Principles of Violin Playing and Teaching

Violin Technique and Performance Practice in the Late Eighteenth and Early Nineteenth Centuries

ViolinMind is a pedagogical method book that focuses on intonation. It is a transcription for the violin of CelloMind published in 2017 by Ovation Press, Ltd. The co-authors of ViolinMind are Hans Jørgen Jensen, Professor of Cello at the Bienen School of Music at Northwestern University and Grigory Kalinovsky, Professor of Music (Violin) at Indiana University Jacobs School of Music. The mystery of intonation is dissected by defining the scientific principles behind it, and providing easy, intuitive examples of the three main kinds of intonation systems used today: Equal Temperament, Just, and Pythagorean. Playing with exquisite intonation has mostly been reserved for those who possess a strong intuitive sense of pitch and harmonic color; however, ViolinMind breaks down this barrier using a highly detailed, systematic approach, making the process of acquiring a sophisticated sense of intonation similar to any other technical skill. Chapters in the book explore in great detail topics such as the harmonic overtone series, the scientific principles behind Cents, the syntonic comma, the just scales, the Pythagorean comma, the Pythagorean semitones, advanced sympathetic

vibrations, Tartini tones, and double stops studies in tritones. All chapters in the book include numerous practical samples and listening exercises that bridge the gap between the theory and its application. The chapters on intonation conclude with practical examples from the following repertoire: intonation performance practice in the Bach Sonatas and Partitas for Violin Solo (BWV 1001-1006), and intonation performance practice with piano. The appendices in the book provide detailed explanations about the Helmholtz intonation chart, the harmonic series, just intonation, the Schisma, as well as an illustration of two violin fingerboards from two method books from the 18th century showing pitch distribution for just intonation and Pythagorean intonation respectively.

The Art of the Violin

This book is a comprehensive guide for teaching basic violin and viola skills. It is also a detailed manual for the film series "The Teaching of Action in String Playing," produced by the University of Illinois String Research Project. The central issue of this four-year government grant was the hypothesis that movement training, designed to free the student from excessive tensions, can be introduced within an organized plan of string instruction, and that such a plan, in the long run, will result in faster learning and better performance in all facets of instruction. The research dealt primarily with the violin and viola. However, the principles and musical materials are also applicable (with minor adjustments) to the cello and double bass.

Szigeti on the Violin

A comprehensive guide to the Suzuki violin literature containing many illustrations. Widely used internationally by both teachers and parents, this newly revised edition contains musical examples which have been inserted for all of the suggested exercises for ease of reference. In addition, an entirely new chapter has been added called "Practice Can Be Fun" which includes material from speeches the author has given at institutes to children, parents and teachers. There are stories on practicing which can be read to children.

True Principles of the Art of Violin-playing

Nearly a century after its initial publication, Carl Flesch's Scale System remains one of the foremost scale books for violin. This comprehensive collection of exercises features the 24 major and minor scales, with emphasis on both double-stops and arpeggios. With Flesch's exercises, the intermediate player will progressively master intonation, shifting, rhythm, string crossing, bow speed and pressure, and tone production. Initially published as a supplement to Book 1 of The Art of Violin Playing, Flesch's Scale System has become the principal scale study for serious violinists. Carl Flesch (1873-1944) was born in Hungary and began playing the violin at age seven. He was a famous chamber musician, instructor, and solo performer, who mastered repertoire ranging from Baroque to contemporary works.

The Principles of in Violin Fingering

In *Violin Secrets: 101 Performance Strategies for the Advanced Violinist*, author and violinist Jo Nardolillo surveys the cutting edge of current violin technique, combining tradition and innovation in one volume. Blending traditional strategies that have produced generations of legendary performers with modern ideas, Nardolillo reveals the secrets of today's most sought-after master teachers, garnered through her decade of study at top conservatories across the nation. With more than a quarter century of experience teaching at the advanced level, she has refined and distilled these essential concepts into clear, concise, step-by-step instructions, complete with original illustrations and helpful tips. *Violin Secrets* is an indispensable resource for any and all serious violinists. The first chapter tackles the toughest challenge on the wish list of every established professional, dedicated student, and passionate amateur: understanding why immaculate intonation is so difficult (and exploring ways to achieve it). Further chapters address the advanced techniques of fingerboard mapping, mastering spiccato, controlling vibrato, playing into the curve, small-hand technique, and navigating comfortably in high positions. An extensive section on practice strategies blends concepts from learning theory, sports psychology, and Zen, and the chapter on artistry offers insight on creating expressive phrases,

connecting with the audience, and developing a unique artistic voice. *Violin Secrets* examines overcoming performance anxiety, choosing the right music editions, being a strong section player in an orchestra, leading productive chamber music rehearsals, and winning auditions. *Violin Secrets* is beautifully illustrated with original drawings by T. M. Larsen, musical examples from the standard literature, and a violinist's family tree that traces these secrets back through to the founding fathers of violin technique. The *Music Secrets for the Advanced Musician* series is designed for instrumentalists, singers, conductors, composers, and other instructors and professionals seeking a quick set of pointers to improve their work as performers and producers of music. Easy to use and intended for the advanced musician, contributions to *Music Secrets* fill a niche for those who have moved beyond what beginners and intermediate practitioners need.

provides in his treatise many insights into the style of nineteenth-century fingering, bowing, ornamentation, and expressiveness that are not apparent from the directions and markings found in scores of that time. Such information will be invaluable for performers interested in understanding the intentions of composers such as Viotti, Haydn, Mozart, Beethoven, and Mendelssohn. This complete, unabridged translation, which includes an extensive introduction by the translator, Louise Goldberg, and a foreword by Zvi Zeitlin, will be indispensable for musicologists, performers, and lovers of eighteenth- and nineteenth-century classical music.

The Art of Violin Playing

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

The Cambridge Companion to the Violin

Known principally as the father of Wolfgang Amadeus, Leopold Mozart was a distinguished musician in his own right. An excellent violinist and composer, his greatest contribution to music was his Treatise on Fundamental Principles of Violin Playing. Published at Ausburg in 1756 it was the major work of its time on the violin and it contains much that is of considerable interest and value to musicians today: notes on performance, practice, a glossary of technical terms and specific chapters on the playing of written and improvised embellishments, the trill, and special rhythmic figures. Copious exercises illustrate each point made in the text. A Preface--revised for this edition--offers an illuminating biographical study of Leopold both as a man and as a musician.
