This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

impact sites. The implications of this discovery will launch Slothrop on an amazing journey across war-torn Europe, fleeing an international cabal of military-industrial superpowers, in search of the mysterious Rocket 00000, through a wildly comic extravaganza that has been hailed in *The New Republic* as “the most profound and accomplished American novel since the end of World War II.”

Prentice Hall Literature

The first global anthology of migration literature featuring works by Mohsin Hamid, Zadie Smith, Marjane Satrapi, Salman Rushdie, and Warsan Shire, with a foreword by Edwidge Danticat, author of *Everything Inside* A Penguin Classic Every year, three to four million people move to a new country. From war refugees to corporate expats, migrants constantly reshape their places of origin and arrival. This selection of works collected together for the first time brings together the most compelling literary depictions of migration. Organized in four parts (Departures, Arrivals, Generations, and Returns), *The Penguin Book of Migration Literature* conveys the intricacy of worldwide migration patterns, the diversity of immigrant experiences, and the commonalities among many of those diverse experiences. Ranging widely across the eighteenth through twenty-first centuries, across every continent of the earth, and across multiple literary genres, the anthology gives readers an understanding of our rapidly changing world, through the eyes of those at the center of that change. With thirty carefully selected poems, short stories, and excerpts spanning three hundred years and twenty-five countries, the collection brings together luminaries, emerging writers, and others who have earned a wide following
