of ten years, during which Gilot gave birth to Picasso's two children, Paloma and Claude. Gilot was one of Picasso's muses; she was also very much her own woman, determined to make herself into the remarkable painter she did indeed become. *Life with Picasso*, written with Carlton Lake and published in 1961, is about Picasso the artist and Picasso the man. We hear him talking about painting and sculpture, his life, his career, as well as other artists, both contemporaries and old masters. We glimpse Picasso in his many and volatile moods, dismissing his work, exultant over his work, entertaining his various superstitions, being an anxious father. But *Life with Picasso* is not only a portrait of a great artist at the height of his fame; it is also a picture of a talented young woman of exacting

intelligence at the outset of her own notable career.
